

75 Years of Agilent Cary UV-Vis/NIR

Your clear choice when optics matter

We're celebrating 75 years of Cary innovation with a 75% discount on a two-year extended warranty. Act now, and gain peace-of-mind that lasts for years.

From prototypes to high-volume production, the success of your business depends upon consistent product excellence. Agilent Cary ultraviolet-visible-near-infrared (UV-Vis-NIR) spectrophotometers deliver accuracy, reproducibility, and productivity beyond anything you ever thought possible.

- Measure **multi-angle** transmission and absolute reflection from the same point on a sample's surface, without repositioning.
- An **innovative PbSmart detector** ensures higher sensitivity, greater dynamic range, and better guaranteed stray light performance for optics design and improvement applications.
- Our **Universal Measurement Accessory (UMA)** collects hundreds of spectra overnight. You can also characterize optics or thin films in minutes to hours, rather than hours to days.
- The **solids autosampler** measures up to 32 1-inch samples overnight or over the weekend - resulting in up to 400% improved productivity.
- **Software updates** make it possible to bring all Cary UV-Vis-NIR spectrophotometers onto Microsoft Windows 11.

Start your journey to improve your materials characterization today. Claim your warranty discount.
