Warranty
The material contained in this document is provided “as is,” and is subject to being changed, without notice, in future editions. Further, to the maximum extent permitted by applicable law, Agilent disclaims all warranties, either express or implied, with regard to this manual and any information contained herein, including but not limited to the implied warranties of merchantability and fitness for a particular purpose. Agilent shall not be liable for errors or for incidental or consequential damages in connection with the furnishing, use, or performance of this document or of any information contained herein. Should Agilent and the user have a separate written agreement with warranty terms covering the material in this document that conflict with these terms, the warranty terms in the separate agreement shall control.

Technology Licenses
The hardware and/or software described in this document are furnished under a license and may be used or copied only in accordance with the terms of such license.

Restricted Rights Legend
If software is for use in the performance of a U.S. Government prime contract or subcontract, Software is delivered and licensed as “Commercial computer software” as defined in DFAR 252.227-7014 (June 1995), or as a “commercial item” as defined in FAR 2.101(a) or as “Restricted computer software” as defined in FAR 52.227-19 (June 1987) or any equivalent agency regulation or contract clause. Use, duplication or disclosure of Software is subject to Agilent Technologies’ standard commercial license terms, and non-DOD Departments and Agencies of the U.S. Government will receive no greater than Restricted Rights as defined in FAR 52.227-19(c)(1-2) (June 1987). U.S. Government users will receive no greater than Limited Rights as defined in FAR 52.227-14 (June 1987) or DFAR 252.227-7015 (b)(2) (November 1995), as applicable in any technical data.

Safety Notices

⚠️ A WARNING notice denotes a hazard. It calls attention to an operating procedure, practice, or the like, that, if not correctly performed or adhered to, could result in personal injury or death. Do not proceed beyond a WARNING notice until the indicated conditions are fully understood and met.

⚠️ A CAUTION notice denotes a hazard. It calls attention to an operating procedure, practice, or the like, that, if not correctly performed or adhered to, could result in damage to the product or loss of important data. Do not proceed beyond a CAUTION notice until the indicated conditions are fully understood and met.
G5584A Labware MiniHub Quick Guide

This guide contains the following topics:

- “About this guide” on page 2
- “Safety information” on page 2
- “Hardware components” on page 3
- “Indicator lights” on page 5
- “Turning on and turning off the Labware MiniHub” on page 6
- “Using Labware MiniHub Diagnostics in the VWorks software” on page 7
About this guide

This guide summarizes the operator instructions in the *G5584A Labware MiniHub User Guide*. This guide assumes the following:

- The G5584A Labware MiniHub is installed correctly. For installation instructions, see the *G5584A Labware MiniHub Safety and Installation Guide*.
- The device profile for the specific Labware MiniHub configuration is already created and the teachpoints are already set. For setup instructions, see the *G5584A Labware MiniHub User Guide*.
- You are familiar with the VWorks Automation Control software. See the *VWorks Automation Control Quick Start*. For detailed instructions, see the *VWorks Automation Control User Guide*.

If you are using another laboratory automation control software, see the user documentation for that software.

For user information about related automation products, you can search the product knowledge base or download the latest version of a PDF file from [www.agilent.com/chem/askb](http://www.agilent.com/chem/askb).

Safety information

Before you operate the G5584A Labware MiniHub, ensure you have read the following guides and are trained in the safe operation of the device.

- *Automation Solutions Products General Safety Guide*
- *G5584A Labware MiniHub Safety and Installation Guide*
Hardware components

The following figure and table describe the main components of the Labware MiniHub.

Figure  Main components: Integration Configuration (left) and BenchCel Configuration (right)

<table>
<thead>
<tr>
<th>Item</th>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Base</td>
<td>White structure at the bottom of the Labware MiniHub that attaches the device to the target surface. The base contains the electronics and hosts the connection panel and the status lights. For the BenchCel Configuration, the Labware MiniHub base attaches to an integration-plate assembly (iKit). Typically, the integration-plate is on risers, as the figure shows, for integration with the BenchCel device on risers. However, if the BenchCel device is not on risers, the Labware MiniHub cannot be on risers.</td>
</tr>
<tr>
<td>2</td>
<td>Shelves</td>
<td>Flat area on which you can place labware. Locating pins at the edges of the shelves hold the labware securely in place.</td>
</tr>
</tbody>
</table>
## Hardware components

