**SAFETY DATA SHEET**

Dioxin Analyzer Standard, Part Number G3440-85039

---

### Section 1. Identification

**Product identifier**: Dioxin Analyzer Standard, Part Number G3440-85039

**Part no. (chemical kit)**: G3440-85039

**Part no.**

- Dioxin/Furan/DL-PCB Check Standard G3440-85039-1
- DL/NDL-PCB Check Standard G3440-85039-2

**Supplier/Manufacturer**: Agilent Technologies Australia Pty Ltd

- 679 Springvale Road
- Mulgrave
- Victoria 3170, Australia
- 1800 802 402

**Emergency telephone number (with hours of operation)**: CHEMTREC®: +(61)-290372994

---

### Section 2. Hazard(s) identification

**Classification of the substance or mixture**

**Dioxin/Furan/DL-PCB Check Standard**

- H226 FLAMMABLE LIQUIDS - Category 3
- H332 ACUTE TOXICITY (inhalation) - Category 4
- H315 SKIN CORROSION/IRRITATION - Category 2
- H319 SERIOUS EYE DAMAGE/EYE IRRITATION - Category 2A
- H335 SPECIFIC TARGET ORGAN TOXICITY - SINGLE EXPOSURE (Respiratory tract irritation) - Category 3
- H336 SPECIFIC TARGET ORGAN TOXICITY - SINGLE EXPOSURE (Narcotic effects) - Category 3
- H373 SPECIFIC TARGET ORGAN TOXICITY - REPEATED EXPOSURE (central nervous system (CNS)) - Category 2
- H304 ASPIRATION HAZARD - Category 1
- H400 SHORT-TERM (ACUTE) AQUATIC HAZARD - Category 1
- H410 LONG-TERM (CHRONIC) AQUATIC HAZARD - Category 1

**DL/NDL-PCB Check Standard**

- H225 FLAMMABLE LIQUIDS - Category 2
- H315 SKIN CORROSION/IRRITATION - Category 2
- H336 SPECIFIC TARGET ORGAN TOXICITY - SINGLE EXPOSURE (Narcotic effects) - Category 3
- H304 ASPIRATION HAZARD - Category 1
- H400 SHORT-TERM (ACUTE) AQUATIC HAZARD - Category 1
- H410 LONG-TERM (CHRONIC) AQUATIC HAZARD - Category 1

**GHS label elements**

</tr>
</tbody>
</table>
Section 4. First aid measures

**Skin contact**

Dioxin/Furan/DL-PCB Check Standard

Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention.

Dioxin/Furan/DL-PCB Check Standard

Wash clothing before reuse. Clean shoes thoroughly before reuse.

DL/NDL-PCB Check Standard

Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention.

DL/NDL-PCB Check Standard

Wash clothing before reuse. Clean shoes thoroughly before reuse.

**Ingestion**

Dioxin/Furan/DL-PCB Check Standard

Get medical attention immediately. Call a poison center or physician. Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Aspiration hazard if swallowed. Can enter lungs and cause damage. Do not induce vomiting. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

DL/NDL-PCB Check Standard

Get medical attention immediately. Call a poison center or physician. Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Aspiration hazard if swallowed. Can enter lungs and cause damage. Do not induce vomiting. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

**Most important symptoms/effects, acute and delayed**

**Potential acute health effects**

**Eye contact**

Dioxin/Furan/DL-PCB Check Standard

Causes serious eye irritation.

DL/NDL-PCB Check Standard

No known significant effects or critical hazards.

**Inhalation**

Dioxin/Furan/DL-PCB Check Standard

Harmful if inhaled. Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness. May cause respiratory irritation.

DL/NDL-PCB Check Standard

Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness.

**Skin contact**

Dioxin/Furan/DL-PCB Check Standard

Causes skin irritation.

DL/NDL-PCB Check Standard

Causes skin irritation.

**Notes to physician**

- Dioxin/Furan/DL-PCB Check Standard: Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
- DL/NDL-PCB Check Standard: Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

**Specific treatments**

Section 4. First aid measures

Protection of first-aiders:

Dioxin/Furan/DL-PCB Check Standard
No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

DL/NDL-PCB Check Standard
See toxicological information (Section 11)

Section 5. Firefighting measures

Extinguishing media

Suitable extinguishing media:

Dioxin/Furan/DL-PCB Check Standard
Use dry chemical, CO₂, water spray (fog) or foam.

DL/NDL-PCB Check Standard
Use dry chemical, CO₂, water spray (fog) or foam.

