**Supplier/Manufacturer**

Agilent Technologies Australia Pty Ltd  
679 Springvale Road  
Mulgrave  
Victoria 3170, Australia  
1800 802 402

**Emergency telephone number (with hours of operation)**

CHEMTREC®: +(61)-290372994

### Section 2. Hazard(s) identification

**Classification of the substance or mixture**

**Beta Mercaptoethanol**

- **H312**: ACUTE TOXICITY (dermal) - Category 4
- **H332**: ACUTE TOXICITY (inhalation) - Category 4
- **H315**: SKIN CORROSION/IRRITATION - Category 2
- **H318**: SERIOUS EYE DAMAGE/EYE IRRITATION - Category 1
- **H317**: SKIN SENSITISATION - Category 1
- **H412**: LONG-TERM (CHRONIC) AQUATIC HAZARD - Category 3

**SCS1 supercompetent cells**

- Percentage of the mixture consisting of ingredient(s) of unknown dermal toxicity: 1 - 10%
- Percentage of the mixture consisting of ingredient(s) of unknown inhalation toxicity: 10 - 30%

**GHS label elements**

- **Hazard pictograms**: β
- **Signal word**: DANGER
- **Hazard statements**: No known significant effects or critical hazards. No known significant effects or critical hazards. H312 + H332 - Harmful in contact with skin or if inhaled. H318 - Causes serious eye damage. H315 - Causes skin irritation. H317 - May cause an allergic skin reaction. H412 - Harmful to aquatic life with long lasting effects.

**Date of issue/Date of revision**: 21/12/2017  
**Date of previous issue**: 28/08/2015  
**Version**: 5  
**1/17**
Section 2. Hazard(s) identification

Precautionary statements

Prevention:
- **SCS1 supercompetent cells**
- **pUC 18 DNA Control Plasmid**
- **Beta Mercaptoethanol**
  - P280 - Wear protective gloves. Wear eye or face protection. Wear protective clothing.
  - P271 - Use only outdoors or in a well-ventilated area.
  - P273 - Avoid release to the environment.
  - P261 - Avoid breathing vapour.
  - P264 - Wash hands thoroughly after handling.
  - P272 - Contaminated work clothing should not be allowed out of the workplace.

Response:
- **SCS1 supercompetent cells**
- **pUC 18 DNA Control Plasmid**
- **Beta Mercaptoethanol**
  - P304 + P340 + P312 - IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Call a POISON CENTER or physician if you feel unwell.
  - P302 + P352 + P312 + P362 + P363 - IF ON SKIN: Wash with plenty of soap and water. Call a POISON CENTER or physician if you feel unwell. Take off contaminated clothing. Wash contaminated clothing before reuse.
  - P333 + P313 - If skin irritation or rash occurs: Get medical attention.
  - P305 + P351 + P338 + P310 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or physician.

Storage:
- **SCS1 supercompetent cells**
- **pUC 18 DNA Control Plasmid**
- **Beta Mercaptoethanol**

Disposal:
- **SCS1 supercompetent cells**
- **pUC 18 DNA Control Plasmid**
- **Beta Mercaptoethanol**
  - P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.

Supplemental label elements

Additional warning phrases:
- **SCS1 supercompetent cells**
- **pUC 18 DNA Control Plasmid**
- **Beta Mercaptoethanol**

Other hazards which do not result in classification:
- **SCS1 supercompetent cells**
- **pUC 18 DNA Control Plasmid**
- **Beta Mercaptoethanol**

Section 3. Composition and ingredient information

Substance/mixture:

</table>

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

**Description of necessary first aid measures**

**Eye contact**

- **SCS1 supercompetent cells**: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.

- **pUC 18 DNA Control Plasmid**: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.

- **Beta Mercaptoethanol**: Get medical attention immediately. Call a poison center or physician. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician.

**Inhalation**

- **SCS1 supercompetent cells**: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.

- **pUC 18 DNA Control Plasmid**: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.

