

Quiet That Loud Rough Pump Once and for All

Agilent Quiet Covers for GC/MS, ICP-MS, and LC/MS systems

Tranquility can be hard to come by while your noisy rough pump is running. But with a high-quality Agilent Quiet Cover, you and your pump can coexist peacefully with:

- *Reliable noise control.* Sound-absorbing cabinet with resistant foam insulation effectively reduces pump noise, while cushioned mounts minimize vibration.
- *Less risk of pump overheating.* Integrated fans maintain temperatures inside the cover; if the temperature exceeds 35 °C, an alarm will sound.
- *Easier pump maintenance.* A built-in kickstand, no-mess drip pan, and lift-and-tilt kickstand simplify oil changes and other routine tasks. In addition, a sectioned cover gives you fast pump access without tools.
- *Confident operation.* Each cover is protected by Agilent's standard one-year warranty. Installation and familiarization are included with new instrument orders.

How quiet is quiet?
