### Hazard pictograms

### Signal word

- :  XL10-Gold Kan (r) ultracompetent cells Warning  
 pUC 18 DNA Control Plasmid No signal word.  
 XL10-Gold 2-Mercaptoethanol Danger

### Hazard statements

- :  XL10-Gold Kan (r) ultracompetent cells H320 - Causes eye irritation.  
 pUC 18 DNA Control Plasmid No known significant effects or critical hazards.  
 XL10-Gold 2-Mercaptoethanol GHS SYMBOL - **Corrosion - Exclamation mark** -  
 H318 - Causes serious eye damage.  
 H317 - May cause an allergic skin reaction.

### Precautionary statements

#### Prevention

- :  XL10-Gold Kan (r) ultracompetent cells P264 - Wash hands thoroughly after handling.  
 pUC 18 DNA Control Plasmid Not applicable.  
 XL10-Gold 2-Mercaptoethanol P280 - Wear protective gloves. Wear eye or face protection.  
 P261 - Avoid breathing vapor.  
 P272 (OSHA) - Contaminated work clothing must not be allowed out of the workplace.

#### Response

- :  XL10-Gold Kan (r) ultracompetent cells P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.  
 P337 + P313 - If eye irritation persists: Get medical attention.  
 pUC 18 DNA Control Plasmid Not applicable.  
 XL10-Gold 2-Mercaptoethanol P302 + P352 + P363 - IF ON SKIN: Wash with plenty of soap and water. Wash contaminated clothing before reuse.  
 P333 + P313 - If skin irritation or rash occurs: Get medical attention.  
 P305 + P351 + P338 + P310 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or physician.

#### Storage

- :  XL10-Gold Kan (r) ultracompetent cells Not applicable.  
 pUC 18 DNA Control Plasmid Not applicable.  
 XL10-Gold 2-Mercaptoethanol Not applicable.

#### Disposal

- :  XL10-Gold Kan (r) ultracompetent cells Not applicable.  
 pUC 18 DNA Control Plasmid Not applicable.  
 XL10-Gold 2-Mercaptoethanol P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.

### Supplemental label elements

- :  XL10-Gold Kan (r) ultracompetent cells None known.  
 pUC 18 DNA Control Plasmid None known.  
 XL10-Gold 2-Mercaptoethanol None known.

### 7.2 Conditions for safe storage, including any incompatibilities

:  XL10-Gold Kan (r) ultracompetent cells

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

### 8.2 Exposure controls

#### Appropriate engineering controls

- : If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

#### Environmental exposure controls

- : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

### Individual protection measures

#### Hygiene measures

- : Handle as biohazard material (Biosafety level 1). Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

#### Eye/face protection

- : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/or face shield. If inhalation hazards exist, a full-face respirator may be required instead.

#### Skin protection

##### Hand protection

- : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

## Section 8. Exposure controls/personal protection

- Body protection** : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
- Other skin protection** : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
- Respiratory protection** : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

## Section 13. Disposal considerations

### 13.1 Waste treatment methods

**Disposal methods** : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Disposal should be in accordance with applicable regional, national and local laws and regulations. Local regulations may be more stringent than regional or national requirements.

The information presented below only applies to the material as supplied. The identification based on characteristic(s) or listing may not apply if the material has been used or otherwise contaminated. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste identification and disposal methods in compliance with applicable regulations.

Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees.
