SAFETY DATA SHEET

BL21-CodonPlus (DE3)-RIL Competent Cells, Part Number 230245

Section 1. Identification

Product identifier : BL21-CodonPlus (DE3)-RIL Competent Cells, Part Number 230245
Part No. (Chemical Kit) : 230245
Part No. : pUC 18 DNA Control Plasmid 200231-42
          XL10-Gold 2-Mercaptoethanol 200314-43
          BL21-CodonPlus (DE3)-RIL competent cells 230245-41

Relevant identified uses of the substance or mixture and uses advised against
Analytical reagent.
pUC 18 DNA Control Plasmid 10 µl (0.1 ng/µl)
XL10-Gold 2-Mercaptoethanol 50 µl
BL21-CodonPlus (DE3)-RIL competent cells 1000 µl (10 x 100 µl)

Supplier/Manufacturer : Agilent Technologies Australia Pty Ltd
                       679 Springvale Road
                       Mulgrave
                       Victoria 3170, Australia
                       1800 802 402

Emergency telephone number (with hours of operation) : CHEMTREC®: (61)-290372994

Section 2. Hazard(s) identification

Classification of the substance or mixture
XL10-Gold 2-Mercaptoethanol
H318  SERIOUS EYE DAMAGE/EYE IRRITATION - Category 1
H317  SKIN SENSITISATION - Category 1
H412  LONG-TERM AQUATIC HAZARD - Category 3

GHS label elements
Hazard pictograms :

Signal word : pUC 18 DNA Control Plasmid No signal word.
              XL10-Gold DANGER
              2-Mercaptoethanol No signal word.
              BL21-CodonPlus (DE3)-RIL competent cells No signal word.

Hazard statements : pUC 18 DNA Control Plasmid No known significant effects or critical hazards.
                    XL10-Gold H318 - Causes serious eye damage.
                    2-Mercaptoethanol H317 - May cause an allergic skin reaction.
                    BL21-CodonPlus (DE3)-RIL competent cells H412 - Harmful to aquatic life with long lasting effects.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

**Description of necessary first aid measures**

**Eye contact**

- XL10-Gold 2-Mercaptoethanol
  - Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.

**Inhalation**

- XL10-Gold 2-Mercaptoethanol
  - Get medical attention immediately. Call a poison center or physician. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician.

**Skin contact**

- XL10-Gold 2-Mercaptoethanol
  - Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.

- BL21-CodonPlus (DE3)-RIL competent cells
  - Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.

- pUC 18 DNA Control Plasmid
  - Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.

- BL21-CodonPlus (DE3)-RIL competent cells
  - Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.

- pUC 18 DNA Control Plasmid
  - Get medical attention immediately. Call a poison center or physician. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

- pUC 18 DNA Control Plasmid
  - Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.

- pUC 18 DNA Control Plasmid
  - Get medical attention immediately. Call a poison center or physician. Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician. In the event of any

Section 5. Firefighting measures

(SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel:
- pUC 18 DNA Control Plasmid: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Put on appropriate personal protective equipment.
- XL10-Gold 2-Mercaptoethanol: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Do not breathe vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
- BL21-CodonPlus (DE3)-RIL competent cells: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Put on appropriate personal protective equipment.

For emergency responders:
- pUC 18 DNA Control Plasmid: If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
- XL10-Gold 2-Mercaptoethanol: If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
- BL21-CodonPlus (DE3)-RIL competent cells: If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

Environmental precautions:
- pUC 18 DNA Control Plasmid: Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
- XL10-Gold 2-Mercaptoethanol: Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.
- BL21-CodonPlus (DE3)-RIL competent cells: Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and material for containment and cleaning up
Section 6. Accidental release measures

Methods for cleaning up

- **pUC 18 DNA Control Plasmid**: Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

- **XL10-Gold 2-Mercaptoethanol**: Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

- **BL21-CodonPlus (DE3)-RIL competent cells**: Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Section 7. Handling and storage

Precautions for safe handling

- **Protective measures**: Put on appropriate personal protective equipment (see Section 8).

- **pUC 18 DNA Control Plasmid**: Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. Avoid release to the environment. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

- **XL10-Gold 2-Mercaptoethanol**: Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. Avoid release to the environment. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

- **BL21-CodonPlus (DE3)-RIL competent cells**: Put on appropriate personal protective equipment (see Section 8). Potentially biohazardous material. Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Advice on general occupational hygiene

- **pUC 18 DNA Control Plasmid**: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

- **XL10-Gold 2-Mercaptoethanol**: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

- **BL21-CodonPlus (DE3)-RIL competent cells**: Potentially biohazardous material. Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
Section 7. Handling and storage

Conditions for safe storage, including any incompatibilities:
- **pUC 18 DNA Control Plasmid**: Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.
- **XL10-Gold**: Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.
- **2-Mercaptoethanol**: Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.
- **BL21-CodonPlus (DE3)-RIL competent cells**: Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

**Appropriate engineering controls**

If user operations generate dust, fumes, gas, vapour or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

**Environmental exposure controls**

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

**Individual protection measures**

**Hygiene measures**

Handle as biohazard material (Biosafety level 1). Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Section 8. Exposure controls and personal protection

Eye/face protection: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/or face shield. If inhalation hazards exist, a full-face respirator may be required instead.

Skin protection

Hand protection: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

Body protection: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Other skin protection: Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory protection: Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

Section 9. Physical and chemical properties

Appearance

Physical state:
- pUC 18 DNA Control Plasmid: Liquid.
- XL10-Gold: Liquid.
- 2-Mercaptoethanol: Liquid.
- BL21-CodonPlus (DE3)-RIL competent cells: Liquid.