- **Beta Mercaptoethanol**: Get medical attention immediately. Call a poison center or physician. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or wristband.

**Skin contact**

- **SCS1 supercompetent cells**: Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.

- **pUC 18 DNA Control Plasmid**: Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.

- **Beta Mercaptoethanol**: Get medical attention immediately. Call a poison center or physician. Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water.
Section 4. First aid measures

**Ingestion**

**SCS1 supercompetent cells**
Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.

**pUC 18 DNA Control Plasmid**
Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.

**Beta Mercaptoethanol**
Get medical attention immediately. Call a poison center or physician. Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Chemical burns must be treated promptly by a physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

**Most important symptoms/effects, acute and delayed**

**Potential acute health effects**

**Eye contact**

**SCS1 supercompetent cells**  No known significant effects or critical hazards.

**pUC 18 DNA Control Plasmid**  No known significant effects or critical hazards.

**Beta Mercaptoethanol**  Causes serious eye damage.

**Inhalation**

**SCS1 supercompetent cells**  No known significant effects or critical hazards.

**pUC 18 DNA Control Plasmid**  No known significant effects or critical hazards.

**Beta Mercaptoethanol**  Harmful if inhaled.

**Skin contact**

**SCS1 supercompetent cells**  No known significant effects or critical hazards.

**pUC 18 DNA Control Plasmid**  No known significant effects or critical hazards.

**Beta Mercaptoethanol**  Harmful in contact with skin. Causes skin irritation. May cause an allergic skin reaction.

**Ingestion**

**SCS1 supercompetent cells**  No known significant effects or critical hazards.

**pUC 18 DNA Control Plasmid**  No known significant effects or critical hazards.

**Beta Mercaptoethanol**  No known significant effects or critical hazards.

**Over-exposure signs/symptoms**

**Eye contact**

**SCS1 supercompetent cells**  No specific data.

**pUC 18 DNA Control Plasmid**  No specific data.

**Beta Mercaptoethanol**  Adverse symptoms may include the following: pain, watering, redness.

Date of issue/Date of revision: 21/12/2017  Date of previous issue: 28/08/2015  Version: 5
Section 4. First aid measures

Inhalation: SCS1 supercompetent cells, pUC 18 DNA Control Plasmid, Beta Mercaptoethanol. No specific data.

Skin contact: SCS1 supercompetent cells, pUC 18 DNA Control Plasmid, Beta Mercaptoethanol. No specific data. Adverse symptoms may include the following: pain or irritation, redness, blistering may occur.

Ingestion: SCS1 supercompetent cells, pUC 18 DNA Control Plasmid, Beta Mercaptoethanol. No specific data. Adverse symptoms may include the following: stomach pains.

Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician: SCS1 supercompetent cells, pUC 18 DNA Control Plasmid, Beta Mercaptoethanol. Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

Specific treatments: SCS1 supercompetent cells, pUC 18 DNA Control Plasmid, Beta Mercaptoethanol. No specific treatment.

Protection of first-aiders: SCS1 supercompetent cells, pUC 18 DNA Control Plasmid, Beta Mercaptoethanol. No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

See toxicological information (Section 11)

Section 5. Firefighting measures

Extinguishing media

Suitable extinguishing media: SCS1 supercompetent cells, pUC 18 DNA Control Plasmid, Beta Mercaptoethanol. Use an extinguishing agent suitable for the surrounding fire.

Unsuitable extinguishing media: SCS1 supercompetent cells, pUC 18 DNA Control Plasmid, Beta Mercaptoethanol. None known.
Section 5. Firefighting measures

Specific hazards arising from the chemical:
- **SCS1 supercompetent cells**: In a fire or if heated, a pressure increase will occur and the container may burst.
- **pUC 18 DNA Control Plasmid**: In a fire or if heated, a pressure increase will occur and the container may burst.
- **Beta Mercaptoethanol**: In a fire or if heated, a pressure increase will occur and the container may burst. This material is harmful to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.