Unsuitable extinguishing media:

Dioxin/Furan/DL-PCB Check Standard
Do not use water jet.

DL/NDL-PCB Check Standard
Do not use water jet.

Specific hazards arising from the chemical:

Dioxin/Furan/DL-PCB Check Standard
Flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. This material is very toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.

DL/NDL-PCB Check Standard
Highly flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. The vapour/gas is heavier than air and will spread along the ground. Vapours may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. This material is very toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.

Hazardous thermal decomposition products:

Dioxin/Furan/DL-PCB Check Standard
Decomposition products may include the following materials:
carbon dioxide
carbon monoxide

DL/NDL-PCB Check Standard
Decomposition products may include the following materials:
carbon dioxide
carbon monoxide
Section 5. Firefighting measures

**Special protective actions for fire-fighters**

- **Dioxin/Furan/DL-PCB Check Standard**
  - Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.

- **DL/NDL-PCB Check Standard**
  - Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.

**Special protective equipment for fire-fighters**

- **Dioxin/Furan/DL-PCB Check Standard**
  - Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

- **DL/NDL-PCB Check Standard**
  - Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

**Hazchem code**

- **Dioxin/Furan/DL-PCB Check Standard**
  - 3Y

- **DL/NDL-PCB Check Standard**
  - 3YE

Section 6. Accidental release measures

**Personal precautions, protective equipment and emergency procedures**

**For non-emergency personnel**

- **Dioxin/Furan/DL-PCB Check Standard**
  - No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spill material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

- **DL/NDL-PCB Check Standard**
  - No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spill material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

**For emergency responders**

- **Dioxin/Furan/DL-PCB Check Standard**
  - If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

- **DL/NDL-PCB Check Standard**
  - If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
Section 6. Accidental release measures

Environmental precautions: Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.

Methods and material for containment and cleaning up

Methods for cleaning up: Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Section 7. Handling and storage

Precautions for safe handling

Protective measures: Put on appropriate personal protective equipment (see Section 8). Do not breathe vapour or mist. Do not swallow. Avoid contact with eyes, skin and clothing. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.

Date of issue/Date of revision: 25/09/2018 Date of previous issue: 20/10/2016 Version: 3
Section 7. Handling and storage

Advice on general occupational hygiene

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

Section 8. Exposure controls and personal protection

Control parameters
Occupational exposure limits

<table>
<thead>
<tr>
<th>Ingredient name</th>
<th>Exposure limits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dioxin/Furan/DL-PCB Check Standard</td>
<td>Safe Work Australia (Australia, 1/2014). TWA: 1050 mg/m³ 8 hours. TWA: 200 ppm 8 hours.</td>
</tr>
<tr>
<td>nonane</td>
<td></td>
</tr>
<tr>
<td>2,2,4-trimethylpentane</td>
<td></td>
</tr>
</tbody>
</table>
Section 8. Exposure controls and personal protection

Appropriate engineering controls: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

Environmental exposure controls: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual protection measures

Hygiene measures: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.

Skin protection

Hand protection: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

Body protection: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.

Other skin protection: Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory protection: Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

### Potential acute health effects

- **Eye contact**
  - Dioxin/Furan/DL-PCB Check Standard: Causes serious eye irritation.
  - DL/NDL-PCB Check Standard: No known significant effects or critical hazards.

- **Inhalation**
  - Dioxin/Furan/DL-PCB Check Standard: Harmful if inhaled. Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness. May cause respiratory irritation.
  - DL/NDL-PCB Check Standard: Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness.

- **Skin contact**
  - Dioxin/Furan/DL-PCB Check Standard: Causes skin irritation.
  - DL/NDL-PCB Check Standard: Causes skin irritation.

- **Ingestion**
  - Dioxin/Furan/DL-PCB Check Standard: Can cause central nervous system (CNS) depression. May be fatal if swallowed and enters airways.
  - DL/NDL-PCB Check Standard: Can cause central nervous system (CNS) depression. May be fatal if swallowed and enters airways.

