

HOW CLEAN IS YOUR WATER?

Agilent SureTarget GC/MS Water Pollutants Screener

Routine qualitative screening in minutes

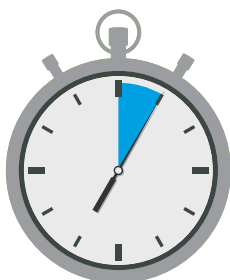

Agilent's **SureTarget GC/MS Water Pollutants Screener** confidently identifies pollutants in water samples using an automated workflow, reducing data analysis time by over 90%.

Rapidly perform screening of over 1000 pollutants in water samples with minimal data processing time and fast report generation.

Does your laboratory really have the time for excessive manual data review?

Manual Workflow

SureTarget Workflow

Features of the Agilent SureTarget GC/MS Water Pollutants Screener include:

- Accelerate data review with the new SureTarget workflow
- Confidently identify over 1000 water pollutants using the included database with retention times and spectra
- Get comparable results, run-to-run and between laboratories, using provided Retention Time Locked (RTL) methods
- Simplify reporting with user-friendly templates
- Expand the workflow to unknowns by adding the NIST library
- Factory-tested, pre-configured analyzers that are optimized for GC and MS methods—no acquisition method development required

Agilent Technologies

Routine Qualitative Screening in Minutes

MassHunter SureTarget workflow verifies your hits by removing background interferences, matching mass spectra with the included water pollutants library, and look for alternate peaks in the chromatograph and alternative mass spectra hits in NIST—all with a single mouse-click.

Analyze Batch

One click saves 90% of analyst time

A stack of several SureTarget analysis reports, showing columns for retention time, mass, and identification results.

Ordering information:

To order the Agilent SureTarget GC/MS Water Pollutants Screener, select M7462AA along with an Agilent 5977B Single Quadrupole GC/MS and Agilent 7890B GC.

Put your lab on the productivity *fast track*.
