

NHS-35 Oil Diffusion Pump

Download 3d drawings [here](#).

The Agilent NHS-35 oil diffusion pump provides high throughput and high pumping speed of 28,000 L/s. With its fully optimized vapor jet, robust boiler design, and thermal protection switches, the pump will run without any maintenance for many years. This pump includes a standard sight glass and fill and drain assembly. It is available with a 35 in. ASA or DN 1000 ISO-F (bolted) inlet flange.

This diffusion pump is a perfect fit for industrial applications such as vacuum furnace, heat treatment, metallizing, and coating processes for optical lenses, electronics, and protective film layers.