### Symptoms related to the physical, chemical and toxicological characteristics

- **Eye contact**
  - Dioxin/Furan/DL-PCB Check Standard: Adverse symptoms may include the following:
    - pain or irritation
    - watering
    - redness
  - DL/NDL-PCB Check Standard: Adverse symptoms may include the following:
    - pain or irritation
    - watering
    - redness

- **Inhalation**
  - Dioxin/Furan/DL-PCB Check Standard: Adverse symptoms may include the following:
    - respiratory tract irritation
    - coughing
    - nausea or vomiting
    - headache
    - drowsiness/fatigue
    - dizziness/vertigo
    - unconsciousness
  - DL/NDL-PCB Check Standard: Adverse symptoms may include the following:
    - nausea or vomiting
    - headache
    - drowsiness/fatigue
    - dizziness/vertigo
    - unconsciousness
Section 11. Toxicological information

Skin contact: Dioxin/Furan/DL-PCB Check Standard
Adverse symptoms may include the following:
- irritation
- redness

DL/NDL-PCB Check Standard
Adverse symptoms may include the following:
- irritation
- redness

Ingestion: Dioxin/Furan/DL-PCB Check Standard
Adverse symptoms may include the following:
- nausea or vomiting

DL/NDL-PCB Check Standard
Adverse symptoms may include the following:
- nausea or vomiting

Delayed and immediate effects as well as chronic effects from short and long-term exposure

Short term exposure

Potential immediate effects: Not available.

Potential delayed effects: Not available.

Long term exposure

Potential immediate effects: Not available.

Potential delayed effects: Not available.

Carcinogenicity: Dioxin/Furan/DL-PCB Check Standard
No known significant effects or critical hazards.

DL/NDL-PCB Check Standard
No known significant effects or critical hazards.

Mutagenicity: Dioxin/Furan/DL-PCB Check Standard
No known significant effects or critical hazards.

DL/NDL-PCB Check Standard
No known significant effects or critical hazards.

Teratogenicity: Dioxin/Furan/DL-PCB Check Standard
No known significant effects or critical hazards.

DL/NDL-PCB Check Standard
No known significant effects or critical hazards.

Developmental effects: Dioxin/Furan/DL-PCB Check Standard
No known significant effects or critical hazards.

DL/NDL-PCB Check Standard
No known significant effects or critical hazards.

Fertility effects: Dioxin/Furan/DL-PCB Check Standard
No known significant effects or critical hazards.

DL/NDL-PCB Check Standard
No known significant effects or critical hazards.

Numerical measures of toxicity

Acute toxicity estimates

Section 11. Toxicological information

Other information

- Dioxin/Furan/DL-PCB Check Standard
  - Adverse symptoms may include the following:
  - Repeated exposure may cause skin dryness or cracking.

- DL/NDL-PCB Check Standard
  - Adverse symptoms sometimes include the following:
  - Repeated exposure may cause skin dryness or cracking.

Mobility in soil

Soil/water partition coefficient (K<sub>oc</sub>) : Not available.

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.
Section 14. Transport information

ADG / IMDG / IATA : Not regulated as Dangerous Goods according to the ADG Code.

Additional information

Remarks : De minimis quantities

ADG : Hazchem code 3YE

Special precautions for user : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according to Annex II of Marpol and the IBC Code : Not available.

Section 15. Regulatory information

Standard Uniform Schedule of Medicine and Poisons

7

Model Work Health and Safety Regulations - Scheduled Substances

No listed substance

International regulations

Chemical Weapon Convention List Schedules I, II & III Chemicals

Not listed.

Montreal Protocol (Annexes A, B, C, E)

Not listed.

Stockholm Convention on Persistent Organic Pollutants

Not listed.

Rotterdam Convention on Prior Informed Consent (PIC)

Not listed.

UNECE Aarhus Protocol on POPs and Heavy Metals

Not listed.

Inventory list

Australia : Not determined.
Canada : Not determined.
China : Not determined.
Europe : Not determined.
Japan : Japan inventory (ENCS): Not determined.
Japan inventory (ISHL): Not determined.
Malaysia : Not determined.
New Zealand : Not determined.
Philippines : Not determined.
Republic of Korea : Not determined.
Taiwan : Not determined.
Thailand : Not determined.
Turkey : Not determined.
United States : Not determined.
Viet Nam : Not determined.
Section 16. Any other relevant information

History

- **Date of issue/Date of revision**: 25/09/2018
- **Date of previous issue**: 20/10/2016
- **Version**: 3

Key to abbreviations:
- ADG = Australian Dangerous Goods
- ATE = Acute Toxicity Estimate
- BCF = Bioconcentration Factor
- GHS = Globally Harmonized System of Classification and Labelling of Chemicals
- IATA = International Air Transport Association
- IBC = Intermediate Bulk Container
- IMDG = International Maritime Dangerous Goods
- LogPow = logarithm of the octanol/water partition coefficient
- NOHSC = National Occupational Health and Safety Commission
- SUSMP = Standard Uniform Schedule of Medicine and Poisons
- UN = United Nations
