Section 2 - Composition/Information on Ingredients

Bulk antibody or antigen-modified polymeric media wetted by a buffered neutral salt solution containing phosphates and 0.02% sodium azide [26628-22-8], pH 7.4, in water. These antibody- or antigen-modified media components have no CAS numbers assigned.

Chemical Families: Antibody-modified polymer in aqueous buffered salt solution with phosphates

Chemical Synonyms: None

Section 3 - Hazards Identification

No adverse human health effects have been observed upon exposure to the substances in this column.

Section 4 - First-Aid Measures

Inhalation: If breathing is difficult, move affected person to fresh air. **Skin Contact:** If irritation occurs, wash with soap and water. **Eye Contact:** If irritation occurs, irrigate the eyes with copious amounts of water by separating the eyelids with fingers. **Ingestion:** If swallowed, get medical attention immediately.

Section 5 - Fire-Fighting Measures

Extinguishing Media: Appropriate to surroundings. **Special Fire Fighting Procedures:** Wear full protective clothing and self-contained positive pressure breathing apparatus certified by NIOSH when fighting chemically related fires. **Unusual Fire and Explosion Hazards:** None

DISCLAIMER: This Safety Data Sheet is offered without charge to the clients of Agilent Technologies. Data is the most current available to Agilent Technologies at the time of preparation and is issued as a matter of information only, no warranty as to its accuracy or completeness is expressed or implied.

Section 6 - Accidental Release Measures

Wearing appropriate personal protective equipment, sweep up using a dust suppresser. Vacuum the remainder of the smaller quantities using a HEPA-type vacuum. Avoid inhaling dust. Place waste in a plastic bag or other suitable container and dispose of as residual waste. This material is not defined as hazardous waste by RCRA (40 CFR Part 261) and may be landfilled according to federal, state and local regulations.

Section 7 - Handling and Storage

Wash thoroughly after handling. Maintain good housekeeping practices. Keep containers closed. Do not store with incompatible materials. Store in a cool, dry place.

Section 8 - Exposure Controls/Personal Protection

Ventilation: Adequate ventilation is required to protect personnel from exposure to chemical vapors or dusts exceeding PEL and to minimize fire hazards. See Section 15 for regulatory standards of exposure. **Respiratory:** Use NIOSH approved respirator equipment. See Section 15. **Eyes:** Safety glasses are considered minimum protection. Chemical safety goggles or face shield may be necessary depending on quantity of material and conditions of use. Emergency eye wash fountains should be available in the vicinity of any possible exposure. **Skin:** Chemical-resistant protective gloves and clothing are recommended. The choice of protective gloves or clothing must be based on chemical resistance and other user requirements. Generally BUNA-N offers acceptable chemical resistance. Individuals who are acutely and specifically sensitive to this chemical may require additional protective clothing.
