

## Section 2. Hazard(s) identification

### Precautionary statements

|  |   |  |
|--|---|--|
| <b>Prevention</b>  | : AG1 competent cells<br>pUC 18 DNA Control Plasmid<br>Beta Mercaptoethanol | Not applicable.<br>Not applicable.<br>P280 - Wear protective gloves. Wear eye or face protection. Wear protective clothing.<br>P271 - Use only outdoors or in a well-ventilated area.<br>P273 - Avoid release to the environment.<br>P261 - Avoid breathing vapour.<br>P264 - Wash hands thoroughly after handling.<br>P272 - Contaminated work clothing should not be allowed out of the workplace.   |
| <b>Response</b>  | : AG1 competent cells<br>pUC 18 DNA Control Plasmid<br>Beta Mercaptoethanol | Not applicable.<br>Not applicable.<br>P304 + P340 + P312 - IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Call a POISON CENTER or physician if you feel unwell.<br>P302 + P352 + P312 + P362 + P363 - IF ON SKIN: Wash with plenty of soap and water. Call a POISON CENTER or physician if you feel unwell. Take off contaminated clothing. Wash contaminated clothing before reuse.<br>P333 + P313 - If skin irritation or rash occurs: Get medical attention.<br>P305 + P351 + P338 + P310 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or physician. |
| <b>Storage</b>   | : AG1 competent cells<br>pUC 18 DNA Control Plasmid<br>Beta Mercaptoethanol | Not applicable.<br>Not applicable.<br>Not applicable.  |
| <b>Disposal</b>  | : AG1 competent cells<br>pUC 18 DNA Control Plasmid<br>Beta Mercaptoethanol | Not applicable.<br>Not applicable.<br>P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.   |
| <b>Supplemental label elements</b>                         |   |  |
| <b>Additional warning phrases</b>                          | : AG1 competent cells<br>pUC 18 DNA Control Plasmid<br>Beta Mercaptoethanol | Not applicable.<br>Not applicable.<br>Not applicable.  |
| <b>Other hazards which do not result in classification</b> | : AG1 competent cells<br>pUC 18 DNA Control Plasmid<br>Beta Mercaptoethanol | None known.<br>None known.<br>None known.  |

## Section 3. Composition and ingredient information

|                          |   |                               |
|--------------------------|---|-------------------------------|
| <b>Substance/mixture</b> | : AG1 competent cells<br>pUC 18 DNA Control Plasmid<br>Beta Mercaptoethanol | Mixture<br>Mixture<br>Mixture |
|--------------------------|---|-------------------------------|

### CAS number/other identifiers

## Section 3. Composition and ingredient information

| Ingredient name             | % (w/w)   | CAS number |
|-----------------------------|-----------|------------|
| <b>AG1 competent cells</b>  |           |            |
| Glycerol                    | ≥10 - ≤30 | 56-81-5    |
| Dimethyl sulfoxide          | ≤10       | 67-68-5    |
| Sucrose                     | ≤10       | 57-50-1    |
| <b>Beta Mercaptoethanol</b> |           |            |
| 2-Mercaptoethanol           | ≤12       | 60-24-2    |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

## Section 4. First aid measures

### Description of necessary first aid measures

|                     |                              |   |
|---------------------|------------------------------|---|
| <b>Eye contact</b>  | : <b>AG1 competent cells</b> | Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.   |
|                     | pUC 18 DNA Control Plasmid   | Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.   |
|                     | Beta Mercaptoethanol         | Get medical attention immediately. Call a poison center or physician. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician.  |
| <b>Inhalation</b>   | : <b>AG1 competent cells</b> | Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.   |
|                     | pUC 18 DNA Control Plasmid   | Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.   |
|                     | Beta Mercaptoethanol         | Get medical attention immediately. Call a poison center or physician. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |
| <b>Skin contact</b> | : <b>AG1 competent cells</b> | Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.  |
|                     | pUC 18 DNA Control Plasmid   | Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.  |
|                     | Beta Mercaptoethanol         | Get medical attention immediately. Call a poison center or physician. Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water.   |