<table>
<thead>
<tr>
<th>Item</th>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
</table>
| 3    | Spacers     | Metal spacing blocks that you can add to or remove the center rod of the Labware MiniHub to adjust the distance between shelves. Two types of spacers are available:  
  - 25.1-mm spacers. Stacked between shelves to accommodate different labware heights.  
  - 8.4-mm spacers. Stacked above the top-most shelf to fill the space between the top-most 25.1-mm spacer and the cassette cap. These spacers ensure a tight assembly and are only necessary when a subset of the shelves are used. |
| 4    | Cassettes   | Columns of shelves. The Labware MiniHub consists of four cassettes, each identified by the number on the cassette cap.                         |
| 5    | Cassette cap| Metal label with numerical identification of each cassette. The numbers are used in the VWorks software and in Labware MiniHub Diagnostics.       |
| 6    | Black knob  | Component at the top of the Labware MiniHub that locks the spacers and shelves in place.                                                   |
Indicator lights

On the base of the Labware MiniHub are two status lights, as the following figure shows.

*Figure*  Status lights on G5584A Labware MiniHub base (front view)

<table>
<thead>
<tr>
<th>Status light</th>
<th>Description</th>

<td>When you initialize the Labware MiniHub, the green light turns on.</td>
</tr>
</tbody>
</table>
Turning on and turning off the Labware MiniHub

The following procedures describe how to turn on and turn off the Labware MiniHub. For instructions on how to turn on and turn off a Labware MiniHub that is part of a workstation, see the workstation user documentation.

Turning on the G5584A Labware MiniHub

CAUTION The Labware MiniHub will rotate during the startup process. Obstructing the Labware MiniHub while it is rotating will cause an error.

To turn on the G5584A Labware MiniHub:

1 Ensure that the power supply is connected:
   a The power supply cable connects to the \(24V\) port (1) on the MiniHub base, as the following figure shows.
   b The power cord connects to the AC power entry on the (2) power supply on one end and to a (3) power source with grounded circuit on the other end.

2 On the power supply, press the power switch to the on (I) position.
   On the G5584A Labware MiniHub base, the green power light (\(\text{on}\)) turns on.

Turning off the G5584A Labware MiniHub

To turn off the G5584A Labware MiniHub:

On the power supply, press the power switch to the off (o) position. On the G5584A Labware MiniHub base, the green power light (\(\text{off}\)) turns off.
Using Labware MiniHub Diagnostics in the VWorks software

This topic explains how to control the Labware MiniHub using Diagnostics in the VWorks software.

About Labware MiniHub Diagnostics

The Labware MiniHub Diagnostics software has two tabs: Controls and Profiles. You use the commands in the Profiles tab to establish communication with the Labware MiniHub. You can use the commands and parameters available in the Controls tab to control or move the device.

FigureControls tab in Labware MiniHub Diagnostics

If you are using automation control software other than the VWorks software, call the Labware MiniHub ActiveX ShowDiagsDialog method to open Labware MiniHub Diagnostics. For details, see the G5584A Labware MiniHub User Guide.

Opening Labware MiniHub Diagnostics

In the VWorks software Devices area, select the Labware MiniHub name, and then click Device diagnostics.
Initializing the Labware MiniHub in Diagnostics

Before you use Labware MiniHub Diagnostics to operate the Labware MiniHub, you must initialize an appropriate MiniHub profile to do the following:

- Establish communication with the Labware MiniHub.
- Load the profile information.

**CAUTION** The Labware MiniHub will rotate during the initialization process. Obstructing the Labware MiniHub while it is rotating will cause an error.
To initialize a profile in Labware MiniHub Diagnostics:

1. In the Profiles tab, select the desired profile in the Profile name list.
2. Click Initialize this profile to establish communication with the Labware MiniHub and load the profile information.

Checking the MiniHub’s current position

To check the current position of the Labware MiniHub:

In the Controls tab, check the values in the Cassette and Position boxes.

- **Cassette.** Indicates which cassette is currently facing the robot. For example, a Cassette value of 3 indicates that cassette 3 is facing the robot. A dash (—) indicates that the Labware MiniHub is between cassette positions.
• **Position.** Indicates the position of the Labware MiniHub relative to its home position. Position values range from 0° to 360°, counterclockwise from the home position.

