

## **Angelica Riemann**

### **Senior Vice President, Agilent President, Agilent CrossLab Group**

Angelica was named president of the Agilent CrossLab Group in February 2024. She previously served as vice president and general manager of Agilent CrossLab Group's Services Division for two and a half years. Prior to that she served as vice president and general manager of the Chemistries and Supplies Division after being vice president and general manager of the Chemistries Division. Angelica has previously held leadership roles in the Mass Spectrometry Division and the AFO sales organization.

Angelica continues to be a key leader steering the business unit's transformation into a customer-centric organization. Over the span of her 24-year career at Agilent, Angelica has contributed key strategic insights and recommendations as part of the Agilent Enterprise Strategy Initiative, provided ongoing leadership as a founding member of the Agilent Biopharma Initiative, and informed high impact business strategies driven by organic investment as well as M&A opportunities.

Angelica's experience includes progressive leadership responsibilities across technical support, sales, program and product marketing, and marketing management. Before joining Agilent, Angelica was a customer, spending six years in a forensic lab and as an application scientist at J&W Scientific.

Angelica earned a Bachelor of Science in cell and molecular biology, with a minor in chemistry from San Francisco State University. She's an alumnus of the Agilent LEAD leadership program, the G100 Women's Leadership Acceleration Program and has a certificate in marketing strategy from the Johnson Graduate School of Management at Cornell University.