## Section 4. First aid measures

|                  |                            |   |
|------------------|----------------------------|---|
| <b>Ingestion</b> | : AG1 competent cells      | before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.   |
|                  | pUC 18 DNA Control Plasmid | Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.   |
|                  | Beta Mercaptoethanol       | Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.<br>Get medical attention immediately. Call a poison center or physician. Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Chemical burns must be treated promptly by a physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |

### Most important symptoms/effects, acute and delayed

#### Potential acute health effects

|                     |   |   |
|---------------------|---|---|
| <b>Eye contact</b>  | : AG1 competent cells<br>pUC 18 DNA Control Plasmid<br>Beta Mercaptoethanol | No known significant effects or critical hazards.<br>No known significant effects or critical hazards.<br>Causes serious eye damage.  |
| <b>Inhalation</b>   | : AG1 competent cells<br>pUC 18 DNA Control Plasmid<br>Beta Mercaptoethanol | No known significant effects or critical hazards.<br>No known significant effects or critical hazards.<br>Harmful if inhaled.   |
| <b>Skin contact</b> | : AG1 competent cells<br>pUC 18 DNA Control Plasmid<br>Beta Mercaptoethanol | No known significant effects or critical hazards.<br>No known significant effects or critical hazards.<br>Harmful in contact with skin. Causes skin irritation.<br>May cause an allergic skin reaction. |
| <b>Ingestion</b>    | : AG1 competent cells<br>pUC 18 DNA Control Plasmid<br>Beta Mercaptoethanol | No known significant effects or critical hazards.<br>No known significant effects or critical hazards.<br>No known significant effects or critical hazards.   |

#### Over-exposure signs/symptoms

|                    |   |  |
|--------------------|---|--|
| <b>Eye contact</b> | : AG1 competent cells<br>pUC 18 DNA Control Plasmid<br>Beta Mercaptoethanol | No specific data.<br>No specific data.<br>Adverse symptoms may include the following:<br>pain<br>watering<br>redness |
|--------------------|---|--|

## Section 4. First aid measures

|                     |                            |  |
|---------------------|----------------------------|--|
| <b>Inhalation</b>   | : AG1 competent cells      | No specific data.  |
|                     | pUC 18 DNA Control Plasmid | No specific data.  |
|                     | Beta Mercaptoethanol       | No specific data.  |
| <b>Skin contact</b> | : AG1 competent cells      | No specific data.  |
|                     | pUC 18 DNA Control Plasmid | No specific data.  |
|                     | Beta Mercaptoethanol       | Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>blistering may occur |
| <b>Ingestion</b>    | : AG1 competent cells      | No specific data.  |
|                     | pUC 18 DNA Control Plasmid | No specific data.  |
|                     | Beta Mercaptoethanol       | Adverse symptoms may include the following:<br>stomach pains   |

### Indication of immediate medical attention and special treatment needed, if necessary

|                                   |                            |   |
|-----------------------------------|----------------------------|---|
| <b>Notes to physician</b>         | : AG1 competent cells      | Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.   |
|                                   | pUC 18 DNA Control Plasmid | Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.   |
|                                   | Beta Mercaptoethanol       | Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.   |
| <b>Specific treatments</b>        | : AG1 competent cells      | No specific treatment.  |
|                                   | pUC 18 DNA Control Plasmid | No specific treatment.  |
|                                   | Beta Mercaptoethanol       | No specific treatment.  |
| <b>Protection of first-aiders</b> | : AG1 competent cells      | No action shall be taken involving any personal risk or without suitable training.  |
|                                   | pUC 18 DNA Control Plasmid | No action shall be taken involving any personal risk or without suitable training.  |
|                                   | Beta Mercaptoethanol       | No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

See toxicological information (Section 11)

## Section 5. Firefighting measures

### Extinguishing media

|                                       |                            |   |
|---------------------------------------|----------------------------|---|
| <b>Suitable extinguishing media</b>   | : AG1 competent cells      | Use an extinguishing agent suitable for the surrounding fire. |
|                                       | pUC 18 DNA Control Plasmid | Use an extinguishing agent suitable for the surrounding fire. |
|                                       | Beta Mercaptoethanol       | Use an extinguishing agent suitable for the surrounding fire. |
| <b>Unsuitable extinguishing media</b> | : AG1 competent cells      | None known.   |
|                                       | pUC 18 DNA Control Plasmid | None known.   |
|                                       | Beta Mercaptoethanol       | None known.   |

