

You count on Agilent to service your critical systems—

Now extend that service to the non-Agilent modules connected to them

You already know the benefits of an Agilent Advantage Service plan to repair and maintain your high-performance systems. But how can you manage service for the non-Agilent modules connected to them? A smart and simple solution is to add module service to your Agilent Advantage contract.

Agilent Advantage Service supports modules from five key OEMs such as:

- Gerstel
- CTC
- Markes
- Dynatherm
- OI

And others!

Why add these modules to your Agilent Advantage contract instead of relying on per-incident repairs?

Keep your budget in check and your productivity high.

- **Certainty:** By knowing your costs up front, you eliminate unpleasant surprises.
- **Uptime:** With preferred response and on-site service, your equipment is down for the shortest period possible.
- **Savings:** Pricing for unpredictable per-incident repairs can run 30% more than a contract.
- **Longevity:** Regular maintenance keeps your modules running better and longer.

Why choose just one company to service systems and modules?

Simplify service with an all-in-one solution for Agilent and non-Agilent equipment.

- **Coverage:** In addition to servicing both Agilent and non-Agilent systems (with our Multi-Vendor Service), we cover modules from Gerstel, CTC, Markes, Dynatherm and OI and others.
- **Ease:** Covering your entire unit with one service package reduces the number of vendors and purchase orders you need to manage.
- **Capability:** Agilent partners with the OEM's engineers to service modules, so you know repairs and maintenance will be performed to the highest standards.

Don't settle for less for your modules than you do for your systems.

Call your Agilent representative now to learn more about Agilent Advantage coverage for your non-Agilent modules.
