SAFETY DATA SHEET

Atomic Emission Detector Sample Kit, Part Number 8500-5067

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Product name: Atomic Emission Detector Sample Kit, Part Number 8500-5067
Part no. (chemical kit): 8500-5067
Part no.: AED Test Mixture #1 8500-5068-1
AED Test Mixture #2 8500-5069-1

1.2 Relevant identified uses of the substance or mixture and uses advised against

Material uses: Reagents and Standards for Analytical Chemistry Laboratory Use
AED Test Mixture #1 3 x 0.5 ml
AED Test Mixture #2 3 x 0.5 ml

1.3 Details of the supplier of the safety data sheet

Agilent Technologies Manufacturing GmbH & Co. KG
Hewlett-Packard-Str. 8
76337 Waldbronn
Germany
0800 603 1000

e-mail address of person responsible for this SDS: pdl-msds_author@agilent.com

1.4 Emergency telephone number

Emergency telephone number (with hours of operation): CHEMTREC®: +(44)-870-8200418

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Product definition: AED Test Mixture #1 Mixture
AED Test Mixture #2 Mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

AED Test Mixture #1
H225 FLAMMABLE LIQUIDS - Category 2
H336 SPECIFIC TARGET ORGAN TOXICITY - SINGLE EXPOSURE (Narcotic effects) - Category 3
H304 ASPIRATION HAZARD - Category 1
H400 SHORT-TERM (ACUTE) AQUATIC HAZARD - Category 1
H410 LONG-TERM (CHRONIC) AQUATIC HAZARD - Category 1

AED Test Mixture #2
H225 FLAMMABLE LIQUIDS - Category 2
H336 SPECIFIC TARGET ORGAN TOXICITY - SINGLE EXPOSURE (Narcotic effects) - Category 3
H304 ASPIRATION HAZARD - Category 1
H400 SHORT-TERM (ACUTE) AQUATIC HAZARD - Category 1
H410 LONG-TERM (CHRONIC) AQUATIC HAZARD - Category 1

Date of issue/Date of revision: 30/04/2018 1/20

Atomic Emission Detector Sample Kit, Part Number 8500-5067

SECTION 2: Hazards identification

Ingredients of unknown ecotoxicity

- AED Test Mixture #1
- AED Test Mixture #2

Percentage of the mixture consisting of ingredient(s) of unknown hazards to the aquatic environment: 4.3%

See Section 11 for more detailed information on health effects and symptoms.

See Section 16 for the full text of the H statements declared above.

2.2 Label elements

Hazard pictograms

- AED Test Mixture #1
- AED Test Mixture #2

Signal word

- AED Test Mixture #1: Danger
- AED Test Mixture #2: Danger

Hazard statements

- AED Test Mixture #1: H225 - Highly flammable liquid and vapour. H304 - May be fatal if swallowed and enters airways. H336 - May cause drowsiness or dizziness. H410 - Very toxic to aquatic life with long lasting effects.
- AED Test Mixture #2: H225 - Highly flammable liquid and vapour. H304 - May be fatal if swallowed and enters airways. H336 - May cause drowsiness or dizziness. H410 - Very toxic to aquatic life with long lasting effects.

Precautionary statements

Prevention

- AED Test Mixture #1: P280 - Wear protective gloves. Wear protective clothing. Wear eye or face protection. P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
- AED Test Mixture #2: P280 - Wear protective gloves. Wear protective clothing. Wear eye or face protection. P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

Response

- AED Test Mixture #1: P304 + P340 - IF INHALED: Remove person to fresh air and keep comfortable for breathing. P301 + P310 + P331 - IF SWALLOWED: Immediately call a POISON CENTER or physician. Do NOT induce vomiting. P303 + P361 + P353 - IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water.
- AED Test Mixture #2: P304 + P340 - IF INHALED: Remove person to fresh air and keep comfortable for breathing. P301 + P310 + P331 - IF SWALLOWED: Immediately call a POISON CENTER or physician. Do NOT induce vomiting. P303 + P361 + P353 - IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water.

Storage

- AED Test Mixture #1: P405 - Store locked up.
- AED Test Mixture #2: P405 - Store locked up.

Disposal

- AED Test Mixture #1: P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.
- AED Test Mixture #2: P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.

Date of issue/Date of revision: 30/04/2018
Atomic Emission Detector Sample Kit, Part Number 8500-5067

SECTION 2: Hazards identification

Hazardous ingredients

| AED Test Mixture #1 | 2,2,4-trimethylpentane |
| AED Test Mixture #2 | 2,2,4-trimethylpentane |

Supplemental label elements

| AED Test Mixture #1 | Repeated exposure may cause skin dryness or cracking. |
| AED Test Mixture #2 | Repeated exposure may cause skin dryness or cracking. |

Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles

None known.

