CARY 7000 UMS FOR OPTICS AND COATINGS

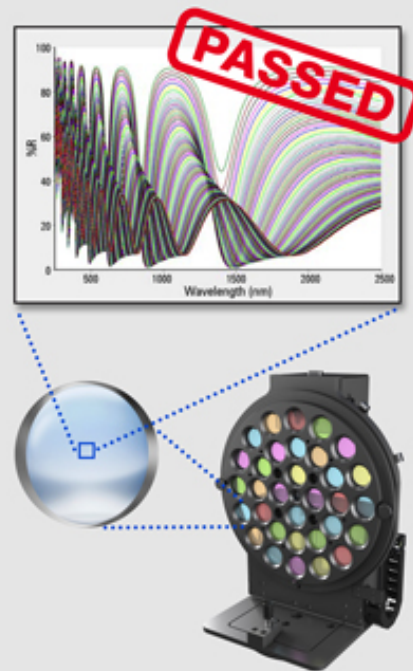

NOW WITH AUTOSAMPLING

A first in optics and coatings analysis.

The Agilent Cary 7000 Universal Measurement Spectrophotometer (UMS) revolutionized solid sample measurement. And now, with the new Solids Autosampler, the Cary 7000 UMS has become the world's most advanced solution for optics and coatings analysis, offering key benefits to speed your QA/QC workflow:

- **Gain deeper insights** by measuring multi-angle, absolute reflection and transmission without moving the sample.
- **Further increase productivity** and expand production capacity by measuring up to 32 samples in a single automated run.
- **Improve quality** of end product and increase yield by testing more samples in less time.
- **Profile large samples** (up to 8-inch) for coating uniformity at spatial resolution down to 2 mm x 2 mm.

[See how](#) the Cary 7000 UMS/UMA is uniquely equipped to expedite optics and coatings QA/QC and development.

LIVE WEBINAR WITH INDUSTRY EXPERTS:

A New Frontier in Optics & Coatings, Hosted by *Materials Today*

Join leading experts in thin film coating and design, along with our own Cary 7000 UMS specialist, to explore advances and high-volume QA/QC now

possible with the new Solids Autosampler

OPTICS AND COATINGS ANALYSIS INFO KIT:

Find out how the Cary 7000 UMS can advance your:

- QA/QC optics quality
- Multi-sample productivity
- Wafer profiling and characterization
- Coating uniformity

possible with the new G6800 Autosampler.
