SAFETY DATA SHEET

pBluescript II RI Predigested Vector, Part Number 212250

Section 1. Identification

Product identifier : pBluescript II RI Predigested Vector, Part Number 212250
Part No. (Chemical Kit) : 212250
Part No. : pBluescript II RI Predigested Vector
Kanamycin Resistance Gene Test Insert

Relevant identified uses of the substance or mixture and uses advised against

Analytical reagent.

pBluescript II RI Predigested Vector 0.055 ml (55 µl 20 ng/µl)
Kanamycin Resistance Gene Test Insert 0.003 ml (3 µl 10 ng/µl)

Supplier/Manufacturer : Agilent Technologies Australia Pty Ltd
679 Springvale Road
Mulgrave
Victoria 3170, Australia
1800 802 402

Emergency telephone number (with hours of operation) : CHEMTREC®: (61)-290372994

Section 2. Hazard(s) identification

Classification of the substance or mixture
Not classified.

GHS label elements

Signal word : No signal word.

Hazard statements : No known significant effects or critical hazards.

Precautionary statements

Prevention : Not applicable.
Response : Not applicable.
Storage : Not applicable.
Disposal : Not applicable.

Date of issue/Date of revision : 27/03/2017
Date of previous issue : 27/10/2015
Version : 4
Section 2. Hazard(s) identification

Supplemental label elements: pBluescript II RI Predigested Vector, Kanamycin Resistance Gene Test Insert
Not applicable.

Other hazards which do not result in classification: pBluescript II RI Predigested Vector, Kanamycin Resistance Gene Test Insert
None known.

Section 3. Composition and ingredient information

Substance/mixture: pBluescript II RI Predigested Vector, Kanamycin Resistance Gene Test Insert
Mixture

CAS number/other identifiers: None known.

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary first aid measures

Eye contact: pBluescript II RI Predigested Vector, Kanamycin Resistance Gene Test Insert
Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.

Inhalation: pBluescript II RI Predigested Vector, Kanamycin Resistance Gene Test Insert
Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.

Skin contact: pBluescript II RI Predigested Vector, Kanamycin Resistance Gene Test Insert
Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.

Ingestion: pBluescript II RI Predigested Vector, Kanamycin Resistance Gene Test Insert
Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.
## Section 4. First aid measures

### Most important symptoms/effects, acute and delayed

<table>

See toxicological information (Section 11)
Section 5. Firefighting measures

Extinguishing media

Suitable extinguishing media : pBluescript II RI Predigested Vector, Kanamycin Resistance Gene Test Insert
Use an extinguishing agent suitable for the surrounding fire. Use an extinguishing agent suitable for the surrounding fire.

Unsuitable extinguishing media : pBluescript II RI Predigested Vector, Kanamycin Resistance Gene Test Insert
None known.

Specific hazards arising from the chemical : pBluescript II RI Predigested Vector, Kanamycin Resistance Gene Test Insert
In a fire or if heated, a pressure increase will occur and the container may burst.

Hazardous thermal decomposition products : pBluescript II RI Predigested Vector, Kanamycin Resistance Gene Test Insert
No specific data.

Special protective actions for fire-fighters : pBluescript II RI Predigested Vector, Kanamycin Resistance Gene Test Insert
Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

Special protective equipment for fire-fighters : pBluescript II RI Predigested Vector, Kanamycin Resistance Gene Test Insert
Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel : pBluescript II RI Predigested Vector, Kanamycin Resistance Gene Test Insert
No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Put on appropriate personal protective equipment.

For emergency responders : pBluescript II RI Predigested Vector, Kanamycin Resistance Gene Test Insert
If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
Section 6. Accidental release measures

**Environmental precautions**

- **pBluescript II RI Predigested Vector**
  - Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

- **Kanamycin Resistance Gene Test Insert**
  - Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

**Methods and material for containment and cleaning up**

**Methods for cleaning up**

- **pBluescript II RI Predigested Vector**
  - Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

- **Kanamycin Resistance Gene Test Insert**
  - Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Section 7. Handling and storage

**Precautions for safe handling**

**Protective measures**

- **pBluescript II RI Predigested Vector**
  - Put on appropriate personal protective equipment (see Section 8).

- **Kanamycin Resistance Gene Test Insert**
  - Put on appropriate personal protective equipment (see Section 8).

**Advice on general occupational hygiene**

- **pBluescript II RI Predigested Vector**
  - Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

- **Kanamycin Resistance Gene Test Insert**
  - Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

**Conditions for safe storage, including any incompatibilities**

- **pBluescript II RI Predigested Vector**
  - Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

Section 7. Handling and storage

Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

Section 8. Exposure controls and personal protection

Control parameters

Occupational exposure limits

None.

