Negative Control
Rabbit Immunoglobulin Fraction
(Normal)

Code X0903

For research use only. Not for use in diagnostic procedures.

Recommended use
Negative Control Rabbit Immunoglobulin Fraction (Normal) is recommended for use as negative control for Dako rabbit antibodies in immunocytochemistry, immunoblotting and ELISA. Please note that when X0903 is used as negative control, it should be diluted to the same protein concentration as the primary antibody.

Reagent provided
Rabbit immunoglobulin fraction isolated from serum of healthy non-immunized rabbits. The immunoglobulin fraction has been isolated by salting out and ion exchange chromatography in the same way as the immunoglobulin fraction of Dako rabbit antibodies. Provided in liquid form in 0.1 mol/L NaCl, 15 mmol/L NaNO₃.

Protein concentration g/L: See label on vial

Precautions
1. For research use only.
2. The device is not intended for clinical use including diagnosis, prognosis, and monitoring of a disease state, and it must not be used in conjunction with patient records or treatment.
3. This product contains sodium azide (NaNO₃), a chemical highly toxic in pure form. At product concentrations, though not classified as hazardous, sodium azide may react with lead and copper plumbing to form highly explosive build-ups of metal azides. Upon disposal, flush with large volumes of water to prevent metal azide build-up in plumbing.
4. As with any product derived from biological sources, proper handling procedures should be used.
5. Wear appropriate Personal Protective Equipment to avoid contact with eyes and skin.
6. Unused solution should be disposed of according to local, State and Federal regulations.

Storage
Store at 2-8 °C. Do not use after expiration date stamped on vial. If unexpected staining is observed which cannot be explained by variations in laboratory procedures and a problem with the product is suspected, contact Dako Technical Services.
