PFAS may enter soil.

Increasing attention of PFAS in foods

PFAS has infiltrated our food system too.

How food is contaminated with PFAS

Residuals are created during the wastewater treatment process.

PFAS in milk and infant formula

PFAS continue to be a problem

PFAS in Milk & Infant Formula

It can take four to 15 years for levels of PFAS to reduce by half in the human body. Over 99 percent of US residents have some variant of PFAS in their blood.

Methods to detect PFAS in milk and infant formula

Rapid, sensitive, and reliable analytical techniques are required for the monitoring of PFAS. To learn more about Agilent PFAS solutions visit: PFAS Testing in Water, PFAS Testing in Soil.
