

# The Time Has Come

## To Refresh Your Agilent Seahorse XF Technology

### Do not miss out on this exciting trade-in opportunity!

Over 10 years ago, the world was introduced to the Seahorse Extracellular Flux Analyzer. This instrument soon became a gold standard for mitochondrial research, and enabled advancement of the field of cellular metabolism. Since then, we have been making significant improvements to the platform. As such, it is time to move forward to the latest technology for live-cell metabolism measurements.

Feature	Benefit
<b>Single-spot sensor design</b>	Improved ECAR sensitivity, wider dynamic range
<b>Wave controller software</b>	Design, measure, and analyze in a fraction of the time
<b>Upgrade to 96-well</b>	Less sample required, test more conditions per plate
<b>Lower running costs</b>	Spend less on consumables and service
<b>Supports newest assays and tools</b>	Enables a wider variety of applications
<b>Cutting-edge touchscreen controller running Windows 10 and packed with memory</b>	Faster, more responsive touch experience; supports security & networking needs
