

Upgrade to the latest technology smoothly, quickly, and cost effectively.

CrossLab Technology Refresh Services

Don't let fear of the unknown keep you from upgrading your technology

New lab equipment represents an important investment—and you want your staff to get the highest possible productivity from that investment.

You can trust Agilent CrossLab to help avoid the pitfalls of time-consuming and mistake-prone self-installation. The Agilent experts who designed your system can help ensure:

- Rapid, seamless migration of methods, data, and reporting workflows
- Software and system compliance
- Education on new system for peak lab operation efficiency
- Enhanced productivity and more efficient resource use

Choose your level of support

Various levels of upgrade services are available, ranging from simply making your systems compliant to the latest operating systems... to adding new capabilities that can make your lab more competitive than ever.

From Insight to Outcome

Success story: Chemical manufacturer moves lab into the future

The Louisville Works facility of E.I. DuPont needed to transition their existing Agilent ChemStation to OpenLAB CDS software. Here's what one chemist had to say about Agilent's upgrade of their lab:

"Agilent has supported us very well throughout our migration; especially during a local electrical brownout, which completely disrupted operations. Agilent personnel went above and beyond to ensure that we were up and running again in record time."

Danielle Vereen
Analytical Chemist, DuPont

Take the path to a more productive future.
