- Assignment of an IP address to the PC.
- Access the instrument with Internet Explorer.
Preparation of the 3100 OFFGEL Instrument

At the back of the instrument:

- Insert flash card to the instrument. (1)
- Insert USB stick. (2)
- Connect Cross-Over LAN cable. (3)
- Verify Configuration Switches: (4)
  - Switches N° 1 to 6 → down
  - Switches N° 7 and 8 → up
- Power the instrument on to apply this configuration.

**NOTE**

This configuration enables the default IP address of the Agilent 3100 OFFGEL fractionator

Assignment of an IP address to the PC

1. Plug Cross-Over LAN cable into the LAN connector of the PC.
2. Switch on the PC and Log on as administrator.
3. Click Start and select Control panel.
4 Under **Network and Internet** select **View network status and tasks**

5 Select and click with the right mouse button **Change adapter settings**

6 At **Local Area Connection** click **Properties** with the right mouse button.

7 In **Properties** select **Internet Protocol Version 4**.

8 Select **Use the following IP address**.

9 Enter the following information:
   - IP address: 192.168.254.10
   - Subnet mask: 255.255.255.0

10 Select **OK** to finish.

11 Close remaining windows.

**NOTE**

Your PC is now configured to operate within the same network address range as the Agilent 3100 OFFGEL fractionator.
Access the Instrument with Internet Explorer

1. Start Internet Explorer
2. Type IP address 192.168.254.11 into the address line.

NOTE
This address reflects the default IP address of the Agilent 3100 OFFGEL fractionator. It is different from the IP address of your PC.

Requirements and Specifications

The Instrument requires firmware B.06.30 or higher. Internet Explorer IE 7.0 and 8.0 support the web based user interface of the Agilent 3100 OFFGEL fractionator.

Network connection

To connect the Agilent 3100 OFFGEL fractionator to a local network request a static IP address from your administrator. Access the instrument first with the steps given above. Then set all supplied values under Config of the web-based User Interface, selecting Set. Power the instrument off and connect it to your local network with a standard LAN cable. Reconfigure the configuration switches to switch 7 up and all others down and restart the instrument. Your PC needs to be reconfigured to access the network and the instrument. For details refer to the 3100 OFFGEL user manual.

NOTE
Note down the initial Network configuration of the PC for your own reference.