The Cassette values correspond to the following position values:

<table>
<thead>
<tr>
<th>Cassette</th>
<th>Position</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 (home)</td>
<td>0°</td>
</tr>
<tr>
<td>2</td>
<td>90°</td>
</tr>
<tr>
<td>3</td>
<td>180°</td>
</tr>
<tr>
<td>4</td>
<td>270°</td>
</tr>
</tbody>
</table>

If the Labware MiniHub is between cassette positions, other position values will be displayed. For example, if the Labware MiniHub is exactly between cassette 1 (0°) and cassette 2 (90°), the Position value is 45°.

---

**Enabling and disabling the motor**

Disabling the MiniHub motor allows you to rotate the Labware MiniHub by hand. You might want to do this when you:

- Set the home position.
- Want to remove labware from specific shelves after a run error occurs.

After setting the home position or fixing the error, you can enable the Labware MiniHub motor to resume operation.
**CAUTION** The Labware MiniHub might rotate slightly when you enable the motor. Obstructing the Labware MiniHub while it is rotating will cause an error.

To disable the Labware MiniHub motor:
In the **Controls** tab, click **Disable**. In the **Motor** area, the green **Enabled** light turns off.
On the Labware MiniHub base, the motor status light turns red.

*Figure* Motor area in the Controls tab

![Motor area in the Controls tab]

To enable the Labware MiniHub motor:
In the **Controls** tab, click **Enable**. In the **Motor** area, the green **Enabled** light turns on.
On the Labware MiniHub base, the motor status light turns green.

*Figure* Status lights on G5584A Labware MiniHub base (front view)

![Status lights on G5584A Labware MiniHub base (front view)]
Changing the rotation speed

You can select the speed at which the Labware MiniHub turns while you are making adjustments in Labware MiniHub Diagnostics. For example, you can select the Slow speed when you are setting up or troubleshooting the hub.

*Note:* To set the rotation speed for protocol runs, use the Speed selection in the Profiles tab.

**To select the diagnostic rotation speed:**

In the **Controls** tab, select one of the following speeds from the **Speed** list:

<table>
<thead>
<tr>
<th>Speed</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Slow</td>
<td>Rotates the MiniHub at 25% of the factory-set maximum speed.</td>
</tr>
<tr>
<td>Medium</td>
<td>Rotates the MiniHub at 50% of the factory-set maximum speed.</td>
</tr>
<tr>
<td>Fast</td>
<td>Rotates the MiniHub at 100% of the factory-set maximum speed.</td>
</tr>
</tbody>
</table>

Rotating the MiniHub to a specific position

You can rotate the Labware MiniHub using one of the following methods:

- Rotating to a specific cassette
- Rotating the MiniHub in set increments
- Rotating the MiniHub to a specific position relative to home

**CAUTION** Obstructing the Labware MiniHub while it is rotating will cause an error. Remove any obstacle that might prevent the Labware MiniHub from rotating.
Rotating to a specific cassette

You can rotate the Labware MiniHub so that the desired cassette is facing the robot.

To rotate to a specific cassette:

1. In the Controls tab, select the desired cassette from the Rotate to cassette list, and then click Rotate to cassette. The Labware MiniHub rotates until the desired cassette faces the robot. The Cassette and Position boxes display the current cassette and position.
Rotating the MiniHub in set increments

**To rotate the MiniHub in set increments:**

1. In the **Controls** tab, under **Movement**, click the arrow on the right of either **Jog** button, and then click the jog increment (degrees).
2. Click the **Jog** button to jog the Labware MiniHub in the corresponding direction.

<table>
<thead>
<tr>
<th>Command</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Jog counterclockwise</td>
<td>Rotates the MiniHub counterclockwise by the displayed degrees relative to its current position.</td>
</tr>
<tr>
<td>Jog clockwise</td>
<td>Rotates the MiniHub clockwise by the displayed degrees relative to its current position.</td>
</tr>
</tbody>
</table>

3. Click the **Jog counterclockwise** or **Jog clockwise** button again to rotate the MiniHub the specified number of degrees.
**Rotating the MiniHub to a specific position relative to home**

You can rotate the stage so that cassette 1 is at a specified number of degrees from the home position, 0°.

**To rotate the MiniHub a specific number of degrees:**

1. In the Controls tab, type the number of degrees in the Rotate to degree box, and then click Rotate to degree.

   If you specified an angle between 1° and 180°, the software will rotate the MiniHub clockwise. If you specified an angle greater 180°, the software will rotate the MiniHub counterclockwise.
Viewing the log area

The log area displays all of the commands issued and the status of the actions while you are working in the dialog box. Error conditions are displayed in red text.
