

Agilent DS 40M Rotary Vane Pump

Data-Sheet

The DS 40M is the new 2m³/h Agilent Rotary Vane Pump with magnetic coupling that makes the pump oil-leak free.

Designed for very low noise - the lowest on the market for this size - and for low power consumption, DS40M is ideal for use in Labs.

Thanks to its small dimensions the pump can retrofit any competitor's pump of the same size.

The DS 40M is the pump of choice for use on GC-MS instruments, Leak Detectors and Turbo Pumping Systems.
