Partner with Us

Partner with Precision

Agilent innovation, leadership, and collaboration ensure the highest-quality diagnostic assay, perfectly paired to your targeted treatment.

From clinical trials to global distribution, Agilent coordinates CDx development to **precisely align with partner needs**, driving precision medicine innovation to help enhance patient quality of life.

Agilent CDx partnerships can begin at any stage in the co-development process. Explore each stage below:

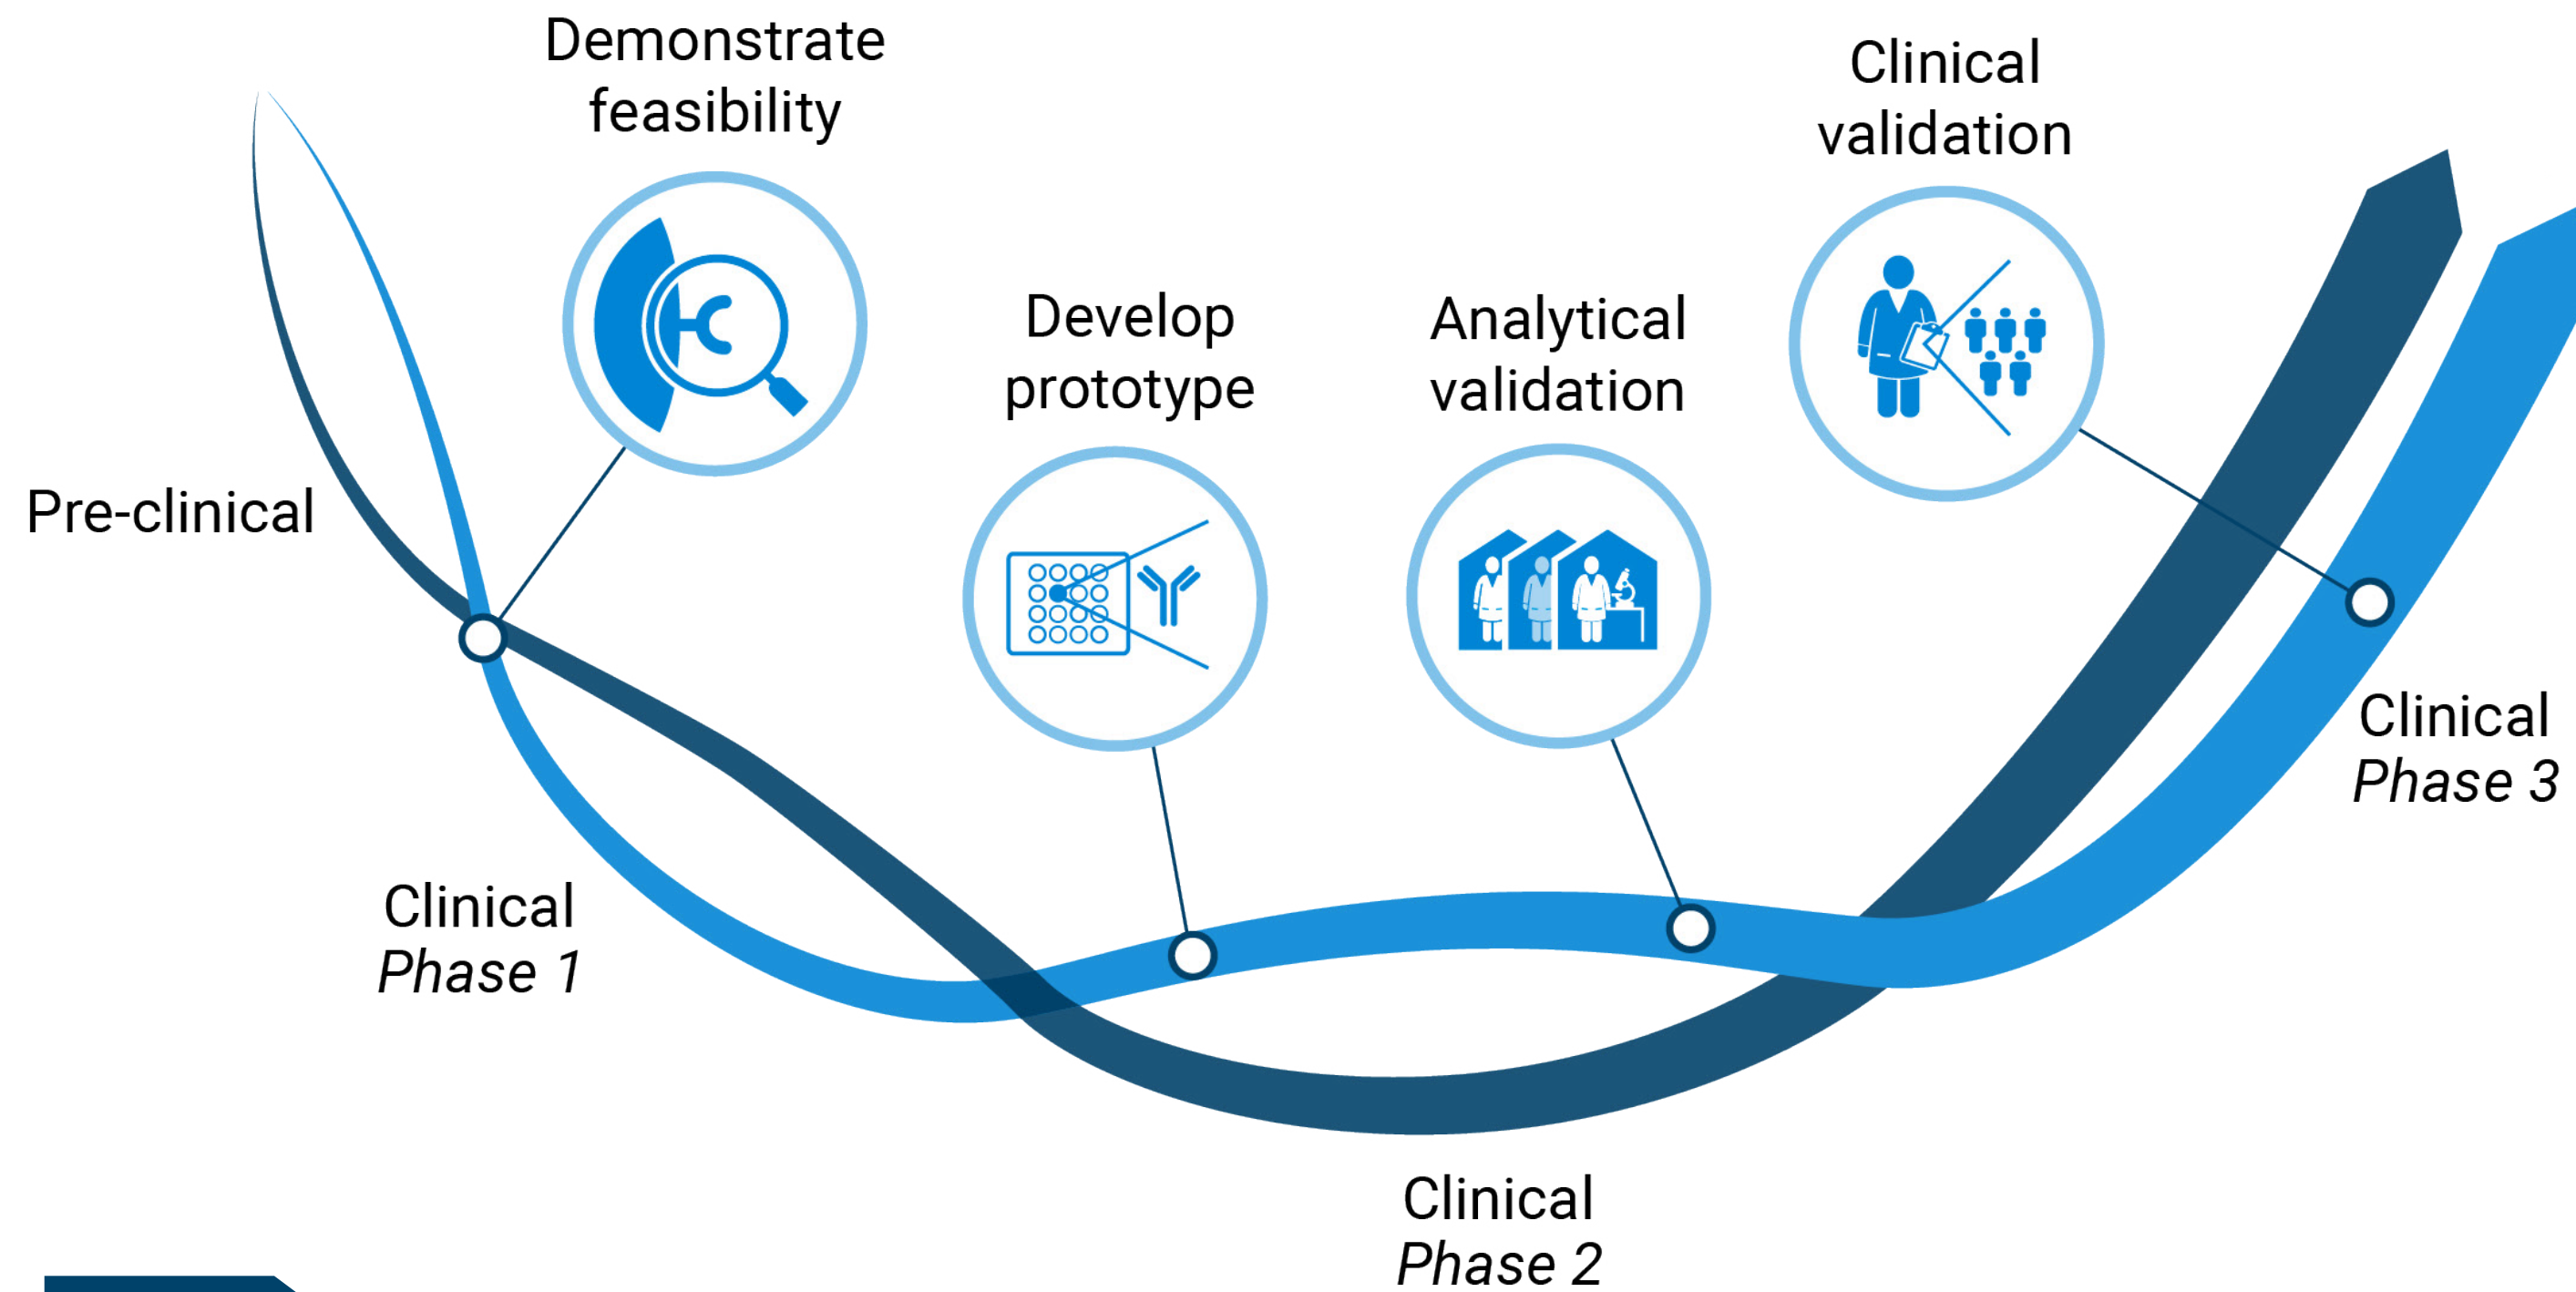

Identify the Ideal Companion

Landmark experience and cutting-edge innovation

come together to unlock the potential of targeted treatment, precisely pairing the right detection technology for each biomarker target.

