

# CROSSLAB ENTERPRISE PROGRAM LABORATORY OPERATIONAL EXCELLENCE SERVICES

Examine. Collaborate. Elevate.

## Efficiency by design

Agilent CrossLab applies lean philosophy and tools to bring you new insights to drive scientific and economic outcomes.

Laboratory productivity can be a challenge when scientists spend a significant amount of their time on non-value-added tasks such as excessive paperwork, waiting for results, maintaining instruments, and walking from one station to another due to poor lab layout.

Lean Six-Sigma processes standardize and speed up common everyday tasks, making it easier for scientists to focus on researching and preserving the innovative spirit that drives progress within your industry.

Our consultants have hands-on practical experience in laboratory environments that can help you achieve your strategic goals. By working with you to identify problematic areas across lab workflows, instrumentation, automation, maintenance services, staffing, lab IT, and informatics systems, we can help you achieve operational excellence.

Our Lean Six-Sigma experts evaluate each individual problem area by looking at end-to-end processes to identify the problem's root cause and collaborate with client teams to test and implement improvements. They fundamentally rethink everything from laboratory design improvements to asset utilization, inventory levels, cycle time, and quality—combining their insights with data analytics to reduce errors and process variations.

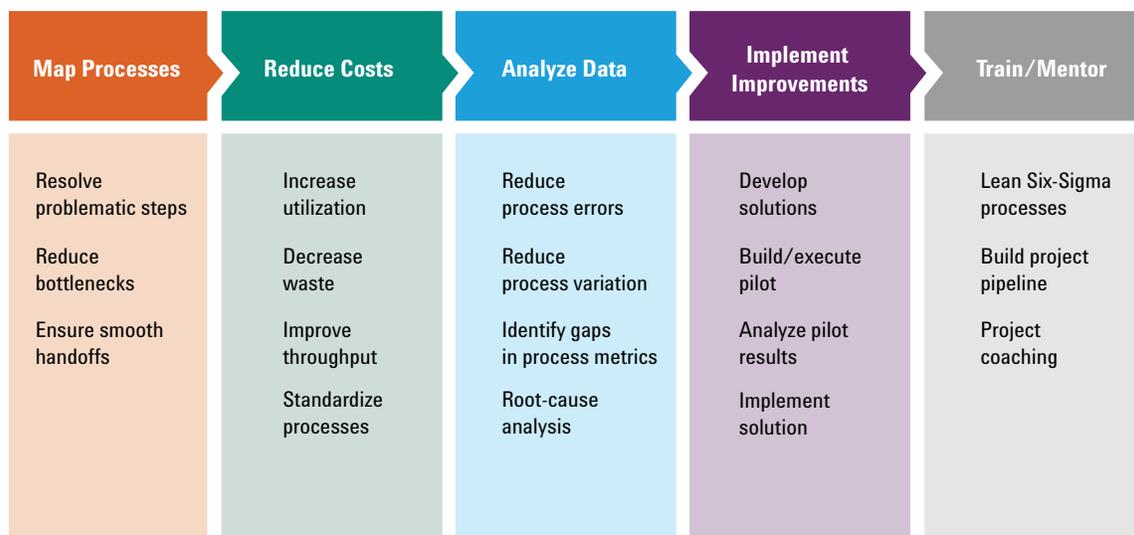

- Increased Throughput
- Improved Utilization
- Reduced Inventory
- Standardized Processes
- Reduced Total Cost of Ownership

Agilent  
**CrossLab**

From Insight to Outcome

## Working collaboratively with your teams

## Flexible services that align to your needs

- **Introductory Seminar**  
Learn about Agilent CrossLab. Experts will present the Lean Six-Sigma methodologies and tools used to eliminate inefficiencies and how this can help you achieve your organization's strategic goals.
- **Assessment Observation**  
Agilent CrossLab Lean Six-Sigma experts will perform a high-level assessment of any part(s) of your facility and identify areas for improvement.
- **Improvement Project**  
Agilent CrossLab Lean Six-Sigma experts will take a deep dive into improvement areas identified during the assessment observation or by your organization. The goal is to identify root cause and gather data that lead to improvement recommendations.
- **Implementation of Improvements**  
Agilent CrossLab Lean Six-Sigma experts will coordinate an implementation plan based on recommendations in collaboration with your team.
- **Lean Facility Project**  
Agilent CrossLab Lean Six-Sigma experts will train and mentor your teams to utilize basic Lean Six-Sigma principles, tools, and methodologies for project execution.

### Serving laboratories worldwide

For more than 50 years, Agilent has pioneered technologies and techniques that define how analysis is performed in laboratories today. Beyond its industry-leading analytical instruments, consumables, workflow solutions, and software, Agilent also provides CrossLab Enterprise Services and supplies to ensure success and help you achieve overall laboratory operational excellence.
