Sei stanco di gestire l'inefficienza dei processi di gestione delle risorse condivise? Con iLab Operations Software avrai a portata di mano intuitivi strumenti online per la gestione di core facility.

Scegli una piattaforma condivisa che permetta alla tua organizzazione di ottenere il massimo vantaggio investendo nelle attività essenziali.

iLab Operations Software, che costituisce parte integrante della linea Agilent CrossLab, è un software di gestione aziendale su base web progettato per sostenere le attività dei laboratori centralizzati e le risorse di ricerca condivise. Gli strumenti di gestione della ricerca integrati in iLab Operations Software consentono a un’organizzazione di:

- semplificare la creazione di report e migliorare la trasparenza relativa all’uso degli strumenti sull’utilizzo delle apparecchiature, definire il budget e formulare previsioni
- migliorare la conformità alle normative e creare una traccia per le revisioni contabili di approvazione di preventivi, servizi erogati e fatturazione
- accorciare i cicli di fatturazione e aumentare il recharge capture
- migliorare la consapevolezza delle risorse disponibili

Inoltre, iLab Operations Software fornisce moduli avanzati per il supporto di flussi di lavoro scientifici specifici come invio di campioni, gestione magazzini, studi sui pazienti, blocco di strumenti e altro.

Per maggiori informazioni o per richiedere una dimostrazione GRATUITA visita il sito web www.agilent.com/chem/ilab
Più di 170 organizzazioni gestiscono le proprie core facility con iLab Operations Software
