

You can't afford to be without Agilent service coverage for your LC.

Take advantage of solutions that help you control costs, protect your investment and optimize lab productivity.

Control costs.

Save up to 42% (and possibly even more) with an Agilent Advantage service plan for your LC system.

Instrument downtime is expensive. Should your LC system require service, your budget is exposed to pricey time-and-materials (T&M) service, and you face the cost of lost productivity. To control the expense of instrument ownership, Agilent offers a variety of service plans that keep your system up and running while you:

- **Save with a fixed price**, no matter how many service calls or repair parts are required
- **Reduce costly instrument downtime** with preferred response that gives you priority over T&M calls
- **Right-size your coverage** by tracking instrument usage with Remove Advisor and selecting the optimal level of service for each system in your lab

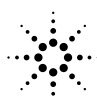

Compare the costs to see how much an Agilent Service Agreement can save you.

The chart below shows the price of a T&M service visit for just one repair versus the list price of an Agilent Advantage Silver Service Agreement. If you need service more than once, your savings increase greatly.

1200 Series LC Service Visit Example: Transport Arm Assembly Replacement

	Cost (USD)	Savings (%)
One on-site repair call (including parts, labor and travel)	\$6,881	
One planned maintenance (including parts, labor and travel)	\$2,184	
TOTAL T&M COST	\$9,065	
Agilent Advantage Silver (1200 LC)	\$5,220	
YOU SAVE	\$3,845	42%
Add one Operational Qualification (1200 LC)	\$2,364	
TOTAL T&M COST	\$11,429	
Agilent Advantage Silver w/ Operational Qualification (1200 LC)	\$7,164	
YOU SAVE	\$4,265	37%

Our measure is your success.

Protect your instrument investment.

You depend on your instruments. As a critical part of your laboratory workflows, your Agilent LC system must be kept in top condition to deliver sensitive and reliable analyses, today and in the years to come. When you choose Agilent Advantage service coverage, including preventive maintenance, you'll gain unmatched confidence in your analytical results while you also:

- **Reduce instrument failures** by up to 25%, by finding and resolving problems that could impact system performance before they occur
- **Prevent performance degradation** by periodically replacing wear-and-tear items and tuning your system for consistent, reliable results
- **Stay compliant with industry regulations** with regular service designed to keep systems operating to specifications
- **Extend the life of your system** with scheduled maintenance provided by factory-trained professionals who use only genuine Agilent procedures and parts

Optimize your productivity.

Your productivity depends on workflow efficiency. Assuring the highest return from each of your analytical instruments is vital to increase lab throughput and meet productivity targets. When you choose Agilent Advantage coverage for your LC, you'll have access to Remote Advisor, our premier remote monitoring and diagnostics technology. This will enable you to:

- **Accelerate troubleshooting and problem resolution** with proactive support and advanced remote diagnostics
- **Prevent instrument downtime** with e-mail or text alerts that notify you when your system needs attention – even before problems occur
- **Unlock the full potential of your Agilent systems** with on-demand usage reports that help you optimize equipment use and lab throughput
