- Reduced learning curve with easy-to-use, proven systems and intuitive software that deliver accurate and precise data
- Fast results enabled by streamlined workflows with minimal clicks

2

Easy Ordering

Quickly find and order parts and consumables to keep moving

- Parts are available across the world
- Inlet and detector parts are the same across systems, saving time and money as labs evolve

3

Robust Methods

Method development done right the first time

- Disruption-free support for ASTM and customer-based methods
- Day-one method robustness, built on decades of Agilent expertise

4

Flexible Configurations

Platforms that grow with your lab

- Workhorse GC and mass spec platforms ready to scale as your lab expands
- Adaptable system designs that evolve with changing energy markets

5

Gap-Bridging Software

Streamlined analysis with Agilent OpenLab software

- Robust reporting, custom calculations, and automation replace legacy macro programming
- Modernized workflows with Agilent consulting and advanced Excel training

6

Future-Proof Support

Keep your lab productive and compliant

- Early adoption of new Windows platforms to maintain system compatibility
- Long-term OS support maintained to keep your lab productive and compliant

7

Software Integration

Seamless calibration and migration

- Import from ChemStation to avoid hand-typing massive calibration tables
- Leverage chemical material intelligence for smarter decision-making

8

Self Maintenance

Minimize downtime by self-troubleshooting

- Use readily available technical information and reduce unnecessary service engineer visits
- Find and obtain system parts easily, reducing downtime

9

Global Network
