

Unlock the Future of Laboratory Compliance

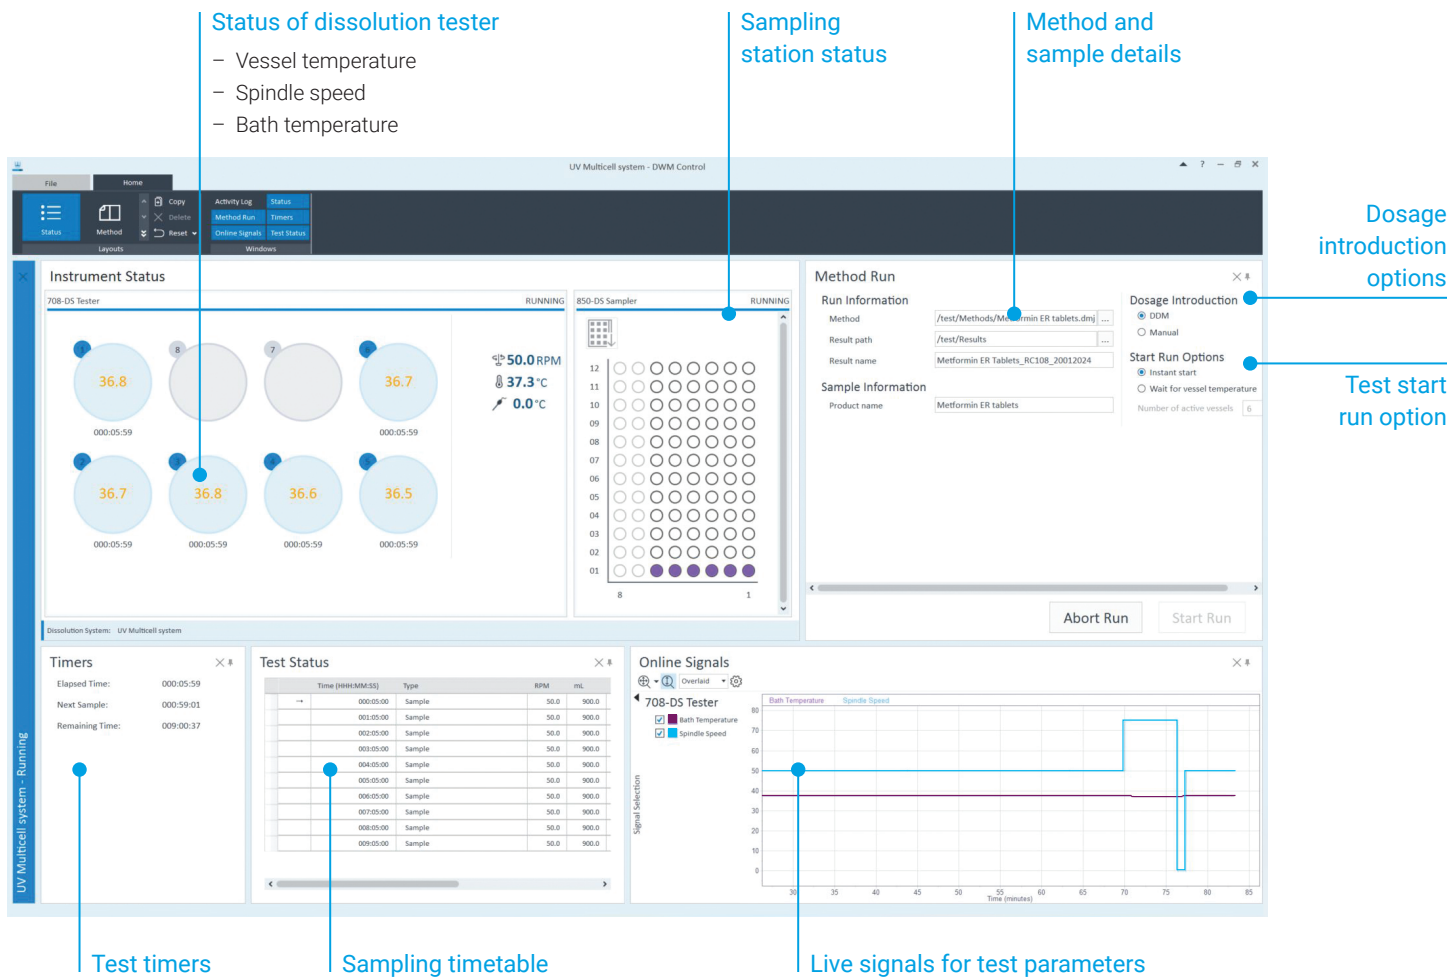

Introducing the new Agilent Dissolution Workflow Manager for OpenLab

Whether you're currently using Agilent OpenLab CDS, another dissolution software, or managing your dissolution testing manually, Agilent has a new solution for you. The Agilent Dissolution Workflow Manager is a software add-on for OpenLab CDS that helps you achieve superior data integrity and consolidate all your dissolution test results in one place with ease.

Agilent
OpenLab

Benefits at a glance

- **Secure data storage:** Seamlessly collect and store your data from various instruments in one secure database.
- **Enhanced compliance:** Ensure your lab meets regulatory requirements with robust audit trails and electronic signatures.
- **User-friendly interface:** Simplify your workflows with an intuitive and clear interface.
- **Minimized validation effort:** Dissolution Workflow Manager plugs into your existing OpenLab installation, so validation effort is reduced, and costs are minimized.

Ordering details
