

Build a More Secure and Connected Lab

Agilent OpenLab ECM

Take control of your data—and your success—with OpenLab ECM. Simply put, OpenLab ECM allows you to collect data from any location, maintain data integrity, and manage your data without disrupting your lab workflow. So you can meet today's data traceability requirements, and present your results in the best possible light.

Agilent
OpenLab

Data integrity: the reliable lab

Benefit	Features
The right information to the right people	<ul style="list-style-type: none">– Full access control at the system and content structure levels
Adapts to any data management deployment strategy	<ul style="list-style-type: none">– Supports local and distributed repository configurations– Flexible user management (locally or via AD) with configurable access control settings
Full lifecycle event tracking	<ul style="list-style-type: none">– Archived data is accessible via the central repository– Full traceability between metadata and stored files– Revision control and activity log history at record and system levels

Data management: the connected lab

Benefit	Features
Easy collaboration with internal/external partners	<ul style="list-style-type: none">– Flexible, logical organization of information– Global and remote access– Automated notifications– Hyperlinks to related files– Review/approval workflow
Information at your fingertips	<ul style="list-style-type: none">– Robust metadata management with filter library– Simple, intuitive content organization/navigation
Quickly review files from common chromatographic data systems	<ul style="list-style-type: none">– Central location– Technology-neutral file viewer: no dedicated software needed
Regain full access to data details in the software of origin even when files have been converted or compressed for long term storage.	<ul style="list-style-type: none">– On-demand restoration of data files to native format for common data sources
Robust search results	<ul style="list-style-type: none">– Scalable metadata and content search
Store/manage data from any source in any format	<ul style="list-style-type: none">– Multiple content upload mechanisms:<ul style="list-style-type: none">• Direct API connections<ul style="list-style-type: none">• Scheduler• Print service• Send-to• Desktop integration– View scientific data via the ECM user interface (technology-neutral viewer)
Automatically secure and centralize your data	<ul style="list-style-type: none">– OpenLab ECM Scheduler fully automates content upload in the background– Built-in configuration enables automated content archiving
