

SAFETY DATA SHEET

TKX1 Competent Cells, Part Number 200124

Section 1. Identification

| | |
|--------------------------------|--|
| Product identifier | : TKX1 Competent Cells, Part Number 200124 |
| Part No. (Chemical Kit) | : 200124 |
| Part No. | : TKX1 competent cells 200124-41 pUC 18 DNA Control Plasmid 200231-42 Beta Mercaptoethanol 210200-43 |

Relevant identified uses of the substance or mixture and uses advised against

Analytical reagent.

| | |
|----------------------------|------------------------|
| TKX1 competent cells | 1 ml (5 x 0.2 ml) |
| pUC 18 DNA Control Plasmid | 0.01 ml (0.1 ng/μl) |
| Beta Mercaptoethanol | 0.025 ml (25 μl 1.42M) |

| | |
|------------------------------|---|
| Supplier/Manufacturer | : Agilent Technologies Australia Pty Ltd 679 Springvale Road Mulgrave Victoria 3170, Australia 1800 802 402 |
|------------------------------|---|

| | |
|---|------------------------------|
| Emergency telephone number (with hours of operation) | : CHEMTREC®: +(61)-290372994 |
|---|------------------------------|

Section 2. Hazard(s) identification

Classification of the substance or mixture

Beta Mercaptoethanol

| | |
|------|---|
| H312 | ACUTE TOXICITY (dermal) - Category 4 |
| H332 | ACUTE TOXICITY (inhalation) - Category 4 |
| H315 | SKIN CORROSION/IRRITATION - Category 2 |
| H318 | SERIOUS EYE DAMAGE/EYE IRRITATION - Category 1 |
| H317 | SKIN SENSITISATION - Category 1 |
| H412 | LONG-TERM (CHRONIC) AQUATIC HAZARD - Category 3 |

| | |
|----------------------|--|
| TKX1 competent cells | Percentage of the mixture consisting of ingredient(s) of unknown dermal toxicity: 1 - 10% |
| | Percentage of the mixture consisting of ingredient(s) of unknown inhalation toxicity: 10 - 30% |

GHS label elements

Hazard pictograms : Beta Mercaptoethanol

Signal word : TKX1 competent cells No signal word.
pUC 18 DNA Control Plasmid No signal word.
Beta Mercaptoethanol DANGER

Hazard statements : TKX1 competent cells No known significant effects or critical hazards.
pUC 18 DNA Control Plasmid No known significant effects or critical hazards.
Beta Mercaptoethanol H312 + H332 - Harmful in contact with skin or if inhaled.
H318 - Causes serious eye damage.
H315 - Causes skin irritation.
H317 - May cause an allergic skin reaction.
H412 - Harmful to aquatic life with long lasting effects.

Section 2. Hazard(s) identification

Precautionary statements

| | | |
|--|--|--|
| Prevention | : TKX1 competent cells pUC 18 DNA Control Plasmid Beta Mercaptoethanol | Not applicable. Not applicable. P280 - Wear protective gloves. Wear eye or face protection. Wear protective clothing. P271 - Use only outdoors or in a well-ventilated area. P273 - Avoid release to the environment. P261 - Avoid breathing vapour. P264 - Wash hands thoroughly after handling. P272 - Contaminated work clothing should not be allowed out of the workplace. |
| Response | : TKX1 competent cells pUC 18 DNA Control Plasmid Beta Mercaptoethanol | Not applicable. Not applicable. P304 + P340 + P312 - IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Call a POISON CENTER or physician if you feel unwell. P302 + P352 + P312 + P362 + P363 - IF ON SKIN: Wash with plenty of soap and water. Call a POISON CENTER or physician if you feel unwell. Take off contaminated clothing. Wash contaminated clothing before reuse. P333 + P313 - If skin irritation or rash occurs: Get medical attention. P305 + P351 + P338 + P310 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or physician. |
| Storage | : TKX1 competent cells pUC 18 DNA Control Plasmid Beta Mercaptoethanol | Not applicable. Not applicable. Not applicable. |
| Disposal | : TKX1 competent cells pUC 18 DNA Control Plasmid Beta Mercaptoethanol | Not applicable. Not applicable. P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations. |
| Supplemental label elements | | |
| Additional warning phrases | : TKX1 competent cells pUC 18 DNA Control Plasmid Beta Mercaptoethanol | Not applicable. Not applicable. Not applicable. |
| Other hazards which do not result in classification | : TKX1 competent cells pUC 18 DNA Control Plasmid Beta Mercaptoethanol | None known. None known. None known. |

