The Value of Lifetime Learning

Investments in education improve laboratory staff productivity by enhancing skills necessary for routine procedures. Education helps to utilize the full potential of instruments, as staff members gain knowledge and insights into the latest techniques. Well-educated staff members—taught by subject matter experts and certified trainers—are more dedicated to your organization and feel more confident in their accomplishments.

At Agilent University, you can find a wide range of learning options to meet the needs of your lab, helping optimize productivity on your new or existing equipment.

Classroom Training: Held at purpose-built training facilities, we offer a wide variety of courses, ranging from introductory level to in-depth, hands-on experience with your laboratory equipment.

Customized On-Site Training: Onsite training allows you to customize material from Agilent’s standard courses and combine with information unique to your laboratory to create a highly effective training course targeted to your team.

Online, on-demand training: Online, on-demand training gives you ultimate learning flexibility. Our eLearning solutions offer a comprehensive range of modules so that you can learn what you want, when you want, and at your own pace.

Dear Valued Customers,

Thank you for the continued support and valuable suggestions which have helped us improve our training portfolio. Your recommendations shape our development efforts and help us find new ways to offer innovative learning opportunities.

We understand that technology changes rapidly and without the right training and support employees will become over-tasked and lose confidence in their abilities. Well-educated staff members will be better equipped to drive your laboratory’s performance.

Our training courses focus on Agilent Hardware, Software, and Workflow consulting for all skill levels in the laboratory. Whether purchasing new equipment or optimizing workflow using existing instruments, Agilent can deliver an education solution that will help improve processes and enable quality results in the laboratory.

For more details, please feel free to contact us on 1800 000 000 or email inquiry_lsca@agilent.com

Thank you for trusting and choosing Agilent Technologies for your analytical chemistry solutions.

Sincerely Yours,

Jason DiFraia
Global Customer Education Product Manager
