Update Information for the Agilent High Sensitivity DNA Kit

for the Agilent Bioanalyzer system

Dear Valued Agilent Customer,

To further improve product stability, from now on the High Sensitivity DNA markers will be supplied in two glass vials, instead of four plastic vials. The total volume (800 μ L) of High Sensitivity DNA markers provided remains unchanged.

In addition, Agilent is reducing the size of the Bioanalyzer reagent boxes to adopt more sustainable packaging. This change will be implemented in a stepwise process, starting with the High Sensitivity DNA kit.

Please be aware, that during the transition phase you may receive a mixture of old and new reagent kits.

Old High Sensitivity DNA reagent kit

New High Sensitivity DNA reagent kit

Thank you for choosing Agilent—we look forward to serving you again. For more information, please visit the Agilent webpage: www.agilent.com/genomics/bioanalyzer-reagents