Section 3. Composition and ingredient information

| | | |
|--------------------------|--|-------------------------------|
| Substance/mixture | : TKX1 competent cells pUC 18 DNA Control Plasmid Beta Mercaptoethanol | Mixture Mixture Mixture |
|--------------------------|--|-------------------------------|

CAS number/other identifiers

Section 3. Composition and ingredient information

| Ingredient name | % (w/w) | CAS number |
|-----------------------------|-----------|------------|
| TKX1 competent cells | | |
| Glycerol | ≥10 - ≤30 | 56-81-5 |
| Dimethyl sulfoxide | ≤10 | 67-68-5 |
| Sucrose | ≤10 | 57-50-1 |
| Beta Mercaptoethanol | | |
| 2-Mercaptoethanol | ≤12 | 60-24-2 |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary first aid measures

| | | |
|---------------------|----------------------------|---|
| Eye contact | : TKX1 competent cells | Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs. |
| | pUC 18 DNA Control Plasmid | Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs. |
| | Beta Mercaptoethanol | Get medical attention immediately. Call a poison center or physician. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician. |
| Inhalation | : TKX1 competent cells | Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur. |
| | pUC 18 DNA Control Plasmid | Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur. |
| | Beta Mercaptoethanol | Get medical attention immediately. Call a poison center or physician. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |
| Skin contact | : TKX1 competent cells | Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. |
| | pUC 18 DNA Control Plasmid | Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. |
| | Beta Mercaptoethanol | Get medical attention immediately. Call a poison center or physician. Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water. |

Section 4. First aid measures

| | | |
|------------------|----------------------------|--|
| Ingestion | : TKX1 competent cells | before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse. |
| | pUC 18 DNA Control Plasmid | Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur. |
| | Beta Mercaptoethanol | Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur. Get medical attention immediately. Call a poison center or physician. Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Chemical burns must be treated promptly by a physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |

Most important symptoms/effects, acute and delayed

Potential acute health effects

| | | |
|---------------------|--|---|
| Eye contact | : TKX1 competent cells pUC 18 DNA Control Plasmid Beta Mercaptoethanol | No known significant effects or critical hazards. No known significant effects or critical hazards. Causes serious eye damage. |
| Inhalation | : TKX1 competent cells pUC 18 DNA Control Plasmid Beta Mercaptoethanol | No known significant effects or critical hazards. No known significant effects or critical hazards. Harmful if inhaled. |
| Skin contact | : TKX1 competent cells pUC 18 DNA Control Plasmid Beta Mercaptoethanol | No known significant effects or critical hazards. No known significant effects or critical hazards. Harmful in contact with skin. Causes skin irritation. May cause an allergic skin reaction. |
| Ingestion | : TKX1 competent cells pUC 18 DNA Control Plasmid Beta Mercaptoethanol | No known significant effects or critical hazards. No known significant effects or critical hazards. No known significant effects or critical hazards. |

Over-exposure signs/symptoms

| | | |
|--------------------|--|--|
| Eye contact | : TKX1 competent cells pUC 18 DNA Control Plasmid Beta Mercaptoethanol | No specific data. No specific data. Adverse symptoms may include the following: pain watering redness |
|--------------------|--|--|

Section 4. First aid measures

| | | | |
|---------------------|---|----------------------------|--|
| Inhalation | : | TKX1 competent cells | No specific data. |
| | | pUC 18 DNA Control Plasmid | No specific data. |
| | | Beta Mercaptoethanol | No specific data. |
| Skin contact | : | TKX1 competent cells | No specific data. |
| | | pUC 18 DNA Control Plasmid | No specific data. |
| | | Beta Mercaptoethanol | Adverse symptoms may include the following: pain or irritation redness blistering may occur |
| Ingestion | : | TKX1 competent cells | No specific data. |
| | | pUC 18 DNA Control Plasmid | No specific data. |
| | | Beta Mercaptoethanol | Adverse symptoms may include the following: stomach pains |