Colour:
- pUC 18 DNA Control Plasmid: Not available.
- XL10-Gold: Not available.
- 2-Mercaptoethanol: Not available.
- BL21-CodonPlus (DE3)-RIL competent cells: Not available.

Odour:
- pUC 18 DNA Control Plasmid: Not available.
- XL10-Gold: Not available.
- 2-Mercaptoethanol: Not available.
- BL21-CodonPlus (DE3)-RIL competent cells: Not available.

Odour threshold:
- pUC 18 DNA Control Plasmid: Not available.
- XL10-Gold: Not available.
- 2-Mercaptoethanol: Not available.
- BL21-CodonPlus (DE3)-RIL competent cells: Not available.

pH:
- pUC 18 DNA Control Plasmid: 7.5
- XL10-Gold: Not available.
- 2-Mercaptoethanol: Not available.
- BL21-CodonPlus (DE3)-RIL competent cells: 6.4

Melting point:
- pUC 18 DNA Control Plasmid: 0°C (32°F)
- XL10-Gold: Not available.
- 2-Mercaptoethanol: Not available.
- BL21-CodonPlus (DE3)-RIL competent cells: Not available.

Section 10. Stability and reactivity

Reactivity:
- pUC 18 DNA Control Plasmid: No specific test data related to reactivity available for this product or its ingredients.
- XL10-Gold: No specific test data related to reactivity available for this product or its ingredients.
- 2-Mercaptoethanol: No specific test data related to reactivity available for this product or its ingredients.
- BL21-CodonPlus (DE3)-RIL competent cells: No specific test data related to reactivity available for this product or its ingredients.

Chemical stability:
- pUC 18 DNA Control Plasmid: The product is stable.
- XL10-Gold: The product is stable.
- 2-Mercaptoethanol: The product is stable.
- BL21-CodonPlus (DE3)-RIL competent cells: The product is stable.

Possibility of hazardous reactions:
- pUC 18 DNA Control Plasmid: Under normal conditions of storage and use, hazardous reactions will not occur.
- XL10-Gold: Under normal conditions of storage and use, hazardous reactions will not occur.
- 2-Mercaptoethanol: Under normal conditions of storage and use, hazardous reactions will not occur.
- BL21-CodonPlus (DE3)-RIL competent cells: Under normal conditions of storage and use, hazardous reactions will not occur.

Conditions to avoid:
- pUC 18 DNA Control Plasmid: No specific data.
- XL10-Gold: No specific data.
- 2-Mercaptoethanol: No specific data.
- BL21-CodonPlus (DE3)-RIL competent cells: No specific data.

Incompatible materials:
- pUC 18 DNA Control Plasmid: May react or be incompatible with oxidising materials.
- XL10-Gold: May react or be incompatible with oxidising materials.
- 2-Mercaptoethanol: May react or be incompatible with oxidising materials.
- BL21-CodonPlus (DE3)-RIL competent cells: May react or be incompatible with oxidising materials.

Hazardous decomposition products:
- pUC 18 DNA Control Plasmid: Under normal conditions of storage and use, hazardous decomposition products should not be produced.
- XL10-Gold: Under normal conditions of storage and use, hazardous decomposition products should not be produced.
- 2-Mercaptoethanol: Under normal conditions of storage and use, hazardous decomposition products should not be produced.
- BL21-CodonPlus (DE3)-RIL competent cells: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

### Delayed and immediate effects as well as chronic effects from short and long-term exposure

#### Short term exposure

| Potential immediate effects | Not available. |
| Potential delayed effects  | Not available. |

#### Long term exposure

| Potential immediate effects | Not available. |
Section 11. Toxicological information

Potential delayed effects : Not available.

Potential chronic health effects
Not available.

General:
- pUC 18 DNA Control Plasmid
  - XL10-Gold
  - 2-Mercaptoethanol
  - BL21-CodonPlus (DE3)-RIL competent cells
  - No known significant effects or critical hazards.

Carcinogenicity:
- pUC 18 DNA Control Plasmid
  - XL10-Gold
  - 2-Mercaptoethanol
  - BL21-CodonPlus (DE3)-RIL competent cells
  - No known significant effects or critical hazards.

Mutagenicity:
- pUC 18 DNA Control Plasmid
  - XL10-Gold
  - 2-Mercaptoethanol
  - BL21-CodonPlus (DE3)-RIL competent cells
  - No known significant effects or critical hazards.

Teratogenicity:
- pUC 18 DNA Control Plasmid
  - XL10-Gold
  - 2-Mercaptoethanol
  - BL21-CodonPlus (DE3)-RIL competent cells
  - No known significant effects or critical hazards.

Developmental effects:
- pUC 18 DNA Control Plasmid
  - XL10-Gold
  - 2-Mercaptoethanol
  - BL21-CodonPlus (DE3)-RIL competent cells
  - No known significant effects or critical hazards.

Fertility effects:
- pUC 18 DNA Control Plasmid
  - XL10-Gold
  - 2-Mercaptoethanol
  - BL21-CodonPlus (DE3)-RIL competent cells
  - No known significant effects or critical hazards.

Mobility in soil

Soil/water partition coefficient (K_{OC}) : Not available.

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spill material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

Regulatory information

ADG / IMDG / IATA : Not regulated as Dangerous Goods according to the ADG Code.

Special precautions for user : Transport within user’s premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according to Annex II of Marpol and the IBC Code : Not available.

Section 15. Regulatory information

Standard Uniform Schedule of Medicine and Poisons

6

Model Work Health and Safety Regulations - Scheduled Substances

No listed substance

Australia inventory (AICS) : All components are listed or exempted.
