# RUN ON AIR

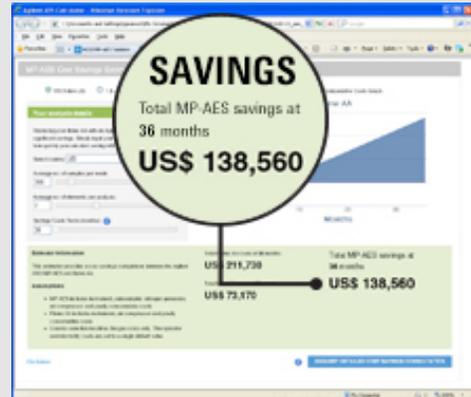

## WITH THE REVOLUTIONARY 4100 MP-AES

Do you know how much you spend on instrument grade gases each year? Probably much more than you think.

The Agilent 4100 Microwave Plasma-Atomic Emission Spectrometer (MP-AES) is the most significant advancement in atomic spectroscopy in decades. It runs entirely on air, eliminating flammable and expensive gases. But that's just the beginning.

Because the Agilent 4100 MP-AES runs using only air it improves safety, vastly reduces cost of ownership, and eliminates the need for ongoing supply of flammable or expensive gases. Use the Agilent Cost Savings Estimator to find out exactly how much your laboratory can save.

**Start saving:** Use the MP-AES Cost Savings Estimator to find out how much your lab can save by switching to MP-AES.
