

CERTIFICATE OF ANALYSIS

PRODUCT NAME: SIALIDASE S™ (His-tagged, recombinant from *Streptococcus pneumoniae* expressed in *E. coli*)

PRODUCT CODE: GK80021

LOT NUMBER: 163 004-1

FORMULATION: 20 mM Tris-HCl, 25 mM NaCl (pH 7.5) upon reconstitution as indicated

RECONSTITUTION: Dissolve the lyophilizate in 790 µl of ultrapure water to obtain the described formulation.

SUGGESTIONS FOR USE: Up to ~1 nanomole of substrate can be cleaved in a 20 µl reaction volume. In the standard reaction use: 4 µl of 5x Reaction Buffer B, substrate and water in a combined volume of 14 µl, and 2 µl of Sialidase S. Incubate for one hour at 37°C. To cleave more than one nanomole of substrate, increase the reaction volume and enzyme proportionally. Difficult substrates may require optimization to find the correct amount of Sialidase S to add.

STORAGE: -20°C until redissolved. Store redissolved enzyme at 2 – 8°C for up to 2 months.

PACK SIZE: 3 Units (equivalent to 1 Unit of previous product GK80020)

COMPONENTS

Component	Quantity/Pack	Lot No.	Exp. Date
GK80021 Sialidase S (3 Units)	1 each	163 004	Jan 2019
WS0049 5x Reaction Buffer (1 ml) [250 mM Sodium Phosphate, pH 6.0]	1 each	W160225	Sep 2020

QUALITY CONTROL:

1) Enzyme Specific Activity ¹ :	Pass	(Specification: ≥ 30 U/mg)
2) Protease Assay ² :	Pass	(Specification: "Not Detectable")
3) Contaminants ³	Pass	(Specification: $\leq 0.001\%$)

Authorized Signature

1. One unit is defined as the amount of enzyme required to catalyze the release of 1 μ mole of p-nitrophenol from pNP- α -d-N-acetylneuraminic acid per minute at pH 5.5 and 37°C.
2. No protease activity was detectable after incubation of the enzyme with 0.2 mg resorufin-labeled casein for ~18 hours at 37°C based on Schickaneder E, Hösel W, von der Eltz H, Geuß U. Casein-resorufin, a new substrate for a highly sensitive protease assay. Fresenius Z. Anal Chem. 1988 330:360.
3. The absence of exoglycosidase contaminants was confirmed by extended incubations with the corresponding pNP-glycosides: α -fucosidase, β -fucosidase, α -mannosidase, β -mannosidase, β -N-acetylhexosaminidase, α -N-acetylgalactosaminidase, α -galactosidase, β -galactosidase, α -glucosidase, β -glucosidase and β -xylosidase.
