

Faster, Simpler Cannabis and Hemp Pesticides Testing

Agilent state- and country-specific pesticides standards

Ensure product safety with current state- and country-specific mixes

Countries and U.S. states that have permitted the use of medicinal and recreational marijuana have set guidelines for natural and synthetic pesticides used during cultivation. Residual pesticide testing is critical in determining that a plant or product meets these regulations and is safe to consume.

When you're analyzing cannabis or hemp products, success depends upon the quality of your reference materials. You can maximize confidence in your residual pesticides testing with Agilent state- and country-specific standard kits. They are rigorously tested and manufactured using ISO 17025 and 17034 accreditations, and enable you to:

- Reduce the time and costs necessary to mix individual pesticide standards.
- Minimize regulatory confusion with up-to-date kits.
- Calibrate with confidence by using mixes that have been verified with Agilent methods and workflows.

In using Agilent standards for cannabis and hemp, you can more easily keep up with testing regulations and legalization efforts around the globe.

Cannabis testing standards are only the beginning

From instruments, columns, supplies, and services to decades of method development expertise, Agilent supports your entire cannabis and hemp testing workflow.

Together, we can help your lab analyze more samples and meet ever-changing regulatory demands.

Easy ordering table: Agilent state- and country-specific pesticide kits for testing

Here you'll find all the standards you need to quantify pesticides in specific countries and states so you can quickly implement methods and speed up your time to market. If your state is not listed here—or you need to add individual pesticide compounds—please visit www.agilent.com/chem/cannabis-pesticides.

To simplify ordering even further, try our subscription service and set up deliveries of products you use regularly.

Product Description	CAS Number	Concentration	Matrix	Part Number
California Cannabis Pesticide Kit 1 mL	Various	100 µg/mL per analyte	ACN	PST-CBS-CA
Canada Cannabis Pesticide Kit (2020) 1 mL	Various	100 µg/mL per analyte	ACN	PST-CBS-CAN
Oregon Cannabis Pesticide Kit 1 mL	Various	100 µg/mL per analyte	ACN	PST-CBS-OR
Nevada Cannabis Pesticide Kit (2020) 1 mL	Various	100 µg/mL per analyte	ACN	PST-CBS-NV
Colorado Cannabis Pesticide Kit (2020) 1 mL	Various	100 µg/mL per analyte	ACN	PST-CBS-CO

Need a custom standard or mix for your state or region?

Agilent makes it simple with their custom standards online tool. Quickly make your own standards or see if your custom mix is similar to an existing catalog item. Visit www.agilent.com/chem/standards