## Section 5. Firefighting measures

|   |                            |   |
|---|----------------------------|---|
| <b>Specific hazards arising from the chemical</b>     | : AG1 competent cells      | In a fire or if heated, a pressure increase will occur and the container may burst.   |
|   | pUC 18 DNA Control Plasmid | In a fire or if heated, a pressure increase will occur and the container may burst.   |
|   | Beta Mercaptoethanol       | In a fire or if heated, a pressure increase will occur and the container may burst. This material is harmful to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |
| <b>Hazardous thermal decomposition products</b>       | : AG1 competent cells      | Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>sulfur oxides<br>halogenated compounds<br>metal oxide/oxides  |
|   | pUC 18 DNA Control Plasmid | No specific data.   |
|   | Beta Mercaptoethanol       | Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>sulfur oxides   |
| <b>Special protective actions for fire-fighters</b>   | : AG1 competent cells      | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.   |
|   | pUC 18 DNA Control Plasmid | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.   |
|   | Beta Mercaptoethanol       | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.   |
| <b>Special protective equipment for fire-fighters</b> | : AG1 competent cells      | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |
|   | pUC 18 DNA Control Plasmid | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |
|   | Beta Mercaptoethanol       | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |

## Section 6. Accidental release measures

### Personal precautions, protective equipment and emergency procedures

|                                    |                            |   |
|------------------------------------|----------------------------|---|
| <b>For non-emergency personnel</b> | : AG1 competent cells      | No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Put on appropriate personal protective equipment. |
|                                    | pUC 18 DNA Control Plasmid | No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk   |

## Section 6. Accidental release measures

Beta Mercaptoethanol

through spilt material. Put on appropriate personal protective equipment.

No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Do not breathe vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

**For emergency responders** : AG1 competent cells

If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

pUC 18 DNA Control Plasmid

If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

Beta Mercaptoethanol

If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

**Environmental precautions** : AG1 competent cells

Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

pUC 18 DNA Control Plasmid

Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Beta Mercaptoethanol

Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.

### Methods and material for containment and cleaning up

**Methods for cleaning up** : AG1 competent cells

Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

pUC 18 DNA Control Plasmid

Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Beta Mercaptoethanol

Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

## Section 7. Handling and storage

### Precautions for safe handling

#### Protective measures

|                            |   |
|----------------------------|---|
| : AG1 competent cells      | Put on appropriate personal protective equipment (see Section 8).   |
| pUC 18 DNA Control Plasmid | Put on appropriate personal protective equipment (see Section 8).   |
| Beta Mercaptoethanol       | Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. |

#### Advice on general occupational hygiene

|                            |  |
|----------------------------|--|
| : AG1 competent cells      | Potentially biohazardous material. Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. |
| pUC 18 DNA Control Plasmid | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.                                    |
| Beta Mercaptoethanol       | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.                                    |

#### Conditions for safe storage, including any incompatibilities

|                            |   |
|----------------------------|---|
| : AG1 competent cells      | Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use. |
| pUC 18 DNA Control Plasmid | Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for  |

## Section 7. Handling and storage

Beta Mercaptoethanol

incompatible materials before handling or use. Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

## Section 8. Exposure controls and personal protection

### Control parameters

#### Occupational exposure limits

| Ingredient name   | Exposure limits  |
|---|--|
| <b>AG1 competent cells</b><br>Glycerol<br><br>Dimethyl sulfoxide<br><br><br><br><br><br><br><br><br>Sucrose | <b>Safe Work Australia (Australia, 1/2014).</b><br>TWA: 10 mg/m <sup>3</sup> 8 hours.<br><b>DFG MAC-values list (Germany, 7/2015).</b><br><b>Absorbed through skin.</b><br>PEAK: 320 mg/m <sup>3</sup> , 4 times per shift, 15 minutes.<br>TWA: 160 mg/m <sup>3</sup> 8 hours.<br>PEAK: 100 ppm, 4 times per shift, 15 minutes.<br>TWA: 50 ppm 8 hours.<br><b>Safe Work Australia (Australia, 1/2014).</b><br>TWA: 10 mg/m <sup>3</sup> 8 hours. |

