

Reporting Templates: When Time, Resources, and Results Matter

Agilent OpenLab CDS

From templates to data quality to printing costs, traditional reporting can be one of the biggest obstacles to your productivity. You can transform reporting from a tedious chore into a simple, powerful procedure with Agilent OpenLab CDS.

Reports that work for you

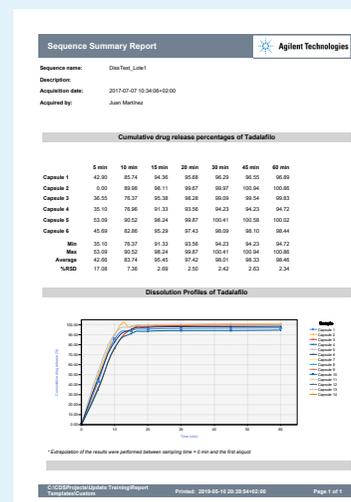

- Easily find and review key data and highlight crucial information that matters most to decision makers.
- Flag data quality early so you can quickly verify or correct—and feel confident you're reporting the right result.
- Reduce your dependency on spreadsheets and prevent errors caused by exporting or manually transcribing results to other software.
- Accelerate the on-boarding of new lab analysts using our templates to reduce training and improve productivity.

With OpenLab CDS, you won't waste time printing reports, entering data into a spreadsheet, and calculating results. OpenLab CDS has all the reporting features common to spreadsheets, including the ability to lock items from modification to protect calculations, apply business logic for pass/fail decision making, and add statistical calculations.

"The intelligent reports are a very important piece of helping us not send out a result, or not produce a result that causes the plant to delay a batch."

Keith Wilkins, PhD,
Lead Analytical Chemist,
The Chemours Company

Take your OpenLab investment to the next level

Need a boost to get up to speed on reporting? Agilent offers a variety of packaged templates, template-creation services, and training offerings to meet your unique business needs.

Application templates

We offer templates that are already defined to meet general application needs, with the flexibility to customize as needed.

Premium Application Reports Available	Data system
Size exclusion chromatography report package	OpenLab CDS, OpenLab ChemStation, OpenLab EZChrom
LC/MS Qualitative Flexible report (customizable report layout with user chromatogram analysis)	OpenLab CDS
Method validation package	OpenLab CDS
Dissolution report package	OpenLab CDS
Residual solvents report package	OpenLab CDS
System suitability report package	OpenLab CDS
Photochemical assessment-monitoring station (PAMS) report and uploads data to VOC DAT and DART	OpenLab CDS
WalkUp report package	OpenLab CDS OpenLab ChemStation

Customization

We can tailor a template to meet your specific needs, and here are some examples of previous work.

Tailored Report Examples	Industry
Kovats retention index report	General
Fatty acids percent concentration and export to LIMS	Food & flavors
Ester index reports	Food & flavors
General alcohol report and export to LIMS	Petrochemical
Related substance report	Pharma
Assay reports	Pharma
Content uniformity reports	Pharma

Training

We offer a mixture of remote and eLearning opportunities to make you the master of your own reports through Agilent University.

Training Courses	Type
Agilent OpenLab CDS Reporting Workshop (1 day)	Instructor Led
Agilent OpenLab CDS Reporting Workshop (2 day)	Instructor Led
Agilent OpenLab CDS Reporting (10 hours)	E-Learning
Agilent OpenLab CDS Reporting (4 session)	Instructor Led Remote Learning
