Agilent Sample Introduction Portfolio

REGARDLESS OF YOUR NEEDS, AGILENT HAS THE RIGHT SAMPLE INTRODUCTION PRODUCT FOR YOUR LAB

The Measure of Confidence

Agilent Technologies
WITH AGILENT, YOU HAVE THE FLEXIBILITY TO CHOOSE THE AUTOMATIC SAMPLER PERFECTLY SUITED FOR THE NEEDS OF YOUR LAB

Whether you’re detecting emerging contaminants in drinking water, testing drugs for purity, or testing for illegal drugs, your results have to be correct, precise, and irrefutable. As your lab’s requirements and needs continue to change, achieving that level of precision can be challenging.

Agilent can help you meet that challenge head on. With our portfolio of Sample Introduction products, we have a solution that’s suited to the specific types of samples and analyses you perform. Regardless of your sample introduction needs, Agilent has a sampler to support your lab’s productivity.

Our most flexible liquid sampling system

Agilent 7693A Series Automatic Liquid Sampler (ALS)

Using today’s latest technology, the Agilent 7693A helps to ensure your best chromatography with advanced injection features. Whether you have a few or hundreds of samples to analyze, you’ll experience sample handling and injection capabilities that are best in class.

• **Multiple-wash solvent capability** for pre- and post-injection needle rinsing reduces sample carryover
• **Pre-injection sample pumps and washes** further reduce the possibility of carryover
• **Single stroke injection volume**, as small as 0.01 μL and as large as 250 μL, lets you precisely match injections to the exact needs of your analyses

First-class precision, reliability, and ease of use

Agilent 7697A GC Headspace Sampler

With best-in-class technology and powerful software, the Agilent 7697A Headspace Sampler is packed with the latest productivity-boosting features.

• **Unique sampling design** allows you to use hydrogen as a carrier gas, delivering optimal chromatography and helping future-proof your lab
• **Comprehensive software** goes beyond sample handling to guide you through tasks such as method development and resource conservation
• **Method optimization tools** facilitate headspace method development
• **Electronic pneumatic control**, vial leak checking, and barometric pressure compensation ensure consistent results
Robust productivity tool for intermediate capacity needs

**Agilent 7650A ALS**

For labs with intermediate sampling needs, the Agilent 7650A is the ideal solution for achieving maximum productivity.

- **State-of-the-art sample handling** provides the highest level of reliability for GC sampling
- **Delivers performance** consistent with other Agilent ALS products
- **Programmable injection** means plunger speed can be optimized for large volume or challenging applications

**Designed specifically for your 6850 GC**

**Agilent 6850 ALS**

Combine the Agilent 6850 Automatic Liquid Sampler (ALS) with the Agilent 6850 GC to create the ideal gas chromatography system for routine QA/QC analyses.

- **Programmable**, allowing unattended operation for increased productivity
- **Preserves the GC system’s small footprint**, while adding significant sample capacity
- **Optional turret** to accommodate 22 4-mL vials

**Agilent PAL Sampler**

- Combines liquid, headspace, and SPME injection into one instrument, so you can switch from one application to another on the same GC workstation
- Accommodates 4 vial sizes: 1 mL, 2 mL, 10 mL, and 20 mL

**Thermal Desorbers**

- Labor-saving sample introduction technique for GC and GC/MS that combines selective concentration enhancement with direct extraction into the carrier gas

**Tekmar Purge & Trap**

- Ability to vary flow rates in different modes, which increases sample throughput
- Ultra-low carryover; superior water management

Analyze trace levels of gas, solid, liquid, and slurry samples quickly in the field

**Capillary Trap Sampler:** This portable, handheld sampler concentrates trace-level airborne compounds in minutes, allowing you to reduce your sampling speed to just minutes – or seconds – per sample.

**Thermal Separation Probe:** This TSP provides fast analysis of solid, liquid, and slurry samples with limited or zero sample preparation required.
