SAFETY DATA SHEET
PathDetect NF-kB cis Reporting System, Part Number 219077

Section 1. Identification

Product identifier : PathDetect NF-kB cis Reporting System, Part Number 219077
Part No. (Chemical Kit) : 219077
Part No. : pNF-kB-Luc Plasmid 219078-51
pFC-MEKK Plasmid (Positive Control) 219058-51

Relevant identified uses of the substance or mixture and uses advised against

Analytical reagent.
- pNF-kB-Luc Plasmid 0.05 ml (50 µg 1 µg/µl)
- pFC-MEKK Plasmid (Positive Control) 0.2 ml (5 µg 25 ng/µl)

Supplier/Manufacturer : Agilent Technologies Australia Pty Ltd
679 Springvale Road
Mulgrave
Victoria 3170, Australia
1800 802 402

Emergency telephone number (with hours of operation) : CHEMTREC®: +(61)-290372994

Section 2. Hazard(s) identification

Classification of the substance or mixture
Not classified.

GHS label elements

Signal word : pNF-kB-Luc Plasmid No signal word.
pFC-MEKK Plasmid (Positive Control) No signal word.

Hazard statements : pNF-kB-Luc Plasmid No known significant effects or critical hazards.
pFC-MEKK Plasmid (Positive Control) No known significant effects or critical hazards.

Precautionary statements

Prevention : pNF-kB-Luc Plasmid Not applicable.
pFC-MEKK Plasmid (Positive Control) Not applicable.

Response : pNF-kB-Luc Plasmid Not applicable.
pFC-MEKK Plasmid (Positive Control) Not applicable.

Storage : pNF-kB-Luc Plasmid Not applicable.
pFC-MEKK Plasmid (Positive Control) Not applicable.

Disposal : pNF-kB-Luc Plasmid Not applicable.
pFC-MEKK Plasmid (Positive Control) Not applicable.

Supplemental label elements

Additional warning phrases : pNF-kB-Luc Plasmid Not applicable.
pFC-MEKK Plasmid (Positive Control) Not applicable.

Date of issue/Date of revision : 31/12/2017 Date of previous issue : 30/09/2015. Version : 3.01 1/11
PathDetect NF-kB cis Reporting System, Part Number 219077

Section 2. Hazard(s) identification

Other hazards which do not result in classification:
- pNF-kB-Luc Plasmid: None known.
- pFC-MEKK Plasmid (Positive Control): None known.

Section 3. Composition and ingredient information

<table>
<thead>
<tr>

</tbody>
</table>

CAS number/other identifiers

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary first aid measures

Eye contact:
- pNF-kB-Luc Plasmid: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.
- pFC-MEKK Plasmid (Positive Control): Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.

Inhalation:
- pNF-kB-Luc Plasmid: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.
- pFC-MEKK Plasmid (Positive Control): Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.

Skin contact:
- pNF-kB-Luc Plasmid: Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.
- pFC-MEKK Plasmid (Positive Control): Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.

Ingestion:
- pNF-kB-Luc Plasmid: Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.
- pFC-MEKK Plasmid (Positive Control): Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.

Most important symptoms/effect, acute and delayed

Potential acute health effects:
- Eye contact:
  - pNF-kB-Luc Plasmid: No known significant effects or critical hazards.
  - pFC-MEKK Plasmid (Positive Control): No known significant effects or critical hazards.

Section 5. Firefighting measures

Special protective actions for fire-fighters:
- pNF-kB-Luc Plasmid
  Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
- pFC-MEKK Plasmid (Positive Control)
  Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

Special protective equipment for fire-fighters:
- pNF-kB-Luc Plasmid
  Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
- pFC-MEKK Plasmid (Positive Control)
  Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures:

For non-emergency personnel:
- pNF-kB-Luc Plasmid
  No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Put on appropriate personal protective equipment.
- pFC-MEKK Plasmid (Positive Control)
  No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Put on appropriate personal protective equipment.

For emergency responders:
- pNF-kB-Luc Plasmid
  If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
- pFC-MEKK Plasmid (Positive Control)
  If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

Environmental precautions:
- pNF-kB-Luc Plasmid
  Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
- pFC-MEKK Plasmid (Positive Control)
  Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and material for containment and cleaning up:

Methods for cleaning up:
- pNF-kB-Luc Plasmid
  Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
- pFC-MEKK Plasmid
  Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Section 6. Accidental release measures

(Positive Control) Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Section 7. Handling and storage

Precautions for safe handling

Protective measures

- pNF-kB-Luc Plasmid: Put on appropriate personal protective equipment (see Section 8).
- pFC-MEKK Plasmid (Positive Control): Put on appropriate personal protective equipment (see Section 8).