Appropriate engineering controls

Environmental exposure controls

- Good general ventilation should be sufficient to control worker exposure to airborne contaminants.
- Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual protection measures

Hygiene measures

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.

Skin protection

Hand protection

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

Body protection

Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Other skin protection

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory protection

Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

Section 9. Physical and chemical properties

Appearance

Physical state

- pBluescript II RI Predigested Vector: Liquid.

Colour

- pBluescript II RI Predigested Vector: Not available.
- Kanamycin Resistance Gene Test Insert: Not available.

Section 11. Toxicological information

**Delayed and immediate effects as well as chronic effects from short and long-term exposure**

**Short term exposure**
- **Potential immediate effects**: Not available.
- **Potential delayed effects**: Not available.

**Long term exposure**
- **Potential immediate effects**: Not available.
- **Potential delayed effects**: Not available.

**Potential chronic health effects**
Not available.

### General
- **pBluescript II RI Predigested Vector**: No known significant effects or critical hazards.
- **Kanamycin Resistance Gene Test Insert**: No known significant effects or critical hazards.

### Carcinogenicity
- **pBluescript II RI Predigested Vector**: No known significant effects or critical hazards.
- **Kanamycin Resistance Gene Test Insert**: No known significant effects or critical hazards.

### Mutagenicity
- **pBluescript II RI Predigested Vector**: No known significant effects or critical hazards.
- **Kanamycin Resistance Gene Test Insert**: No known significant effects or critical hazards.

### Teratogenicity
- **pBluescript II RI Predigested Vector**: No known significant effects or critical hazards.
- **Kanamycin Resistance Gene Test Insert**: No known significant effects or critical hazards.

### Developmental effects
- **pBluescript II RI Predigested Vector**: No known significant effects or critical hazards.
- **Kanamycin Resistance Gene Test Insert**: No known significant effects or critical hazards.

### Fertility effects
- **pBluescript II RI Predigested Vector**: No known significant effects or critical hazards.
- **Kanamycin Resistance Gene Test Insert**: No known significant effects or critical hazards.

**Numerical measures of toxicity**

**Acute toxicity estimates**
Not available.

Section 12. Ecological information

**Toxicity**
Not available.

**Persistence and degradability**
Not available.

**Bioaccumulative potential**
Not available.
Section 12. Ecological information

Mobility in soil

Soil/water partition coefficient ($K_{OC}$) : Not available.

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

Regulatory information

ADG / IMDG / IATA : Not regulated as Dangerous Goods according to the ADG Code.

Special precautions for user : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according to Annex II of Marpol and the IBC Code : Not available.

Section 15. Regulatory information

Standard Uniform Schedule of Medicine and Poisons

Not regulated.

Model Work Health and Safety Regulations - Scheduled Substances

No listed substance

Australia inventory (AICS) : All components are listed or exempted.

International regulations

Chemical Weapon Convention List Schedules I, II & III Chemicals

Not listed.

Montreal Protocol (Annexes A, B, C, E)

Not listed.

Stockholm Convention on Persistent Organic Pollutants

Not listed.

Rotterdam Convention on Prior Informed Consent (PIC)

Not listed.

UNECE Aarhus Protocol on POPs and Heavy Metals

Not listed.

International lists

National inventory
Section 15. Regulatory information

- **Canada**: All components are listed or exempted.
- **China**: All components are listed or exempted.
- **Europe**: All components are listed or exempted.
- **Japan**:  
  - **Japan inventory (ENCS)**: All components are listed or exempted.  
  - **Japan inventory (ISHL)**: All components are listed or exempted.
- **Malaysia**: Not determined.
- **New Zealand**: All components are listed or exempted.
- **Philippines**: All components are listed or exempted.
- **Republic of Korea**: All components are listed or exempted.
- **Taiwan**: All components are listed or exempted.
- **Turkey**: Not determined.
- **United States**: All components are listed or exempted.

Section 16. Any other relevant information

**History**

- **Date of issue/Date of revision**: 27/03/2017
- **Date of previous issue**: 27/10/2015.
- **Version**: 4

**Key to abbreviations**

- ADG = Australian Dangerous Goods
- ATE = Acute Toxicity Estimate
- BCF = Bioconcentration Factor
- GHS = Globally Harmonized System of Classification and Labelling of Chemicals
- IATA = International Air Transport Association
- IBC = Intermediate Bulk Container
- IMDG = International Maritime Dangerous Goods
- LogPow = logarithm of the octanol/water partition coefficient
- NOHSC = National Occupational Health and Safety Commission
- SUSMP = Standard Uniform Schedule of Medicine and Poisons
- UN = United Nations