### Appropriate engineering controls

: If user operations generate dust, fumes, gas, vapour or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

### Environmental exposure controls

: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

### Individual protection measures

#### Hygiene measures

: Handle as biohazard material (Biosafety level 1). Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

#### Eye/face protection

: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/or face shield. If inhalation hazards exist, a full-face respirator may be required instead.

#### Skin protection

## Section 8. Exposure controls and personal protection

- Hand protection** : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.
- Body protection** : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
- Other skin protection** : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
- Respiratory protection** : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

## Section 9. Physical and chemical properties

pUC 18 DNA Control Plasmid 0°C (32°F)  
Beta Mercaptoethanol Not available.
- Boiling point** : AG1 competent cells Not available.  
pUC 18 DNA Control Plasmid 100°C (212°F)  
Beta Mercaptoethanol Not available.
- Flash point** : AG1 competent cells Not available.  
pUC 18 DNA Control Plasmid Not available.  
Beta Mercaptoethanol Not available.
- Evaporation rate** : AG1 competent cells Not available.  
pUC 18 DNA Control Plasmid Not available.  
Beta Mercaptoethanol Not available.
- Flammability (solid, gas)** : AG1 competent cells Not applicable.  
pUC 18 DNA Control Plasmid Not applicable.  
Beta Mercaptoethanol Not applicable.
- Lower and upper explosive (flammable) limits** : AG1 competent cells Not available.  
pUC 18 DNA Control Plasmid Not available.  
Beta Mercaptoethanol Not available.
- Vapour pressure** : AG1 competent cells Not available.  
pUC 18 DNA Control Plasmid Not available.  
Beta Mercaptoethanol Not available.
- Vapour density** :

## Section 9. Physical and chemical properties

|   |                            |  |
|---|----------------------------|--|
|   | AG1 competent cells        | Not available.   |
|   | pUC 18 DNA Control Plasmid | Not available.   |
|   | Beta Mercaptoethanol       | Not available.   |
| <b>Relative density</b>                       | : AG1 competent cells      | Not available.   |
|   | pUC 18 DNA Control Plasmid | Not available.   |
|   | Beta Mercaptoethanol       | Not available.   |
| <b>Solubility</b>                             | : AG1 competent cells      | Soluble in the following materials: cold water and hot water.        |
|   | pUC 18 DNA Control Plasmid | Easily soluble in the following materials: cold water and hot water. |
|   | Beta Mercaptoethanol       | Easily soluble in the following materials: cold water and hot water. |
| <b>Partition coefficient: n-octanol/water</b> | : AG1 competent cells      | Not available.   |
|   | pUC 18 DNA Control Plasmid | Not available.   |
|   | Beta Mercaptoethanol       | Not available.   |
| <b>Auto-ignition temperature</b>              | : AG1 competent cells      | Not available.   |
|   | pUC 18 DNA Control Plasmid | Not available.   |
|   | Beta Mercaptoethanol       | Not available.   |
| <b>Decomposition temperature</b>              | : AG1 competent cells      | Not available.   |
|   | pUC 18 DNA Control Plasmid | Not available.   |
|   | Beta Mercaptoethanol       | Not available.   |
| <b>Viscosity</b>                              | : AG1 competent cells      | Not available.   |
|   | pUC 18 DNA Control Plasmid | Not available.   |
|   | Beta Mercaptoethanol       | Not available.   |

