- Additional ecological information:**

- General notes:**

Water hazard class 1 (Self-assessment): slightly hazardous for water

Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

Must not reach bodies of water or drainage ditch undiluted or unneutralized.

Rinse off of bigger amounts into drains or the aquatic environment may lead to decreased pH-values. A low pH-value harms aquatic organisms. In the dilution of the use-level the pH-value is considerably increased, so that after the use of the product the aqueous waste, emptied into drains, is only low water-dangerous.

- Results of PBT and vPvB assessment**

- PBT:** Not applicable.

- vPvB:** Not applicable.

- Other adverse effects** No further relevant information available.

13 Disposal considerations

- Waste treatment methods**

- Recommendation:**

Must not be disposed of together with household garbage. Do not allow product to reach sewage system.

- Uncleaned packagings:**

- Recommendation:** Dispose in accordance with national regulations.

- Recommended cleansing agent:** Water, if necessary with cleansing agents.