Special packaging requirements

| Tactile warning of danger |
| AED Test Mixture #1 | Not applicable. |
| AED Test Mixture #2 | Not applicable. |

2.3 Other hazards

Other hazards which do not result in classification

| AED Test Mixture #1 | None known. |
| AED Test Mixture #2 | None known. |

Date of issue/Date of revision: 30/04/2018
SECTION 3: Composition/information on ingredients

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Type

1. Substance classified with a health or environmental hazard
2. Substance with a workplace exposure limit
3. Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII
4. Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII
5. Substance of equivalent concern
6. Additional disclosure due to company policy

SECTION 4: First aid measures

4.1 Description of first aid measures

**Eye contact**

AED Test Mixture #1

Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.

AED Test Mixture #2

Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.

**Inhalation**

AED Test Mixture #1

Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If necessary, call a poison center or physician. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

AED Test Mixture #2

Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If necessary, call a poison center or physician. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

**Skin contact**

AED Test Mixture #1

Wash skin thoroughly with soap and water or use recognised skin cleanser. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse.

AED Test Mixture #2

Wash skin thoroughly with soap and water or use recognised skin cleanser. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse.

Date of issue/Date of revision: 30/04/2018

#### 4.3 Indication of any immediate medical attention and special treatment needed

- **Notes to physician**
  - AED Test Mixture #1: Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
  - AED Test Mixture #2: Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

- **Specific treatments**
  - AED Test Mixture #1: No specific treatment.
  - AED Test Mixture #2: No specific treatment.

### SECTION 5: Firefighting measures

#### 5.1 Extinguishing media

- **Suitable extinguishing media**
  - AED Test Mixture #1: Use dry chemical, \( \text{CO}_2 \), water spray (fog) or foam.
  - AED Test Mixture #2: Use dry chemical, \( \text{CO}_2 \), water spray (fog) or foam.

- **Unsuitable extinguishing media**
  - AED Test Mixture #1: Do not use water jet.
  - AED Test Mixture #2: Do not use water jet.

#### 5.2 Special hazards arising from the substance or mixture

- **Hazards from the substance or mixture**
  - AED Test Mixture #1: Highly flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. The vapour/gas is heavier than air and will spread along the ground. Vapours may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. This material is very toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.
  - AED Test Mixture #2: Highly flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. The vapour/gas is heavier than air and will spread along the ground. Vapours may accumulate in low or confined areas or travel a
SECTION 5: Firefighting measures

Hazardous combustion products

AED Test Mixture #1
Decomposition products may include the following materials:
- carbon dioxide
- carbon monoxide

AED Test Mixture #2
Decomposition products may include the following materials:
- carbon dioxide
- carbon monoxide

5.3 Advice for firefighters

Special precautions for fire-fighters

AED Test Mixture #1
Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.

AED Test Mixture #2
Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.

Special protective equipment for fire-fighters

AED Test Mixture #1
Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.

AED Test Mixture #2
Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

AED Test Mixture #1
No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

AED Test Mixture #2
No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

Date of issue>Date of revision: 30/04/2018
SECTION 6: Accidental release measures

For emergency responders:

7.3 Specific end use(s)

Recommendations:
- AED Test Mixture #1: Industrial applications, Professional applications.
- AED Test Mixture #2: Industrial applications, Professional applications.

Industrial sector specific solutions:
- AED Test Mixture #1: Not applicable.
- AED Test Mixture #2: Not applicable.

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Occupational exposure limits
No exposure limit value known.

Recommended monitoring procedures:
If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

DNELs/DMELs
No DNELs/DMELs available.

PNECs
No PNECs available

8.2 Exposure controls

Appropriate engineering controls:
Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

Individual protection measures

Hygiene measures:
Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection:
Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.

Skin protection

Date of issue/Date of revision: 30/04/2018

10/20
**SECTION 8: Exposure controls/personal protection**

**Hand protection**: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

**Body protection**: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

**Other skin protection**: Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

**Respiratory protection**: Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

**Environmental exposure controls**: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

**Date of issue/Date of revision**: 30/04/2018
SECTION 9: Physical and chemical properties

Solubility(ies)
- AED Test Mixture #1: Insoluble in the following materials: cold water and hot water.
- AED Test Mixture #2: Insoluble in the following materials: cold water and hot water.

Partition coefficient: n-octanol/water
- AED Test Mixture #1: Not available.
- AED Test Mixture #2: Not available.