## Section 10. Stability and reactivity

|   |                            |  |
|---|----------------------------|--|
| <b>Reactivity</b>                         | : AG1 competent cells      | No specific test data related to reactivity available for this product or its ingredients. |
|   | pUC 18 DNA Control Plasmid | No specific test data related to reactivity available for this product or its ingredients. |
|   | Beta Mercaptoethanol       | No specific test data related to reactivity available for this product or its ingredients. |
| <b>Chemical stability</b>                 | : AG1 competent cells      | The product is stable.   |
|   | pUC 18 DNA Control Plasmid | The product is stable.   |
|   | Beta Mercaptoethanol       | The product is stable.   |
| <b>Possibility of hazardous reactions</b> | : AG1 competent cells      | Under normal conditions of storage and use, hazardous reactions will not occur.            |
|   | pUC 18 DNA Control Plasmid | Under normal conditions of storage and use, hazardous reactions will not occur.            |
|   | Beta Mercaptoethanol       | Under normal conditions of storage and use, hazardous reactions will not occur.            |
| <b>Conditions to avoid</b>                | : AG1 competent cells      | No specific data.  |
|   | pUC 18 DNA Control Plasmid | No specific data.  |
|   | Beta Mercaptoethanol       | No specific data.  |
| <b>Incompatible materials</b>             | : AG1 competent cells      | May react or be incompatible with oxidising materials.                                     |
|   | pUC 18 DNA Control Plasmid | May react or be incompatible with oxidising materials.                                     |
|   | Beta Mercaptoethanol       | May react or be incompatible with oxidising materials.                                     |

## Section 10. Stability and reactivity

|   |                            |  |
|---|----------------------------|--|
| <b>Hazardous decomposition products</b> | : AG1 competent cells      | Under normal conditions of storage and use, hazardous decomposition products should not be produced. |
|   | pUC 18 DNA Control Plasmid | Under normal conditions of storage and use, hazardous decomposition products should not be produced. |
|   | Beta Mercaptoethanol       | Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

## Section 11. Toxicological information

### Information on toxicological effects

#### Acute toxicity

| Product/ingredient name     | Result      | Species | Dose        | Exposure |
|-----------------------------|-------------|---------|-------------|----------|
| <b>AG1 competent cells</b>  |             |         |             |          |
| Glycerol                    | LD50 Oral   | Rat     | 12600 mg/kg | -        |
| Dimethyl sulfoxide          | LD50 Dermal | Rat     | 40000 mg/kg | -        |
|                             | LD50 Oral   | Rat     | 14500 mg/kg | -        |
| Sucrose                     | LD50 Oral   | Rat     | 29700 mg/kg | -        |
| <b>Beta Mercaptoethanol</b> |             |         |             |          |
| 2-Mercaptoethanol           | LD50 Dermal | Rabbit  | 200 mg/kg   | -        |
|                             | LD50 Oral   | Rat     | 244 mg/kg   | -        |

#### Irritation/Corrosion

| Product/ingredient name     | Result                 | Species | Score | Exposure                | Observation |
|-----------------------------|------------------------|---------|-------|-------------------------|-------------|
| <b>AG1 competent cells</b>  |                        |         |       |                         |             |
| Glycerol                    | Eyes - Mild irritant   | Rabbit  | -     | 24 hours 500 milligrams | -           |
|                             | Skin - Mild irritant   | Rabbit  | -     | 24 hours 500 milligrams | -           |
| Dimethyl sulfoxide          | Eyes - Mild irritant   | Rabbit  | -     | 24 hours 500 milligrams | -           |
|                             | Eyes - Mild irritant   | Rabbit  | -     | 100 milligrams          | -           |
|                             | Skin - Mild irritant   | Rabbit  | -     | 24 hours 500 milligrams | -           |
|                             | Skin - Mild irritant   | Rabbit  | -     | 100 milligrams          | -           |
| <b>Beta Mercaptoethanol</b> |                        |         |       |                         |             |
| 2-Mercaptoethanol           | Eyes - Severe irritant | Rabbit  | -     | 2 milligrams            | -           |

#### Sensitisation

Not available.

#### Mutagenicity

Not available.

#### Carcinogenicity

Not available.

#### Reproductive toxicity

Not available.

#### Teratogenicity

Not available.

#### Specific target organ toxicity (single exposure)

## Section 11. Toxicological information

| Name                                      | Category   | Route of exposure | Target organs                |
|---|------------|-------------------|------------------------------|
| Beta Mercaptoethanol<br>2-Mercaptoethanol | Category 3 | Not applicable.   | Respiratory tract irritation |

### Specific target organ toxicity (repeated exposure)

Not available.

