Site Preparation

Purpose of Procedure

To assure that the installation of Agilent instruments and systems can be completed successfully by careful preparation and evaluation of the installation site and by ensuring the availability of appropriate utilities, consumables and supplies.

Customer Responsibilities

Customers should ensure that all necessary operating supplies for the successful installation of instruments and systems are available. Installation sites should be prepared in accordance with the following specifications.

Important Information

If you have problems in providing any of the following, contact your local Agilent office for assistance. Assistance with user-specific applications may be provided but should be contracted separately. Users of the instrument should be present throughout the installation and familiarization, otherwise important operational, maintenance and safety information may be missed.

Procedure Checklist

Minimum PC Hardware Requirements

- 1 GHz 32-bit (x86) processor (3 GHz for Windows Vista or Windows 7)
- 40 GB hard disk
- CD-ROM drive
- Super VGA display (1280x1024)

Minimum Memory Requirements

- 1 GB RAM for a single instrument configuration (2 GB with Microsoft® Windows® Vista or Windows 7)
- plus 256 MB for each additional instrument configured
- plus 256 MB RAM for each additional bath in a multi-bath dissolution system (G1118AA)

Software Requirements Operating System

- Microsoft Windows XP Professional 32-bit (SP 2 or 3), Windows Vista Professional 32-bit (SP 1 or 2), Windows 7 Professional 32-bit (SP 1), Windows Server 2003, or Windows Server 2008 32-bit (SP 1) operating system