Indication of immediate medical attention and special treatment needed, if necessary

| | | | |
|-----------------------------------|---|----------------------------|---|
| Notes to physician | : | TKX1 competent cells | Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. |
| | | pUC 18 DNA Control Plasmid | Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. |
| | | Beta Mercaptoethanol | Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. |
| Specific treatments | : | TKX1 competent cells | No specific treatment. |
| | | pUC 18 DNA Control Plasmid | No specific treatment. |
| | | Beta Mercaptoethanol | No specific treatment. |
| Protection of first-aiders | : | TKX1 competent cells | No action shall be taken involving any personal risk or without suitable training. |
| | | pUC 18 DNA Control Plasmid | No action shall be taken involving any personal risk or without suitable training. |
| | | Beta Mercaptoethanol | No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

See toxicological information (Section 11)

Section 5. Firefighting measures

Extinguishing media

| | | | |
|---------------------------------------|---|----------------------------|---|
| Suitable extinguishing media | : | TKX1 competent cells | Use an extinguishing agent suitable for the surrounding fire. |
| | | pUC 18 DNA Control Plasmid | Use an extinguishing agent suitable for the surrounding fire. |
| | | Beta Mercaptoethanol | Use an extinguishing agent suitable for the surrounding fire. |
| Unsuitable extinguishing media | : | TKX1 competent cells | None known. |
| | | pUC 18 DNA Control Plasmid | None known. |
| | | Beta Mercaptoethanol | None known. |

Section 5. Firefighting measures

| | | |
|---|----------------------------|---|
| Specific hazards arising from the chemical | : TKX1 competent cells | In a fire or if heated, a pressure increase will occur and the container may burst. |
| | pUC 18 DNA Control Plasmid | In a fire or if heated, a pressure increase will occur and the container may burst. |
| | Beta Mercaptoethanol | In a fire or if heated, a pressure increase will occur and the container may burst. This material is harmful to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products | : TKX1 competent cells | Decomposition products may include the following materials: carbon dioxide carbon monoxide sulfur oxides halogenated compounds metal oxide/oxides |
| | pUC 18 DNA Control Plasmid | No specific data. |
| | Beta Mercaptoethanol | Decomposition products may include the following materials: carbon dioxide carbon monoxide sulfur oxides |
| Special protective actions for fire-fighters | : TKX1 competent cells | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. |
| | pUC 18 DNA Control Plasmid | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. |
| | Beta Mercaptoethanol | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. |
| Special protective equipment for fire-fighters | : TKX1 competent cells | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. |
| | pUC 18 DNA Control Plasmid | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. |
| | Beta Mercaptoethanol | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. |

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

| | | |
|------------------------------------|----------------------------|---|
| For non-emergency personnel | : TKX1 competent cells | No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Put on appropriate personal protective equipment. |
| | pUC 18 DNA Control Plasmid | No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk |

Section 6. Accidental release measures

Beta Mercaptoethanol

through spilt material. Put on appropriate personal protective equipment.

No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Do not breathe vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

For emergency responders : TKX1 competent cells

If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

pUC 18 DNA Control Plasmid

If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

Beta Mercaptoethanol

If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

Environmental precautions : TKX1 competent cells

Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

pUC 18 DNA Control Plasmid

Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Beta Mercaptoethanol

Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.

Methods and material for containment and cleaning up

Methods for cleaning up : TKX1 competent cells

Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

pUC 18 DNA Control Plasmid

Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Beta Mercaptoethanol

Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Section 7. Handling and storage

Precautions for safe handling

Protective measures

- :  TKX1 competent cells Put on appropriate personal protective equipment (see Section 8).
- pUC 18 DNA Control Plasmid Put on appropriate personal protective equipment (see Section 8).
- Beta Mercaptoethanol Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

Advice on general occupational hygiene

- :  TKX1 competent cells Potentially biohazardous material. Potentially biohazardous material. Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
- pUC 18 DNA Control Plasmid Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
- Beta Mercaptoethanol Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, including any incompatibilities

- :  TKX1 competent cells Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.
- pUC 18 DNA Control Plasmid Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid

Section 7. Handling and storage

Beta Mercaptoethanol

environmental contamination. See Section 10 for incompatible materials before handling or use. Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

Section 8. Exposure controls and personal protection

Control parameters

Occupational exposure limits

| Ingredient name | Exposure limits |
|----------------------|--|
| TKX1 competent cells | |
| Glycerol | Safe Work Australia (Australia, 1/2014). TWA: 10 mg/m ³ 8 hours. |
| Dimethyl sulfoxide | DFG MAC-values list (Germany, 7/2015). Absorbed through skin. PEAK: 320 mg/m ³ , 4 times per shift, 15 minutes. TWA: 160 mg/m ³ 8 hours. PEAK: 100 ppm, 4 times per shift, 15 minutes. TWA: 50 ppm 8 hours. |
| Sucrose | Safe Work Australia (Australia, 1/2014). TWA: 10 mg/m ³ 8 hours. |

Appropriate engineering controls

: If user operations generate dust, fumes, gas, vapour or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

Environmental exposure controls

: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual protection measures

Hygiene measures

: Handle as biohazard material (Biosafety level 1). Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection

: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/or face shield. If inhalation hazards exist, a full-face respirator may be required instead.