Advice on general occupational hygiene

- pNF-kB-Luc Plasmid: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
- pFC-MEKK Plasmid (Positive Control): Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, including any incompatibilities

- pNF-kB-Luc Plasmid: Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.
- pFC-MEKK Plasmid (Positive Control): Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

Section 8. Exposure controls and personal protection

Control parameters

Occupational exposure limits

None.

Appropriate engineering controls

Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

Date of issue/Date of revision: 31/12/2017  Date of previous issue: 30/09/2015  Version: 3.01 5/11
Section 8. Exposure controls and personal protection

Environmental exposure controls
Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual protection measures

Hygiene measures
Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection
Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.

Skin protection

Hand protection
Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

Body protection
Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Other skin protection
Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory protection
Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

Hazardous decomposition products:
- pNF-kB-Luc Plasmid
- pFC-MEK Plasmid (Positive Control)

Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity
Not available.

Irritation/Corrosion
Not available.

Sensitisation
Not available.

Mutagenicity
Not available.

Carcinogenicity
Not available.

Reproductive toxicity
Not available.

Teratogenicity
Not available.

Specific target organ toxicity (single exposure)
Not available.

Specific target organ toxicity (repeated exposure)
Not available.

Aspiration hazard
Not available.

Information on likely routes of exposure:
- pNF-kB-Luc Plasmid
- pFC-MEK Plasmid (Positive Control)

Not available.

Potential acute health effects

Eye contact:
- pNF-kB-Luc Plasmid
- pFC-MEK Plasmid (Positive Control)

No known significant effects or critical hazards.

Inhalation:
- pNF-kB-Luc Plasmid
- pFC-MEK Plasmid (Positive Control)

No known significant effects or critical hazards.

Skin contact:
- pNF-kB-Luc Plasmid
- pFC-MEK Plasmid (Positive Control)

No known significant effects or critical hazards.

Ingestion:
- pNF-kB-Luc Plasmid
- pFC-MEK Plasmid (Positive Control)

No known significant effects or critical hazards.

Symptoms related to the physical, chemical and toxicological characteristics

Date of issue/Date of revision: 31/12/2017
Date of previous issue: 30/09/2015
Version: 3.01
Section 11. Toxicological information

Eye contact : No specific data.

Inhalation : No specific data.

Skin contact : No specific data.

Ingestion : No specific data.

Delayed and immediate effects as well as chronic effects from short and long-term exposure

Short term exposure

Potential immediate effects : Not available.

Potential delayed effects : Not available.

Long term exposure

Potential immediate effects : Not available.

Potential delayed effects : Not available.

Potential chronic health effects

Not available.

General : No known significant effects or critical hazards.

Carcinogenicity : No known significant effects or critical hazards.

Mutagenicity : No known significant effects or critical hazards.

Teratogenicity : No known significant effects or critical hazards.

Developmental effects : No known significant effects or critical hazards.

Fertility effects : No known significant effects or critical hazards.

Numerical measures of toxicity

Acute toxicity estimates

Not available.
Section 12. Ecological information

**Toxicity**
Not available.

**Persistence and degradability**
Not available.

**Bioaccumulative potential**
Not available.

**Mobility in soil**

| Soil/water partition coefficient (K<sub>oc</sub>) | Not available. |

**Other adverse effects**
No known significant effects or critical hazards.

Section 13. Disposal considerations

**Disposal methods**
The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

**ADG / IMDG / IATA**
Not regulated as Dangerous Goods according to the ADG Code.

**Special precautions for user**
Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

**Transport in bulk according to Annex II of Marpol and the IBC Code**
Not available.

Section 15. Regulatory information

**Standard Uniform Schedule of Medicine and Poisons**
Not regulated.

**Model Work Health and Safety Regulations - Scheduled Substances**
No listed substance

**International regulations**

- **Chemical Weapon Convention List Schedules I, II & III Chemicals**
Not listed.

- **Montreal Protocol (Annexes A, B, C, E)**
Not listed.

- **Stockholm Convention on Persistent Organic Pollutants**

**Date of issue/Date of revision**
31/12/2017

**Date of previous issue**
30/09/2015

**Version**
3.01 10/11
Section 15. Regulatory information

Not listed.

Rotterdam Convention on Prior Informed Consent (PIC)
Not listed.

UNECE Aarhus Protocol on POPs and Heavy Metals
Not listed.
