Be Agilent Sure in Your CQA Monitoring
Understanding the attributes of a biologic drug—and the processes used to create it—is critical to ensuring safety, efficacy, and pharmacokinetics. Agilent AdvanceBio columns deliver results you can be sure of when analyzing highly complex biotherapeutic molecules and monitoring their purity, potency, and other critical quality attributes (CQA).

**Advantage**
- More reliable results
- Meets vital deadlines
- Reduces rework

**Native Protein A or Protein G**
- and BioMonolith Protein G
- Ideal for mAb titer determination during process development

**Attribute**
- Reduced clogging
- High binding capacity
- Fast separation
