EZChrom Elite 3.3.1

Other Features

*Workstation Compliance without a Domain*

- Support for Local Windows PC User lists
- EZChrom User no longer required to be Local Administrator
- Full compliance possible when used with AFS
- Merger of Method and Sequence Custom Report Features
  - Common templates
  - Access to both Method and Sequence fields in the same template
EZChrom Elite 3.3.1

New Real Time Plot

- Real Time Plot with updated Agilent instrument drivers
  - View detector signal data without Preview Run
New Enterprise Migration tool

A new tool to easily migrate the Ezchrom Elite Enterprise

Create a parallel Enterprise path

Moves all configuration, project settings and audit trails to the new Enterprise

Can work in parallel with the old revision path as projects and instruments move over

60 day temporary license provided by Agilent to run both

No need to manually configure the new enterprise to match

Users, security permission and settings
Enterprise migration tool

No need to shut down lab and re-install software on all clients at once

No need to manually create project settings, users and instruments

Old Enterprise  Projects  Settings  Users  Instruments  New Enterprise

Data/Method Storage
Upgrade and migrate over time

Old Revision Enterprise

– Enterprise users and configuration
– Projects
  • 1
  • 2.....
– Instruments
  • 1
  • 2…
– Clients

New Revision Enterprise

– Enterprise users and configuration
– Projects
  • 1
  • 2.....
– Instruments
  • 1
  • 2….
– Clients

Each project and instrument can be moved with all settings and data, but as each project is moved over to the new enterprise, it is unavailable in the old system.
Calibration, Diagnostics and EMF

This functionality will be provided by the Lab Monitoring and Diagnostic software (LMD)

Calibration and Diagnostics
• Menu item in EZChrom Elite UI to launch LMD
• Features all functionality of current ChemStation PLUS more

EMF (Early Maintenance Feedback)
• Monitors levels of consumables
• Notifications built into LC Dashboard
• Threshold setting done in LMD

Basic Version included with shipments of LC Hardware and EZChrom Elite