Auto-ignition temperature
- AED Test Mixture #1: Not available.
- AED Test Mixture #2: Not available.

Decomposition temperature
- AED Test Mixture #1: Not available.
- AED Test Mixture #2: Not available.

Viscosity
- AED Test Mixture #1: Not available.
- AED Test Mixture #2: Not available.

Explosive properties
- AED Test Mixture #1: Not available.
- AED Test Mixture #2: Not available.

Oxidising properties
- AED Test Mixture #1: Not available.
- AED Test Mixture #2: Not available.

9.2 Other information
No additional information.

SECTION 10: Stability and reactivity

10.1 Reactivity
- AED Test Mixture #1: No specific test data related to reactivity available for this product or its ingredients.
- AED Test Mixture #2: No specific test data related to reactivity available for this product or its ingredients.

10.2 Chemical stability
- AED Test Mixture #1: The product is stable.
- AED Test Mixture #2: The product is stable.

10.3 Possibility of hazardous reactions
- AED Test Mixture #1: Under normal conditions of storage and use, hazardous reactions will not occur.
- AED Test Mixture #2: Under normal conditions of storage and use, hazardous reactions will not occur.

10.4 Conditions to avoid
- AED Test Mixture #1: Avoid all possible sources of ignition (spark or flame). Do not pressurise, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. Do not allow vapour to accumulate in low or confined areas.
- AED Test Mixture #2: Avoid all possible sources of ignition (spark or flame). Do not pressurise, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. Do not allow vapour to accumulate in low or confined areas.

10.5 Incompatible materials
- AED Test Mixture #1: Reactive or incompatible with the following materials: oxidizing materials
- AED Test Mixture #2: Reactive or incompatible with the following materials: oxidizing materials

10.6 Hazardous decomposition products
- AED Test Mixture #1: Under normal conditions of storage and use, hazardous decomposition products should not be produced.
- AED Test Mixture #2: Under normal conditions of storage and use, hazardous decomposition products should not be produced.
11.1 Information on toxicological effects

Information on likely routes of exposure:
AED Test Mixture #1: Routes of entry anticipated: Oral, Dermal, Inhalation.
AED Test Mixture #2: Routes of entry anticipated: Oral, Dermal, Inhalation.

Potential acute health effects

Inhalation:
AED Test Mixture #1: Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness.
AED Test Mixture #2: Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness.

Ingestion:
AED Test Mixture #1: Can cause central nervous system (CNS) depression. May be fatal if swallowed and enters airways.
AED Test Mixture #2: Can cause central nervous system (CNS) depression. May be fatal if swallowed and enters airways.

Skin contact:
AED Test Mixture #1: Defatting to the skin. May cause skin dryness and irritation.
AED Test Mixture #2: Defatting to the skin. May cause skin dryness and irritation.

Eye contact:
AED Test Mixture #1: No known significant effects or critical hazards.
AED Test Mixture #2: No known significant effects or critical hazards.

Symptoms related to the physical, chemical and toxicological characteristics

Inhalation:
AED Test Mixture #1: Adverse symptoms may include the following:
- Nausea or vomiting
- Headache
- Fatigue
- Dizziness/vertigo
- Unconsciousness

AED Test Mixture #2: Adverse symptoms may include the following:
- Nausea or vomiting
- Headache
- Fatigue
- Dizziness/vertigo
- Unconsciousness

Date of issue/Date of revision: 30/04/2018

14/20
SECTION 11: Toxicological information

Ingestion

AED Test Mixture #1
Adverse symptoms may include the following: nausea or vomiting.

AED Test Mixture #2
Adverse symptoms may include the following: nausea or vomiting.

Skin contact

AED Test Mixture #1
Adverse symptoms may include the following: irritation, dryness, cracking.

AED Test Mixture #2
Adverse symptoms may include the following: irritation, dryness, cracking.

Eye contact

AED Test Mixture #1
No specific data.

AED Test Mixture #2
No specific data.

Delayed and immediate effects as well as chronic effects from short and long-term exposure

Short term exposure

Potential immediate effects
Not available.

Potential delayed effects
Not available.

Long term exposure

Potential immediate effects
Not available.

Potential delayed effects
Not available.

Potential chronic health effects

General

AED Test Mixture #1
Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis.

AED Test Mixture #2
Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis.

Carcinogenicity

AED Test Mixture #1
No known significant effects or critical hazards.

AED Test Mixture #2
No known significant effects or critical hazards.

Mutagenicity

AED Test Mixture #1
No known significant effects or critical hazards.

