

QUANTIFY WITH CONFIDENCE

The Measure of Confidence

Future Proof Your Investment with the Agilent 6400 Triple Quadrupole

Now is the time to bring the benefits of triple quadrupole detection to your lab with the Agilent 6400 triple quadrupole series—three LC/MS instruments that deliver robust and reliable sensitivity and value, with the software tools for routine performance in the busiest labs:

- **Agilent 6420 Triple Quad:**
Economical and easy to use; integrates with the Agilent 1260 Infinity LC system to provide a proven platform for general analytical quantitation
- **Agilent 6430 Triple Quad:**
Offers added sensitivity to support more challenging assays
- **Agilent 6460 Triple Quad:**
Features Agilent Jet Stream Technology, providing enhanced sensitivity for your most demanding quantitative applications

Explore the capabilities of the Agilent 6400 QQQ series—the only field-upgradeable platform available that brings you the triple quad performance you need, today and in the future.

Agilent Technologies

No matter which instrument you choose, top-level performance is a simple and affordable step away. Available field upgrades ensure that the performance of your 6400 series instrument can grow with your evolving needs.

6420 to 6430 upgrade (G2573B) offers:

- Enhanced trace level sensitivity
- Compatibility with further upgrade to Agilent Jet Stream Technology
- Outstanding performance for most quantitative assays

6430 to 6460 upgrade (G2573C) offers:

- Ultra-trace sensitivity with Agilent Jet Stream Technology
- Extended mass range for peptide and large molecule quantitation
- More flexibility for a wide range of applications