### Aspiration hazard

Not available.

**Information on likely routes of exposure** : AG1 competent cells Routes of entry anticipated: Oral, Dermal, Inhalation.  
pUC 18 DNA Control Plasmid Not available.  
Beta Mercaptoethanol Routes of entry anticipated: Oral, Dermal, Inhalation.

### Potential acute health effects

**Eye contact** : AG1 competent cells No known significant effects or critical hazards.  
pUC 18 DNA Control Plasmid No known significant effects or critical hazards.  
Beta Mercaptoethanol Causes serious eye damage.

**Inhalation** : AG1 competent cells No known significant effects or critical hazards.  
pUC 18 DNA Control Plasmid No known significant effects or critical hazards.  
Beta Mercaptoethanol Harmful if inhaled.

**Skin contact** : AG1 competent cells No known significant effects or critical hazards.  
pUC 18 DNA Control Plasmid No known significant effects or critical hazards.  
Beta Mercaptoethanol Harmful in contact with skin. Causes skin irritation.  
May cause an allergic skin reaction.

**Ingestion** : AG1 competent cells No known significant effects or critical hazards.  
pUC 18 DNA Control Plasmid No known significant effects or critical hazards.  
Beta Mercaptoethanol No known significant effects or critical hazards.

### Symptoms related to the physical, chemical and toxicological characteristics

**Eye contact** : AG1 competent cells No specific data.  
pUC 18 DNA Control Plasmid No specific data.  
Beta Mercaptoethanol Adverse symptoms may include the following:  
pain  
watering  
redness

**Inhalation** : AG1 competent cells No specific data.  
pUC 18 DNA Control Plasmid No specific data.  
Beta Mercaptoethanol No specific data.

**Skin contact** : AG1 competent cells No specific data.  
pUC 18 DNA Control Plasmid No specific data.  
Beta Mercaptoethanol Adverse symptoms may include the following:  
pain or irritation  
redness  
blistering may occur

**Ingestion** : AG1 competent cells No specific data.  
pUC 18 DNA Control Plasmid No specific data.  
Beta Mercaptoethanol Adverse symptoms may include the following:  
stomach pains

### Delayed and immediate effects as well as chronic effects from short and long-term exposure

#### Short term exposure

**Potential immediate effects** : Not available.

**Potential delayed effects** : Not available.

#### Long term exposure

## Section 11. Toxicological information

**Potential immediate effects** : Not available.

**Potential delayed effects** : Not available.

### Potential chronic health effects

Not available.

| Glycerol                    | -1.76              | -    | low       |
| Dimethyl sulfoxide          | -1.35              | 3.16 | low       |
| Sucrose                     | -3.7               | -    | low       |
| <b>Beta Mercaptoethanol</b> |                    |      |           |
| 2-Mercaptoethanol           | -0.056             | -    | low       |

### Mobility in soil

**Soil/water partition coefficient (K<sub>oc</sub>)** : Not available.

**Other adverse effects** : No known significant effects or critical hazards.

## Section 13. Disposal considerations

**Disposal methods** : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

## Section 14. Transport information

**ADG / IMDG / IATA** : Not regulated as Dangerous Goods according to the ADG Code .

**Special precautions for user** : **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

**Transport in bulk according to Annex II of Marpol and the IBC Code** : Not available.

## Section 15. Regulatory information

### Standard Uniform Schedule of Medicine and Poisons

6

### Model Work Health and Safety Regulations - Scheduled Substances

No listed substance

### International regulations

#### Chemical Weapon Convention List Schedules I, II & III Chemicals

Not listed.

#### Montreal Protocol (Annexes A, B, C, E)

Not listed.

#### Stockholm Convention on Persistent Organic Pollutants

Not listed.

## Section 15. Regulatory information

### Rotterdam Convention on Prior Informed Consent (PIC)

Not listed.

### UNECE Aarhus Protocol on POPs and Heavy Metals

Not listed.

### Inventory list