Skin protection

Section 8. Exposure controls and personal protection

- Hand protection** : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.
- Body protection** : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
- Other skin protection** : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
- Respiratory protection** : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

| | pUC 18 DNA Control Plasmid | Not available. |
| | Beta Mercaptoethanol | Not available. |
| Viscosity | : TKX1 competent cells | Not available. |
| | pUC 18 DNA Control Plasmid | Not available. |
| | Beta Mercaptoethanol | Not available. |

Section 10. Stability and reactivity

| | | |
|---|----------------------------|--|
| Reactivity | : TKX1 competent cells | No specific test data related to reactivity available for this product or its ingredients. |
| | pUC 18 DNA Control Plasmid | No specific test data related to reactivity available for this product or its ingredients. |
| | Beta Mercaptoethanol | No specific test data related to reactivity available for this product or its ingredients. |
| Chemical stability | : TKX1 competent cells | The product is stable. |
| | pUC 18 DNA Control Plasmid | The product is stable. |
| | Beta Mercaptoethanol | The product is stable. |
| Possibility of hazardous reactions | : TKX1 competent cells | Under normal conditions of storage and use, hazardous reactions will not occur. |
| | pUC 18 DNA Control Plasmid | Under normal conditions of storage and use, hazardous reactions will not occur. |
| | Beta Mercaptoethanol | Under normal conditions of storage and use, hazardous reactions will not occur. |
| Conditions to avoid | : TKX1 competent cells | No specific data. |
| | pUC 18 DNA Control Plasmid | No specific data. |
| | Beta Mercaptoethanol | No specific data. |
| Incompatible materials | : TKX1 competent cells | May react or be incompatible with oxidising materials. |
| | pUC 18 DNA Control Plasmid | May react or be incompatible with oxidising materials. |
| | Beta Mercaptoethanol | May react or be incompatible with oxidising materials. |

Section 10. Stability and reactivity

| | | |
|---|----------------------------|--|
| Hazardous decomposition products | : TKX1 competent cells | Under normal conditions of storage and use, hazardous decomposition products should not be produced. |
| | pUC 18 DNA Control Plasmid | Under normal conditions of storage and use, hazardous decomposition products should not be produced. |
| | Beta Mercaptoethanol | Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

| Product/ingredient name | Result | Species | Dose | Exposure |
|-----------------------------|-------------|---------|-------------|----------|
| TKX1 competent cells | | | | |
| Glycerol | LD50 Oral | Rat | 12600 mg/kg | - |
| Dimethyl sulfoxide | LD50 Dermal | Rat | 40000 mg/kg | - |
| | LD50 Oral | Rat | 14500 mg/kg | - |
| Sucrose | LD50 Oral | Rat | 29700 mg/kg | - |
| Beta Mercaptoethanol | | | | |
| 2-Mercaptoethanol | LD50 Dermal | Rabbit | 200 mg/kg | - |
| | LD50 Oral | Rat | 244 mg/kg | - |

Irritation/Corrosion

| Product/ingredient name | Result | Species | Score | Exposure | Observation |
|-----------------------------|------------------------|---------|-------|-------------------------|-------------|
| TKX1 competent cells | | | | | |
| Glycerol | Eyes - Mild irritant | Rabbit | - | 24 hours 500 milligrams | - |
| | Skin - Mild irritant | Rabbit | - | 24 hours 500 milligrams | - |
| Dimethyl sulfoxide | Eyes - Mild irritant | Rabbit | - | 24 hours 500 milligrams | - |
| | Eyes - Mild irritant | Rabbit | - | 100 milligrams | - |
| | Skin - Mild irritant | Rabbit | - | 24 hours 500 milligrams | - |
| | Skin - Mild irritant | Rabbit | - | 100 milligrams | - |
| Beta Mercaptoethanol | | | | | |
| 2-Mercaptoethanol | Eyes - Severe irritant | Rabbit | - | 2 milligrams | - |

Sensitisation

Not available.

Mutagenicity

Not available.

Carcinogenicity

Not available.