Agilent CDx

Develop in Lockstep

Flexible diagnostic support

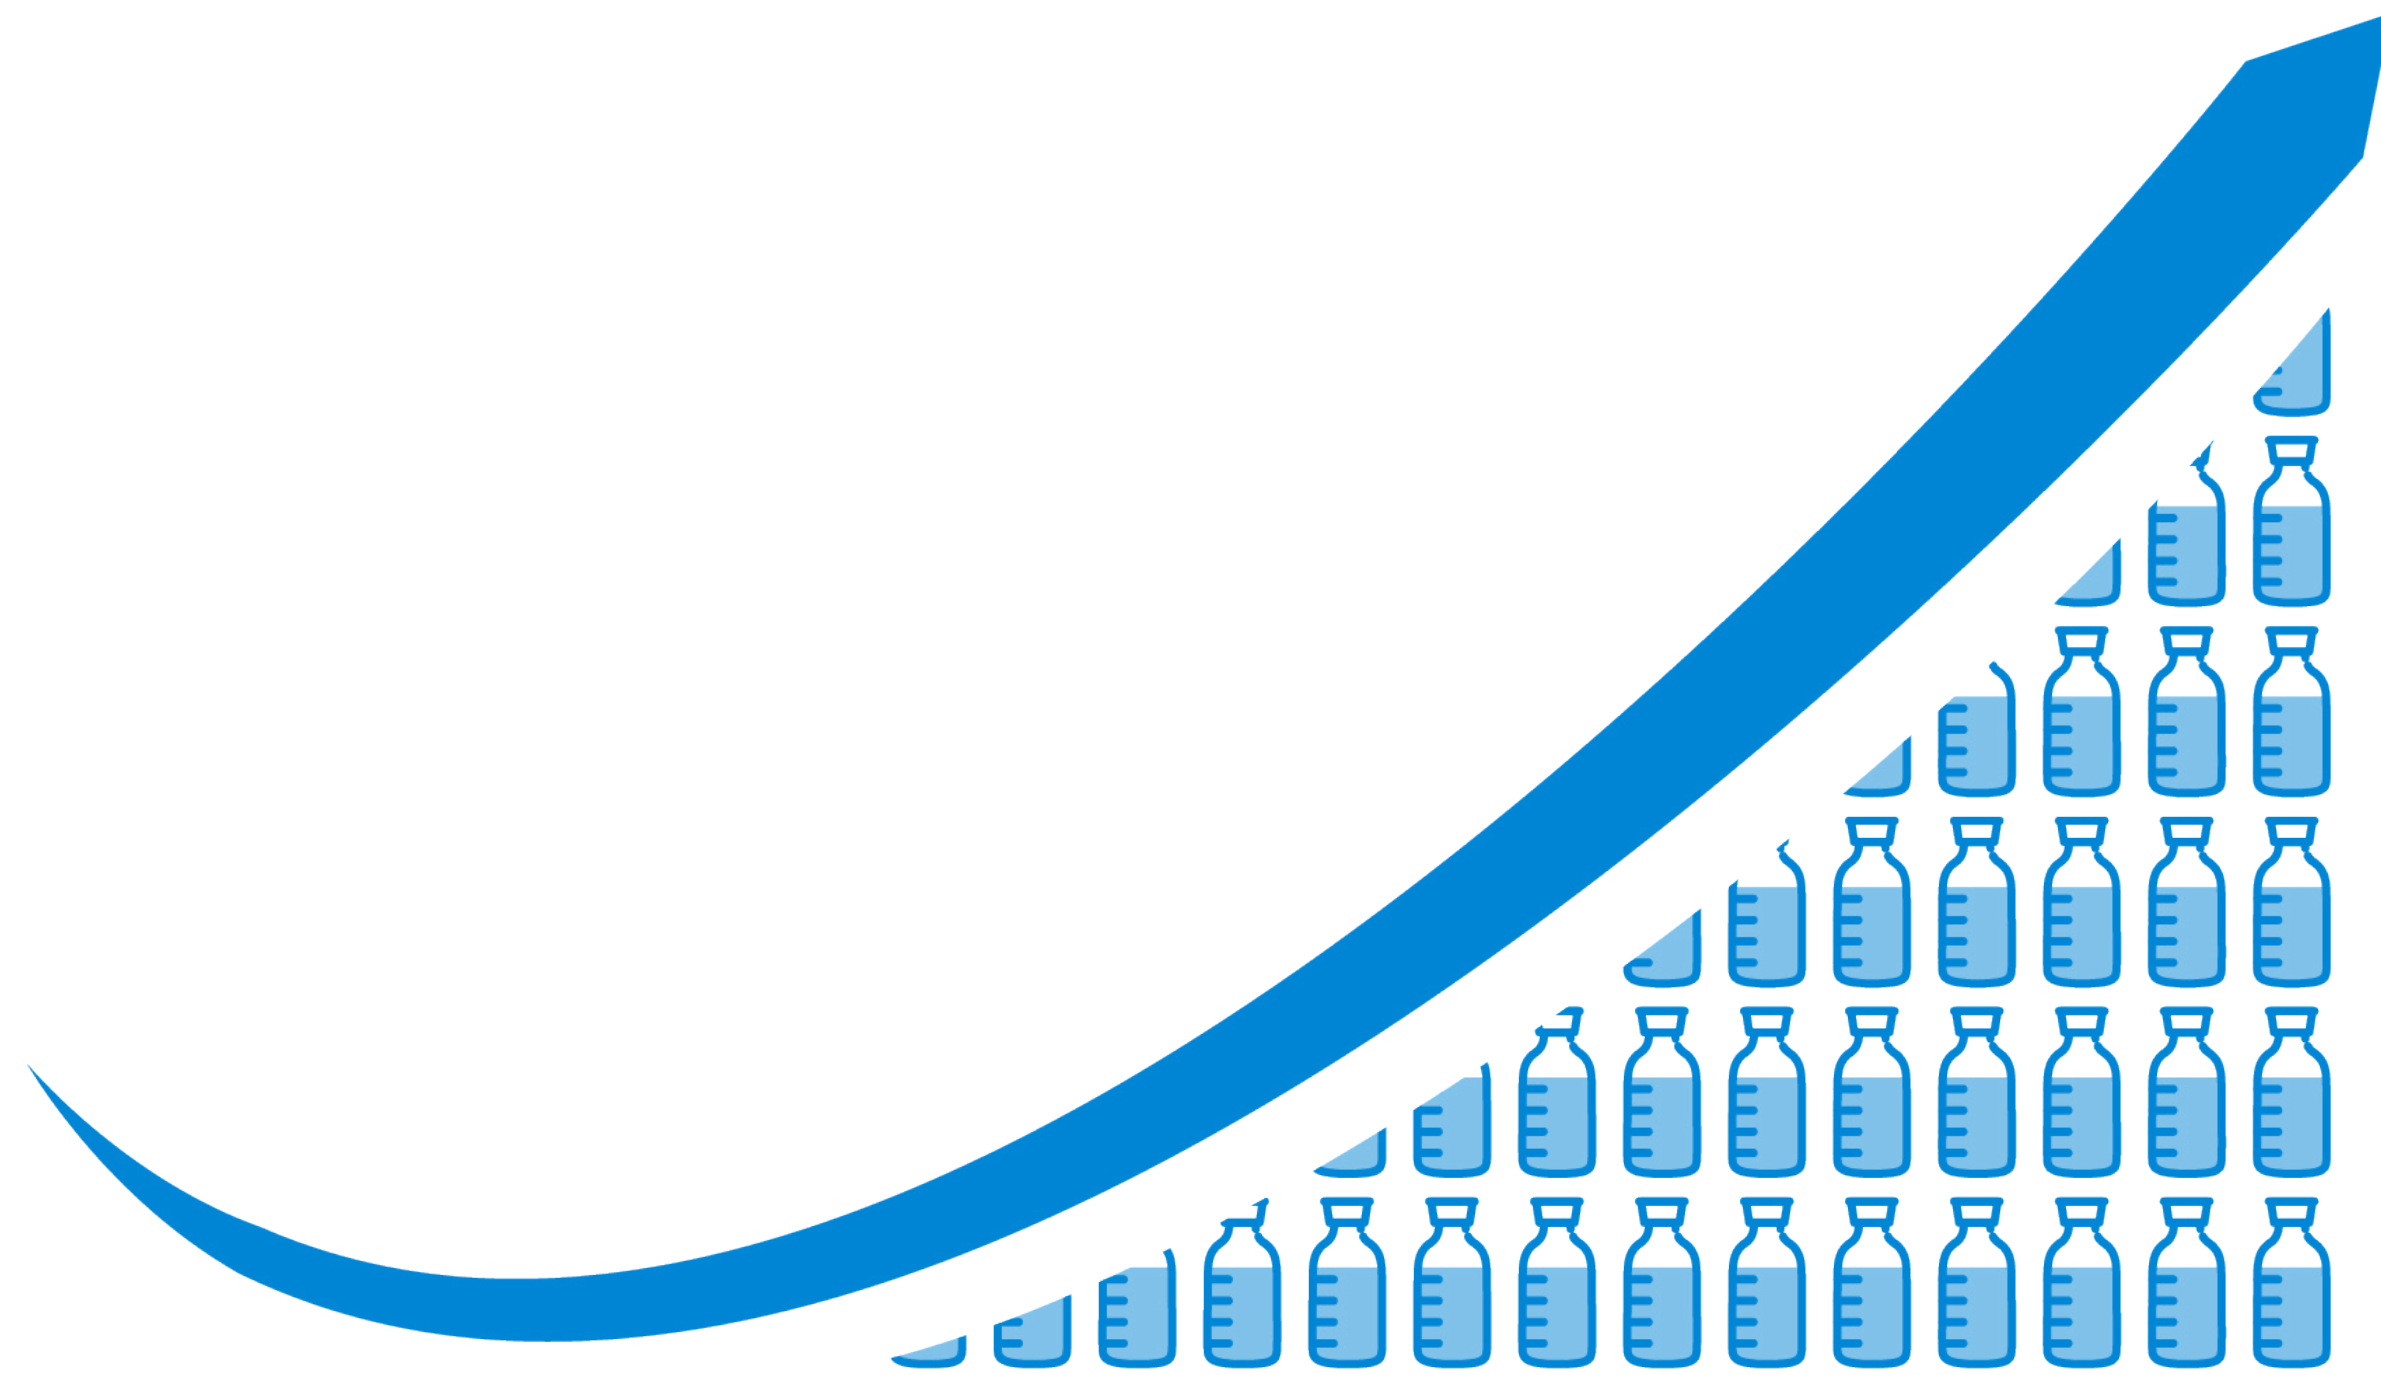

ensures a form-fitting co-development program that precisely complements unique drug development needs.

Deploy in Unison

Global regulatory expertise
in over 85 countries

guides a collaborative co-registration
process to ensure precisely coordinated
drug-diagnostic approval around the world.
Use the globe to explore a selection of
our regulatory relationships.

Deliver at Scale & Drive Broad Adoption

Robust manufacturing capabilities in Europe and the U.S. mean production can scale to meet customer demand, precisely when and where it's needed.

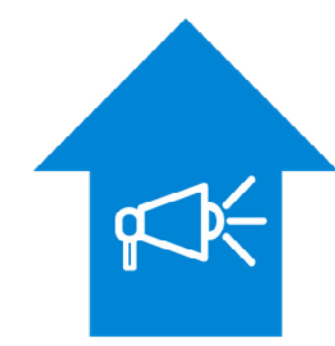

Coordinated commercialization efforts backed by a global reputation for CDx excellence ensure each therapeutic reaches the precise population it was designed to aid.
