The Measure of Confidence

Agilent Technologies

7696A Sample Prep WorkBench. A proven formula for savings.

Sample prep automation with the 7696A Sample Prep WorkBench can save you a significant amount of time and money. And if you're not entirely sure, Agilent can show you the numbers.

Versatile as well as powerful, the 7696A Sample Prep WorkBench can be used with virtually any LC or GC analytical technique, and will reduce the time, the cost and tedium of manual sample preparation. You can save by lowering your consumption of solvents, reagents, and glassware, and by spending less on disposal. Even better, lab technicians can be freed up to perform other tasks, helping to increase your overall productivity.

What does it all add up to? Our Cost Benefit Calculator can show you, including how quickly payback can transition to savings. Find out more including literature, an informative video, and for a limited time, a special offer that makes the 7696A Sample Prep WorkBench an even greater value.