Hazardous thermal decomposition products:
- **SCS1 supercompetent cells**: Decomposition products may include the following materials:
  - carbon dioxide
  - carbon monoxide
  - sulfur oxides
  - halogenated compounds
  - metal oxide/oxides
- **pUC 18 DNA Control Plasmid**: No specific data.
- **Beta Mercaptoethanol**: Decomposition products may include the following materials:
  - carbon dioxide
  - carbon monoxide
  - sulfur oxides

Special protective actions for fire-fighters:
- **SCS1 supercompetent cells**: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Put on appropriate personal protective equipment.
- **pUC 18 DNA Control Plasmid**: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
- **Beta Mercaptoethanol**: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

Special protective equipment for fire-fighters:
- **SCS1 supercompetent cells**: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
- **pUC 18 DNA Control Plasmid**: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
- **Beta Mercaptoethanol**: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures:

For non-emergency personnel:
- **SCS1 supercompetent cells**: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Put on appropriate personal protective equipment.
- **pUC 18 DNA Control Plasmid**: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material.
Section 6. Accidental release measures

Environmental precautions: SCS1 supercompetent cells
- Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Beta Mercaptoethanol
- Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Methods for cleaning up: SCS1 supercompetent cells
- Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

For emergency responders: SCS1 supercompetent cells
- If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
Section 7. Handling and storage

**Precautions for safe handling**

**Protective measures**
- **SCS1 supercompetent cells**
  - Put on appropriate personal protective equipment (see Section 8).
- **pUC 18 DNA Control Plasmid**
  - Put on appropriate personal protective equipment (see Section 8).
- **Beta Mercaptoethanol**
  - Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

**Advice on general occupational hygiene**
- **SCS1 supercompetent cells**
  - Potentially biohazardous material. Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
- **pUC 18 DNA Control Plasmid**
  - Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
- **Beta Mercaptoethanol**
  - Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

**Conditions for safe storage, including any incompatibilities**
- **SCS1 supercompetent cells**
  - Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.
- **pUC 18 DNA Control Plasmid**
  - Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.
## Section 7. Handling and storage

Beta Mercaptoethanol

- Store in accordance with local regulations.
- Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink.
- Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

</tr>
</tbody>
</table>

### Appropriate engineering controls

- If user operations generate dust, fumes, gas, vapour or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

### Environmental exposure controls

- Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

### Individual protection measures

#### Hygiene measures

- Handle as biohazard material (Biosafety level 1). Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse. Ensure that eyewash stations and safety showers are close to the workstation location.

#### Eye/face protection

- Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/or face shield. If inhalation hazards exist, a full-face respirator may be required instead.

#### Skin protection

-
Section 8. Exposure controls and personal protection

Hand protection: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

Body protection: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Other skin protection: Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory protection: Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

Section 9. Physical and chemical properties

Appearance

Colour: SCS1 supercompetent cells Not available. pUC 18 DNA Control Plasmid Not available. Beta Mercaptoethanol Not available.

Odour: SCS1 supercompetent cells Not available. pUC 18 DNA Control Plasmid Not available. Beta Mercaptoethanol Not available.

Odour threshold: SCS1 supercompetent cells Not available. pUC 18 DNA Control Plasmid Not available. Beta Mercaptoethanol Not available.

pH: SCS1 supercompetent cells 6.4 pUC 18 DNA Control Plasmid 7.5 Beta Mercaptoethanol Not available.

Melting point: SCS1 supercompetent cells Not available. pUC 18 DNA Control Plasmid 0°C (32°F) Beta Mercaptoethanol Not available.

Boiling point: SCS1 supercompetent cells Not available. pUC 18 DNA Control Plasmid 100°C (212°F) Beta Mercaptoethanol Not available.

Flash point: SCS1 supercompetent cells Not available. pUC 18 DNA Control Plasmid Not available. Beta Mercaptoethanol Not available.

**Specific target organ toxicity (repeated exposure)**
Not available.

**Aspiration hazard**
Not available.

**Information on likely routes of exposure**
- **Inhalation**
  - SCS1 supercompetent cells
  - pUC 18 DNA Control Plasmid
  - Beta Mercaptoethanol
  Routes of entry anticipated: Oral, Dermal, Inhalation.
  - Beta Mercaptoethanol
  Routes of entry anticipated: Oral, Dermal, Inhalation.

