Agilent's Reagent Rental Program

Quality Data from a Flexible Array Platform

Key Features

- Move to an Agilent microarray platform or upgrade an existing scanner without purchasing capital equipment
- Supported applications include arrays for gene expression, miRNAs and other noncoding RNAs, CGH/CNV, ChIP-on-chip, and DNA methylation
- Trust that your data is reproducible and accurate by using Agilent's complete platform

Agilent's reagent rental program offers an affordable solution for microarray analysis using our complete platform. By agreeing to buy a sufficient volume of microarrays over the course of a specified time period, Agilent will loan its hardware, including the scanner, hybridization oven, chambers, and software licenses. Labs with budget limitations and those looking to switch platforms can benefit from this special offer.

- Purchase minimum array volumes over a mutually agreed upon schedule
- In return, Agilent will install hardware on-site for the duration of the contract
- On-site setup, service, and maintenance included
