Questions to ask before buying a pre-owned instrument

Don't compromise on quality—make sure you can answer “yes” to these questions:

- ☐ Does the seller have a reputation for quality?
- ☐ Has all equipment been refurbished by the Original Equipment Manufacturer (OEM)?
- ☐ Have all wearable parts—including parts that may have touched a sample—been replaced or thoroughly cleaned?
- ☐ Did the instrument pass an inspection based on manufacturer specifications before resale?
- ☐ Have performance and firmware upgrades been applied, according to service notes?
- ☐ Does the purchase price include a warranty—and if so, what are the terms?
- ☐ Will the required start-up parts—like columns, consumables, or supplies—be included?
- ☐ Is the latest operational software version included with your purchase?
- ☐ Are installation and training available, or included in the purchase price?
- ☐ Are OEM service and repair plans available that will keep the instrument running at peak performance?
- ☐ Does the seller offer sustainability and recycling options?

innovation

Agilent Certified Pre-Owned Instruments check all the boxes

You don't have to sacrifice quality and performance when buying on a budget. Agilent Certified Pre-Owned Instruments deliver unmatched quality at a price you can afford, and they support green initiatives by giving renewed life to existing equipment.

Every instrument is refurbished at an Agilent factory by Agilent engineers. What's more, instruments are certified to the same original specifications—and must pass the same final quality tests—as new.

See why so many labs choose Agilent Certified Pre-Owned Instruments.