**Potential acute health effects**

**Eye contact**
- SCS1 supercompetent cells
- pUC 18 DNA Control Plasmid
- Beta Mercaptoethanol
No known significant effects or critical hazards.

**Inhalation**
- SCS1 supercompetent cells
- pUC 18 DNA Control Plasmid
- Beta Mercaptoethanol
No known significant effects or critical hazards.

**Skin contact**
- SCS1 supercompetent cells
- pUC 18 DNA Control Plasmid
- Beta Mercaptoethanol
No known significant effects or critical hazards.

**Ingestion**
- SCS1 supercompetent cells
- pUC 18 DNA Control Plasmid
- Beta Mercaptoethanol
No known significant effects or critical hazards.

**Symptoms related to the physical, chemical and toxicological characteristics**

**Eye contact**
- SCS1 supercompetent cells
- pUC 18 DNA Control Plasmid
- Beta Mercaptoethanol
No specific data.

Inhalation
- SCS1 supercompetent cells
- pUC 18 DNA Control Plasmid
- Beta Mercaptoethanol
No specific data.

Skin contact
- SCS1 supercompetent cells
- pUC 18 DNA Control Plasmid
- Beta Mercaptoethanol
No specific data.

Ingestion
- SCS1 supercompetent cells
- pUC 18 DNA Control Plasmid
- Beta Mercaptoethanol
No specific data.

Delayed and immediate effects as well as chronic effects from short and long-term exposure

**Short term exposure**
- Potential immediate effects: Not available.
- Potential delayed effects: Not available.

**Long term exposure**

Date of issue/Date of revision: 21/12/2017
Date of previous issue: 28/08/2015
Version: 5
Section 11. Toxicological information

**Potential immediate effects**
Not available.

**Potential delayed effects**
Not available.

**Potential chronic health effects**
Not available.

**General**
- SCS1 supercompetent cells
- pUC 18 DNA Control Plasmid
- Beta Mercaptoethanol

No known significant effects or critical hazards.

**Carcinogenicity**
- SCS1 supercompetent cells
- pUC 18 DNA Control Plasmid
- Beta Mercaptoethanol

No known significant effects or critical hazards.

**Mutagenicity**
- SCS1 supercompetent cells
- pUC 18 DNA Control Plasmid
- Beta Mercaptoethanol

No known significant effects or critical hazards.

**Teratogenicity**
- SCS1 supercompetent cells
- pUC 18 DNA Control Plasmid
- Beta Mercaptoethanol

No known significant effects or critical hazards.

**Developmental effects**
- SCS1 supercompetent cells
- pUC 18 DNA Control Plasmid
- Beta Mercaptoethanol

No known significant effects or critical hazards.

**Fertility effects**
- SCS1 supercompetent cells
- pUC 18 DNA Control Plasmid
- Beta Mercaptoethanol

No known significant effects or critical hazards.

**Numerical measures of toxicity**

Mobility in soil

Soil/water partition coefficient (K<sub>oc</sub>) : Not available.

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

ADG / IMDG / IATA : Not regulated as Dangerous Goods according to the ADG Code.

Special precautions for user : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according to Annex II of Marpol and the IBC Code : Not available.

Section 15. Regulatory information

Standard Uniform Schedule of Medicine and Poisons

6

Model Work Health and Safety Regulations - Scheduled Substances

No listed substance

International regulations

Chemical Weapon Convention List Schedules I, II & III Chemicals

Not listed.

Montreal Protocol (Annexes A, B, C, E)

Not listed.
Section 15. Regulatory information

Stockholm Convention on Persistent Organic Pollutants
Not listed.

Rotterdam Convention on Prior Informed Consent (PIC)
Not listed.

UNECE Aarhus Protocol on POPs and Heavy Metals
Not listed.