AED Test Mixture #2
No known significant effects or critical hazards.

Teratogenicity

AED Test Mixture #1
No known significant effects or critical hazards.

AED Test Mixture #2
No known significant effects or critical hazards.

Developmental effects

AED Test Mixture #1
No known significant effects or critical hazards.

AED Test Mixture #2
No known significant effects or critical hazards.

Fertility effects

AED Test Mixture #1
No known significant effects or critical hazards.

AED Test Mixture #2
No known significant effects or critical hazards.

Other information

AED Test Mixture #1
Adverse symptoms may include the following: Repeated exposure may cause skin dryness or cracking.

AED Test Mixture #2
Adverse symptoms may include the following: Repeated exposure may cause skin dryness or cracking.

#### 12.4 Mobility in soil

**Soil/water partition coefficient (K<sub>oc</sub>)**

- Not available.

**Mobility**

- Not available.

#### 12.5 Results of PBT and vPvB assessment

- **PBT**: Not applicable.
- **vPvB**: Not applicable.

#### 12.6 Other adverse effects

- No known significant effects or critical hazards.
SECTION 13: Disposal considerations

13.1 Waste treatment methods

Product

Methods of disposal: The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.

Hazardous waste

Packaging

Methods of disposal: The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

Special precautions: This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

SECTION 14: Transport information

ADR/RID / IMDG / IATA: Not regulated.

Additional information

Remarks: De minimis quantities

14.6 Special precautions for user: Transport within user’s premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

14.7 Transport in bulk according to Annex II of Marpol and the IBC Code: Not available.

SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

EU Regulation (EC) No. 1907/2006 (REACH)

Annex XIV - List of substances subject to authorisation

Annex XIV

None of the components are listed.

Substances of very high concern

None of the components are listed.

Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles

AED Test Mixture #1: Not applicable.

AED Test Mixture #2: Not applicable.

Other EU regulations

Ozone depleting substances (1005/2009/EU)

Not listed.

Prior Informed Consent (PIC) (649/2012/EU)

Not listed.

Seveso Directive

Date of issue/Date of revision: 30/04/2018
SECTION 15: Regulatory information

This product is controlled under the Seveso Directive.

### Danger criteria

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

### International regulations

**Chemical Weapon Convention List Schedules I, II & III Chemicals**
Not listed.

**Montreal Protocol (Annexes A, B, C, E)**
Not listed.

**Stockholm Convention on Persistent Organic Pollutants**
Not listed.

**Rotterdam Convention on Prior Informed Consent (PIC)**
Not listed.

**UNECE Aarhus Protocol on POPs and Heavy Metals**
Not listed.

### Inventory list

- **Australia**: Not determined.
- **Canada**: Not determined.
- **China**: Not determined.
- **Europe**: Not determined.
- **Japan**:
  - Japan inventory (ENCS): Not determined.
  - Japan inventory (ISHL): Not determined.
- **Malaysia**: Not determined.
- **New Zealand**: Not determined.
- **Philippines**: Not determined.
- **Republic of Korea**: Not determined.
- **Taiwan**: Not determined.
- **Thailand**: Not determined.
- **Turkey**: Not determined.
- **United States**: Not determined.
- **Viet Nam**: Not determined.

### 15.2 Chemical safety assessment

This product contains substances for which Chemical Safety Assessments might still be required.

**Date of issue/Date of revision**: 30/04/2018
SECTION 16: Other information

Indicates information that has changed from previously issued version.

Abbreviations and acronyms:
- ATE = Acute Toxicity Estimate
- CLP = Classification, Labelling and Packaging Regulation [Regulation (EC) No. 1272/2008]
- DNEL = Derived No Effect Level
- EUH statement = CLP-specific Hazard statement
- PNEC = Predicted No Effect Concentration
- RRN = REACH Registration Number

Procedure used to derive the classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Full text of abbreviated H statements

AED Test Mixture #1

H225  Highly flammable liquid and vapour.
H304  May be fatal if swallowed and enters airways.
H315  Causes skin irritation.
H319  Causes serious eye irritation.
H336  May cause drowsiness or dizziness.
H400  Very toxic to aquatic life.
H410  Very toxic to aquatic life with long lasting effects.

AED Test Mixture #2

H225  Highly flammable liquid and vapour.
H304  May be fatal if swallowed and enters airways.
H315  Causes skin irritation.
H319  Causes serious eye irritation.
H336  May cause drowsiness or dizziness.
H400  Very toxic to aquatic life.
H410  Very toxic to aquatic life with long lasting effects.
