

Agilent Removable Cold Probe Accessory

Data Sheet

Key Benefits

- **Productivity**—The cold probe accessory enables you to quickly and safely change probes. Allows multi-use of the magnet by accommodating both cold and ambient temperature probes.
- **Ease-of-use**—Easily remove and park Cold Probes to enable the use of other probes. A parked Cold Probe is connected to the Agilent V7700 Cryogenic Cooling System so that it can be rapidly put back into the magnet and returned to running NMR experiments.
- **Versatility**—The accessory is compatible with the entire Cold Probe product line including Salt Tolerant, MicroSample, TripleResonance, DoubleResonance, and XSens Cold Probes. Most new and legacy magnets are supported with the Removable Cold Probe Accessory.*

* Contact your Agilent NMR Sales Representative regarding site and system requirements.