Reproductive toxicity

Not available.

Teratogenicity

Not available.

Specific target organ toxicity (single exposure)

Section 11. Toxicological information

| Name | Category | Route of exposure | Target organs |
|---|------------|-------------------|------------------------------|
| Beta Mercaptoethanol 2-Mercaptoethanol | Category 3 | Not applicable. | Respiratory tract irritation |

Specific target organ toxicity (repeated exposure)

Not available.

Aspiration hazard

Not available.

Information on likely routes of exposure : TKX1 competent cells Routes of entry anticipated: Oral, Dermal, Inhalation.
pUC 18 DNA Control Plasmid Not available.
Beta Mercaptoethanol Routes of entry anticipated: Oral, Dermal, Inhalation.

Potential acute health effects

Eye contact : TKX1 competent cells No known significant effects or critical hazards.
pUC 18 DNA Control Plasmid No known significant effects or critical hazards.
Beta Mercaptoethanol Causes serious eye damage.

Inhalation : TKX1 competent cells No known significant effects or critical hazards.
pUC 18 DNA Control Plasmid No known significant effects or critical hazards.
Beta Mercaptoethanol Harmful if inhaled.

Skin contact : TKX1 competent cells No known significant effects or critical hazards.
pUC 18 DNA Control Plasmid No known significant effects or critical hazards.
Beta Mercaptoethanol Harmful in contact with skin. Causes skin irritation.
May cause an allergic skin reaction.

Ingestion : TKX1 competent cells No known significant effects or critical hazards.
pUC 18 DNA Control Plasmid No known significant effects or critical hazards.
Beta Mercaptoethanol No known significant effects or critical hazards.

Symptoms related to the physical, chemical and toxicological characteristics

Eye contact : TKX1 competent cells No specific data.
pUC 18 DNA Control Plasmid No specific data.
Beta Mercaptoethanol Adverse symptoms may include the following:
pain
watering
redness

Inhalation : TKX1 competent cells No specific data.
pUC 18 DNA Control Plasmid No specific data.
Beta Mercaptoethanol No specific data.

Skin contact : TKX1 competent cells No specific data.
pUC 18 DNA Control Plasmid No specific data.
Beta Mercaptoethanol Adverse symptoms may include the following:
pain or irritation
redness
blistering may occur

Ingestion : TKX1 competent cells No specific data.
pUC 18 DNA Control Plasmid No specific data.
Beta Mercaptoethanol Adverse symptoms may include the following:
stomach pains

Delayed and immediate effects as well as chronic effects from short and long-term exposure

Short term exposure

Potential immediate effects : Not available.

Potential delayed effects : Not available.

Long term exposure

Section 11. Toxicological information

Potential immediate effects : Not available.

Potential delayed effects : Not available.

Potential chronic health effects

Not available.

| | | |
|------------------------------|--|---|
| General | : TKX1 competent cells pUC 18 DNA Control Plasmid Beta Mercaptoethanol | No known significant effects or critical hazards. No known significant effects or critical hazards. Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels. |
| Carcinogenicity | : TKX1 competent cells pUC 18 DNA Control Plasmid Beta Mercaptoethanol | No known significant effects or critical hazards. No known significant effects or critical hazards. No known significant effects or critical hazards. |
| Mutagenicity | : TKX1 competent cells pUC 18 DNA Control Plasmid Beta Mercaptoethanol | No known significant effects or critical hazards. No known significant effects or critical hazards. No known significant effects or critical hazards. |
| Teratogenicity | : TKX1 competent cells pUC 18 DNA Control Plasmid Beta Mercaptoethanol | No known significant effects or critical hazards. No known significant effects or critical hazards. No known significant effects or critical hazards. |
| Developmental effects | : TKX1 competent cells pUC 18 DNA Control Plasmid Beta Mercaptoethanol | No known significant effects or critical hazards. No known significant effects or critical hazards. No known significant effects or critical hazards. |
| Fertility effects | : TKX1 competent cells pUC 18 DNA Control Plasmid Beta Mercaptoethanol | No known significant effects or critical hazards. No known significant effects or critical hazards. No known significant effects or critical hazards. |

Numerical measures of toxicity

Acute toxicity estimates

| Route | ATE value |
|----------------------|------------|
| Beta Mercaptoethanol | |
| Oral | 2440 mg/kg |
| Dermal | 2000 mg/kg |
| Inhalation (vapours) | 20 mg/l |

