Agilent 720/725 ICP-OES. The best of breed is now even faster, more agile.

Experience a higher level of ICP-OES performance with accelerated run times, lower operational costs, and proven reliability that's delivered more than one million sample runs on a single instrument. Key features of the Agilent 720/725 ICP-OES include:

- **New sealed CCD detector** requires no purging, resulting in lower gas usage and operating costs.
- **New SVS 2 switching valve system** reduces sample-to-sample cycle times for far greater productivity.
- **New Multi-mode Sample Introduction System (MSIS)** performs simultaneous measurement of hydride and non-hydride elements to sub-ppb detection limits.

Find out how the Agilent 720/725 ICP-OES can boost productivity and reduce costs more than ever before.
