## Inject extra productivity into your gas chromatography!

Agilent 7693A Automatic Liquid Sampler

Whether you're analyzing hundreds of samples or just a few, the all-new Agilent 7693A Automatic Liquid Sampler will boost your lab's productivity. A redesign of the most popular GC autosampler ever, the all-new system includes proprietary Agilent fast-injection and enhanced capacity—plus a full range of time-saving injection programming and automated sample prep capabilities.

### Enhanced performance

- Exclusive dual simultaneous injection doubles sample throughput
- Agilent fast-injection minimizes needle discrimination, ensures optimum peak shape and maximum accuracy

### Unmatched Flexibility

- Modular design works seamlessly with your current Agilent benchtop GC and lets you easily add capacity to meet any requirement
- Enhanced injection programming and automated sample prep capabilities—including versatile new Heater/Mixer/Bar Code Reader

### Maximum Uptime

- Self-aligning injector mounts in seconds without tools and can be easily removed for inlet maintenance or moved between inlets or GCs
- Expanded solvent capacity and ability to load up to 150 samples for longer walk-away operation

## Limited time offer— act now!

Get a great introductory price on our greatest sample introduction system ever.

## Save 20%!