Section 12. Ecological information

Toxicity

| Product/ingredient name | Result | Species | Exposure |
|-------------------------|--------------------------------------|-----------------------------------|----------|
| TKX1 competent cells | Acute LC50 54000 mg/l Fresh water | Fish - Oncorhynchus mykiss | 96 hours |
| Glycerol | Acute LC50 25000 ppm Fresh water | Daphnia - Daphnia magna - Neonate | 48 hours |
| Dimethyl sulfoxide | Acute LC50 34000000 µg/l Fresh water | Fish - Pimephales promelas | 96 hours |
| | Chronic NOEC 100 µl/L Marine water | Algae - Ulva lactuca | 72 hours |

Persistence and degradability

| Product/ingredient name | Test | Result | Dose | Inoculum |
|-------------------------|--|----------------|------|----------|
| TKX1 competent cells | 301D Ready Biodegradability - Closed Bottle Test | 93 % - 30 days | - | - |
| Glycerol | | | | |

Section 12. Ecological information

Bioaccumulative potential

| Product/ingredient name | LogP _{ow} | BCF | Potential |
|-----------------------------|--------------------|------|-----------|
| TKX1 competent cells | | | |
| Glycerol | -1.76 | - | low |
| Dimethyl sulfoxide | -1.35 | 3.16 | low |
| Sucrose | -3.7 | - | low |
| Beta Mercaptoethanol | | | |
| 2-Mercaptoethanol | -0.056 | - | low |

Mobility in soil

Soil/water partition coefficient (K_{oc}) : Not available.

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

ADG / IMDG / IATA : Not regulated as Dangerous Goods according to the ADG Code .

Special precautions for user : **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according to Annex II of Marpol and the IBC Code : Not available.

Section 15. Regulatory information

Standard Uniform Schedule of Medicine and Poisons

6

Model Work Health and Safety Regulations - Scheduled Substances

No listed substance

International regulations

Chemical Weapon Convention List Schedules I, II & III Chemicals

Not listed.

Montreal Protocol (Annexes A, B, C, E)

Not listed.

Stockholm Convention on Persistent Organic Pollutants

Not listed.

Section 15. Regulatory information

Rotterdam Convention on Prior Informed Consent (PIC)

Not listed.

UNECE Aarhus Protocol on POPs and Heavy Metals

Not listed.

Inventory list

| | |
|--------------------------|---|
| Australia | : All components are listed or exempted. |
| Canada | : All components are listed or exempted. |
| China | : Not determined. |
| Europe | : All components are listed or exempted. |
| Japan | : <input checked="" type="checkbox"/> Japan inventory (ENCS) : Not determined. Japan inventory (ISHL) : All components are listed or exempted. |
| Malaysia | : Not determined. |
| New Zealand | : Not determined. |
| Philippines | : Not determined. |
| Republic of Korea | : All components are listed or exempted. |
| Taiwan | : All components are listed or exempted. |
| Thailand | : <input checked="" type="checkbox"/> Not determined. |
| Turkey | : <input checked="" type="checkbox"/> Not determined. |
| United States | : All components are listed or exempted. |
| Viet Nam | : <input checked="" type="checkbox"/> Not determined. |

Section 16. Any other relevant information

History

Date of issue/Date of revision : 22/12/2017

Date of previous issue : 13/10/2015.

Version : 5

Key to abbreviations

: ADG = Australian Dangerous Goods
 ATE = Acute Toxicity Estimate
 BCF = Bioconcentration Factor
 GHS = Globally Harmonized System of Classification and Labelling of Chemicals
 IATA = International Air Transport Association
 IBC = Intermediate Bulk Container
 IMDG = International Maritime Dangerous Goods
 LogPow = logarithm of the octanol/water partition coefficient
 MARPOL = International Convention for the Prevention of Pollution From Ships, 1973 as modified by the Protocol of 1978. ("Marpol" = marine pollution)
 NOHSC = National Occupational Health and Safety Commission
 SUSMP = Standard Uniform Schedule of Medicine and Poisons
 UN = United Nations

Procedure used to derive the classification

| Classification | Justification |
|---|--|
| <input checked="" type="checkbox"/> Beta Mercaptoethanol Acute Tox. 4, H312 Acute Tox. 4, H332 Skin Irrit. 2, H315 Eye Dam. 1, H318 Skin Sens. 1, H317 Aquatic Chronic 3, H412 | Calculation method Calculation method Calculation method Calculation method Calculation method Calculation method |
