

Advance Your Lab Operations To Empower Your Enterprise

CrossLab Asset Management Programs

Setting the Right Strategy

Whether starting from scratch or taking a step back to examine how your current labs are running, **the right laboratory asset management strategy** will ensure you achieve the desired **scientific capability**. Access to over 40 years of industry knowledge and operations expertise can help put the right lens on how to organize the scientific equipment in your space along with implementing the most effective **lab operations structure**.

Elements of an Effective Asset Management Program

Empowering you to achieve your unique mission, the right partner will be capable of delivering a tailored program for you. By identifying a relevant combination of building blocks, we are able to establish a foundation for success in the following areas:

Accurate Inventory

Quality and Regulatory Compliance Support

Cost Avoidance and Control Parameters

Holistic Asset Lifecycle Planning

Financial Clarity and Management

Technology Refresh Strategy

Measured and Optimized Asset Utilization

Advanced Analytics

Leveraging the Agilent CrossLab methodology allows you to stay focused on the science knowing that the lab will be fully functional with the appropriate instruments available and ready to be used when you need them.

Comprehensive Asset Management Program Benefits

Our tailored solutions consistently deliver the following outcomes:

Maximized Instrument Uptime

Focused implementation of the right service strategy

Optimized Lab Spend

Smart use of capital and operations budgets, informed by benchmarking to key elements of Agilent's broad customer base

Unlock Hidden Value

Discover opportunities in your fleet for expanded use or identification of instruments to divest

Compliance Assurance

Ensure software validation is comprehensive and instrument qualification is always up-to-date

CrossLab Checks all the Boxes

CrossLab Asset Management services are active within over 100 organizations supporting more than 200 sites in more than 20 countries.

Agilent CrossLab helps our customers accomplish their objectives through the following Agilent principles:

- **Trust:** Agilent has established high credibility with the scientific community and demonstrates the tangible benefits of adopting a CrossLab Asset Management Program.
- **Transparency:** Our customers gain financial and operational clarity by knowing where capital and operational expenditures are being applied and where there are opportunities for cost reductions.
- **Execution:** Agilent has developed a configurable solution that will improve the overall scientific and business operation of the organization by simplifying the service delivery process, reducing the administration burden on the scientists, and optimizing laboratory productivity. **Agilent will provide the expertise and resources to allow you to achieve your key operation's goals.**
